Institutional Characteristics Form

117

118 Date January 1, 2023

119 1. Corporate name of institution: Husson University

120 2. Date institution was chartered or authorized: 1961

121 3. Date institution enrolled first students in degree programs: 1950

122 4. Date institution awarded first degrees: 1954

123 5. Type of control:

124 Public Private

125 State Independent, not-for-profit

126 City Religious Group

127 Other (Name of Church) _____

128 (Specify) _____ Proprietary

129 Other: (Specify) _____

130

131 6. By what agency is the institution legally authorized to provide a program of education beyond
132 high school, and what degrees is it authorized to grant: State of Maine – Legislature A.S., B.S., M.S.

133

134 7. Level of postsecondary offering (check all that apply)

135

136 Less than one year of work First professional degree

137 At least one but less than two years Master’s and/or work beyond the first
138 professional degree

139 Diploma or certificate programs of Work beyond the master’s level
140 at least two but less than four years but not at the doctoral level
141 (e.g., Specialist in Education)

142 Associate degree granting program A doctor of philosophy or
143 of at least two years equivalent degree

144 Four- or five-year baccalaureate Other doctoral
145 degree granting programs

146 Other (Specify)

147 8. Type of undergraduate programs (check all that apply)

148

149 Occupational training at the Liberal arts and general

150 crafts/clerical level (certificate)

- 151 or diploma)
- 152 Occupational training at the technical Teacher preparatory
- 153 or semi-professional level
- 154 (degree)
- 155 Two-year programs designed for Professional
- 156 full transfer to a baccalaureate
- 157 degree Other _____

- 158 9. The calendar system at the institution is:
- 159 Semester Quarter Trimester Other _____

- 160 10. What constitutes the credit hour load for a full-time equivalent (FTE) student each semester?
- 161 a) Undergraduate 12 credit hours
- 162 b) Graduate 6 credit hours
- 163 c) Professional 15 credit hours

- 164 11. Student population:

- 165 a) Degree-seeking students:

	Undergraduate	Graduate	Total
Full-time student headcount			
Part-time student headcount			
FTE			

- 166
- 167 b) Number of students (headcount) in non-credit, short-term courses: _____

- 168 12.

169 List all programs accredited by a nationally recognized, specialized accrediting agency.

Program	Agency	Accredited since	Last Reviewed	Next Review
BS Education	Maine Department of Education	2003	2018	2023
Nursing (BS / MSN)	CCNE	2003	2017	2027
Occupational Therapy (MSOT)	ACOTE	2003	2016	2026
Physical Therapy (DPT)	CAPTE	2000	2020	2025
Business (BS,	IACBE	2005	2022	TBD

MBA)				
Pharmacy (PharmD)	ACPE	2010	2020	2023
Counseling	CACREP	2014	2022	TBD
Physical Therapy Residency	ABPTRFE	2020	2020	2025

170

171 13. Off-campus Locations. List all instructional locations other than the main campus. For each site, indicate
 172 whether the location offers full-degree programs or 50% or more of one or more degree programs. Record
 173 the full-time equivalent enrollment (FTE) for the most recent year.

174 Add more rows as needed.

	Full degree	50%-99%	FTE
A. In-state Locations	N/A		
B. Out-of-state Locations	N/A		

175

176 14. International Locations: For each overseas instructional location, indicate the name of the program, the
 177 location, and the headcount of students enrolled for the most recent year. An overseas instructional
 178 location is defined as “any overseas location of an institution, other than the main campus, at which the
 179 institution matriculates students to whom it offers any portion of a degree program or offers on-site
 180 instruction or instructional support for students enrolled in a predominantly or totally on-line program.”
 181 **Do not include study abroad locations.**

Name of program(s)	Location	Headcount
N/A		

182

183 15. Degrees and certificates offered 50% or more electronically: For each degree or Title IV-eligible
 184 certificate, indicate the level (certificate, associates, baccalaureate, master’s, and professional, doctoral),
 185 the percentage of credits that may be completed on-line, and the FTE of matriculated students for the most
 186 recent year. Enter more rows as needed.

187

- 188 16. Instruction offered through contractual relationships: For each contractual relationship through which
 189 instruction is offered for a Title IV-eligible degree or certificate, indicate the name of the contractor, the
 190 location of instruction, the program name, and degree or certificate, and the number of credits that may
 191 be completed through the contractual relationship. Enter more rows as needed.

Name of contractor	Location	Name of program	Degree or certificate	# of credits
Maine Criminal Justice Academy	Vassalboro, ME	Criminal Justice	BS Criminal Justice	24
NALS, Inc.	Tulsa, OK	NALS, the Association for Legal Professionals	BS Paralegal Studies	3

192

- 193 17. List by name and title the chief administrative officers of the institution. (Use the table on the following
 194 page.): See Page XI

- 195 18. Supply a table of organization for the institution. While the organization of any institution will depend
 196 on its purpose, size and scope of operation, the institutional organization usually includes four areas.
 197 Although every institution may not have a major administrative division for these areas, the following
 198 outline may be helpful in charting and describing the overall administrative organization:

199

- 200 a) Organization of academic affairs, showing a line of responsibility to the president for each department,
201 school division, library, admissions office, and other units assigned to this area;
- 202 b) Organization of student affairs, including health services, student government, intercollegiate
203 activities, and other units assigned to this area;
- 204 c) Organization of finances and business management, including plant operations and maintenance, non-
205 academic personnel administration, IT, auxiliary enterprises, and other units assigned to this area;
- 206 d) Organization of institutional advancement, including fund development, public relations, alumni
207 office, and other units assigned to this area.

208 19. Record briefly the central elements in the history of the institution:

- 209 • Incorporated as Shaw Business College in 1898.
210 • Becomes Maine School of Commerce in 1926.
211 • Chesley Husson is appointed Principal of the Maine School of Commerce in 1929.
212 • He becomes President of the Bangor Maine School of Commerce Corporation in 1935.
213 • The institution is re-named Husson College in 1947.
214 • Degree granting authority awarded by the State of Maine
215 ○ 1954 – B.S. in business related fields
216 ○ 1963 – A.S.
217 ○ 1971 – Honorary doctorates
218 ○ 1978 – M.S. in Business
219 ○ 1982 – B.S. in Nursing
220 ○ 1991 – B.S. without restriction
221 ○ 1992 – M.S. without restriction
222 ○ Get legislation for Doctoral approval – to list DPT and Pharm D
223 • Non-profit status acquired in 1962.
224 • New campus College Circle was occupied in 1969.
225 • New England Association of Schools and Colleges accreditation 1974.
226 • B.S. in Nursing program initiated in collaboration with Eastern Maine Medical Center (EMMC) in 1982.
227 • Graduate programs in Nursing and Physical Therapy initiated in 1994.
228 • Graduate programs in Counseling initiated in 2006.
229 • Husson College becomes Husson University 2008.
230 • School of Pharmacy founded in 2007 – inaugural class enrolled in 2009.
231 • Reorganized into College of Business, College of Health and Education, School of Science & Humanities
232 and School of Pharmacy in 2010.
233 • \$21,000,000 comprehensive campaign initiated 2011.

234

245 Table of NECHE Action, Items of Special Attention, or Concerns

246

247

Date of NECHE Letter	Summary of NECHE Actions, Items of Special Attention, or Concerns	NECHE Standard cited for each matter	Self-Study Page number were addressed
July 23, 2018	Emphasis on comprehensively assessing student learning across the institution with evidence of using the results for program improvement.	2.7 The institution’s principal evaluation focus is the quality, integrity, and effectiveness of its academic programs. Evaluation endeavors and systematic assessment are demonstrably effective in the improvement of academic offerings, student learning, and the student experience. Systematic feedback from students, former students, and other relevant constituencies is a demonstrable factor in institutional improvement.	p.11, p.13, p.23-27 p.80-84
		2.8 The institution has a demonstrable record of success in using the results of its evaluation activities to inform planning, changes in programs and services, and resource allocation.	p.12
		8.1 The institution enrolling multiple student bodies, by degree level, location, modality, or other variables, develops and uses the data, evidence, and information below for each student body.	p.84-85
		8.4 The institution with stated goals for students’ co-curricular learning systematically assesses their achievement. (See also 5.8 , 5.20)	p.25 p.44
		8.8 The results of assessment and quantitative measures of student success are a demonstrable factor in the institution’s efforts to improve the curriculum and learning opportunities and results for students.	p.83-84

248

249

250 Introduction

251

252 From the Self-Study Guide: A brief description of the campus self-study process affords insight into how
253 various constituencies (faculty, administration, staff, students, trustees) participated in the self-study and how
254 they were organized and undertook their tasks. In addition, the introduction should discuss the goals of the
255 self-study and the extent to which they were achieved.

256 Process

257 As envisioned by NECHE, the self-study is the culmination of two-and-a-half years of planning and efforts by
258 a broad spectrum of participants across the Husson Campus. During the summer of 2020, the Senior Vice
259 President for Academic Affairs and Provost appointed a core team consisting of the Assistant Provost for
260 Accreditation and Assessment, the Director of Institutional Research, and the Associate Provost of Academic
261 Affairs to plan the self-study and form the nine committees that would shape the self-study. The committees
262 had approximately ten members each. The committee makeup reflected a diverse group of individuals from
263 Alumni Development to Dining Services. Members of the Executive Board of Trustees participated in
264 Standards One, Two, and Three. Senior staff members also actively served on the committees. One Senior
265 Staff Member served on Standards One, Five and Seven. Additionally, students served on Standards Three and
266 Five. The Senior Vice President for Academic Affairs and Provost appointed chairs and assigned the core team
267 to attend each of the committee meetings. During the fall, the Senior Vice President for Academic Affairs and
268 Provost and a core team outlined and carried forward the following strategy: The committees considered the
269 standards, the communications from the Commission, and preliminary evidence in the spring of 2021, deriving
270 core themes for each of the standards. Committees refined the themes in the fall of 2021 and provided
271 additional evidence for consideration. The core team provided preliminary drafts for consideration during the
272 spring of 2022 which resulted in further guidance and refinement by the committees. The core team shaped a
273 full draft during the summer break. The Standards committees provided a further review in the Fall of 2022
274 along with reviews and comments from the Senior Vice President for Academic Affairs and Provost,
275 President, and Trustees. The University provided a copy of the self-study to NECHE staff for a preliminary
276 review in October. Subsequent efforts leading up to the final submission included incorporating feedback and
277 updated financial information before the final submission in January of 2023.

278 The University engaged in extensive educational efforts throughout this period of time. Dr. Patricia O'Brien
279 provided a remote Zoom presentation during the spring of 2021 which was attended by the full Husson
280 community. The Assistant Provost for Accreditation and Assessment and Director of Institutional Research
281 attended NECHE Self-Study Part I training in the fall of 2020 and the Assistant Provost and Associate Provost
282 participated in NECHE Self-Study Part II training at the end of July 2022. During the Faculty Development
283 Days in May and August these past two years, the Chairs of the Standards Committees presented an overview
284 of the progress made to faculty and staff. This also provided an opportunity to discuss further refinement of the
285 draft as well as the expectations for the site visit. The Senior Vice President for Academic Affairs and Provost
286 also provided a presentation to the Board of Trustees during their summer 2022 retreat.

287 The strategy fostered a culture of inquiry resulting in a document that incorporates consideration of all
288 students, all locations, and all modalities of instruction. Starting in the spring of 2021 and during the 2021-
289 2022 academic year, all nine committees met at least once per month with the committees connected to larger

290 standards meeting more frequently. Given the COVID-19 environment, chairs conducted meetings via Zoom.
291 Each of the committees had access to a shared Google Drive for document access and a worksheet with the
292 language for each of the enumerated standards that included space for delegating responsibilities or providing
293 feedback. The committees accessed and reviewed Data First forms through these share locations. As noted,
294 committee members had regular access to the series of drafts leading to a preliminary submission to the
295 Commission in October of 2022 and this final submission in January of 2023.

296 Goals

297 At the time of the previous self-study, Husson was in its first five years of being a University, and the self-
298 study provided the opportunity to reflect on the impact of that transition. This self-study provided the
299 opportunity for community building and reflection at a pivotal time for Husson University: including the
300 COVID-19 pandemic, ongoing building projects, and the context of regional demographic decline. However,
301 during the last self-study, the University has experienced consistent leadership on the Senior Staff (with the
302 President serving for 15 years and the Senior Vice President for Academic Affairs and Provost serving for 14
303 years) and in many of the middle-management positions. This leadership set the trajectory through the four
304 pillars of strategic planning (see Standard 2) that paved the way for the recent completion of the Alford Hall
305 and the transition to in-house online programming during the pandemic.

306 The process that led to this final draft is an expression of the maturity that Husson has achieved in
307 responsiveness to accreditation and the challenges of higher education. Husson University's leadership is fully
308 engaged in NECHE undertakings, participating on review teams. The participants contributed by sharing ideas
309 and through multiple opportunities for input before and during the drafting process, rather than by using their
310 time to write. The technological structure provided by the shared environment facilitated a unified approach
311 and a voice fostered by the Chairs and supported by the core team. Regular meetings provided systematic
312 reminders to engage in this time of reflection and consideration. While the University was prepared to submit a
313 second draft in December, the draft advanced by the Senior Vice President for Academic Affairs/Provost and
314 Assistant Provost for Accreditation and Assessment in October was recommended for final edits.

315 While the self-study will reveal that maturity in leadership provided for a solid response to the challenges of
316 COVID-19, the opportunity to pause brought to light the need for ongoing reflection and continued hard work.
317 The Board of Trustees has recently affirmed the four pillars of strategic planning, the mission, and the vision
318 of the University. The strength derived from these solid foundations has carried the University through times
319 that proved extremely challenging for other institutions of higher ed. The seal of the University carries the
320 words, "Character and Humility" which fairly represents the reflections of Husson's community of
321 stakeholders. Husson's humble acknowledgment of the challenges ahead is balanced by character-driven
322 academic programming, solid operations, and stewardship of resources.

330

331

332 **Institutional Overview**
 333

334 Founded in 1898, Husson University has three colleges and a division of online and extended
 335 learning, offering undergraduate, graduate, and professional programs. The Husson campus
 336 covers 208 acres in Bangor, Maine, a city of about 30,000 people. Offerings are aligned with the
 337 mission of inspiring and preparing students for professional careers in Business, Health Care,
 338 Education, Technical Communications, Counseling, and Sciences. While Standard One
 339 addresses the mission and vision more fully, Husson fulfills their commitment to professional
 340 career orientation through a teaching professoriate that gives value to practice and a curriculum
 341 that advances experiential learning with the underpinnings of the sciences and humanities for
 342 lifelong learning.

343 COVID-19 -The nature of Husson’s response to the pandemic reveals the underlying character
 344 and persistence of the Institution. Reflecting the evolutionary shift to technology and customized
 345 learning, the University moved its online education from an online program management
 346 company to an in-house division. Reflecting its traditional core of Business Education tracing
 347 back to its routes in 1898, the University opened a new College of Business building, the Harold
 348 Alford Hall.

349 This persistence and resilience in undertaking initiatives during challenging times also forms the
 350 impetus through which the University will remain financially sustainable for the long-term. In
 351 the face of the demographic downturn and challenges from COVID-19, the University has a
 352 financial plan based on innovation and investment rather than cuts. The University retained all

353 employees during COVID-19. The Administration sought and executed innovative strategies for
354 response to the demographic downturn such as through esports. The Harold Alfond Hall
355 exemplifies the style of stewardship of resources in that it was constructed and opened on time
356 and under budget having been fully paid at the time of opening. While the bricks-and-mortar
357 approach leading to an expansion of residential hall options has proven quite important to overall
358 revenue streams in light of a tight rental market, the challenge associated with capital
359 investments lies in the non-cash negative impact of depreciation. For an institution whose low
360 net-tuition is another reflection of a conservative approach, another financial balance is that of
361 institutional financial aid to remain competitive in the market while also sustaining operational
362 margins necessary for a tuition-dependent institution.

363 The University's new rebranding and marketing initiative also reflects its spirit. The slogan,
364 "Husson is How!" reflects an inherent response by the institution. While that question is being
365 asked of prospective Husson students, the community can often be heard asking, "How will we
366 respond to the challenges in an evolving industry that is a central focus of nationwide polarity
367 and increase consumer and regulatory expectations?" The answer is, "Husson is How!"

368 In that light, other themes that have emerged from the self-study include the need to more fully
369 integrate planning so that the 4-pillars as described in Standard 2 have meaning within daily
370 operations. The self-study describes how the mission continues to resonate across the
371 community. This impacts a collaborative undertaking evidenced in planning and governance.
372 Preparing students for the professions fosters collaborations among the academic community
373 which creates pathways from undergraduate to graduate degree programs. The impact of
374 COVID-19 and the declining demographic continues to cause Husson to look beyond its regional
375 borders. This fosters the need and consideration for creating a sense of belonging for all
376 students whether on-campus or online, in undergraduate or graduate programs. Scholarship is
377 intertwined with the University's focus on teaching as the community prepares students for
378 careers and lifelong learning. Assessment undertakings measure the achievement of learning
379 outcomes and help students understand their readiness for licensure in professional programs.
380 Husson's updated website reflects all of these themes for prospective students in a fashion that
381 reveals the character and the supportive community found at the University. The self-study
382 reveals these themes within the context of a highly engaged community that benefits from
383 collaboration across every department.

384 Additionally, the academic community continues to reflect and respond to relevance in the
385 market through innovative programming such as in its Extended Reality and Integrated
386 Technology Degrees and Animal-Assisted Therapy Certificate. Its recent transition in
387 community service from 40 hours to one to five hours of service linked to career exploration
388 through a thoughtful essay closes the final loop on the revised General Education program with
389 respect to a fully assessed program. In response to the free Community College for Maine high

390 school graduates initiated in 2022, the academic community is exploring stronger pathways from
391 Associates Degrees to professional programs of study.

392 Various standards within the self-study will also reveal that over the past 10 years, Husson
393 University has also experienced growth in its culture. This is evidenced in the shift in Safety and
394 Security from enforcement to a community service model; the building of a Health and Wellness
395 Center to respond to student needs; and Husson’s responsiveness to the regulatory and
396 prevention initiatives required through Title IX regulations.

397 The self-study also served to demonstrate the maturity of long-standing leadership in that it was
398 able to engage the community on an ongoing and consistent basis to genuinely reflect
399 perspectives from across the community. Mapping, assessment, and learning outcomes are in
400 place for all programs including General Education. This reflects the maturity of assessment in
401 demonstrating the achievement of learning outcomes. The use of an OPM provided entry into the
402 online market that has not been moved in-house. Yet, this maturity also reflects that the years
403 ahead will require transitions not experienced in the past ten years. Accordingly, the University
404 has used this self-study to reflect with foresight upon the upcoming transitions that have been
405 previewed by the transition from a long-serving CFO of 14 years to one who will have been in
406 place for one year as of the time of the site-visit.

407 It is with commitment and gratitude that the University has undertaken the self-study process at
408 this pivotal time. It has brought greater community awareness and participation into an
409 environment already actively engaged in responding to the market demands of students and
410 external forces such as COVID-19 and declining demographics. The Husson University
411 community looks forward to the visit from the self-study team and hopes that this report
412 corroborates and supports all that the team will find when it is here on campus and engaged with
413 trustees, students, faculty, and administration.

414 **Standard 1 – Mission and Purposes**

415 *The institution’s mission and purposes are appropriate to higher education, consistent with its charter or*
416 *other operating authority, and implemented in a manner that complies with the Standards of the New*
417 *England Commission of Higher Education. The institution’s mission gives direction to its activities and*
418 *provides a basis for the assessment and enhancement of the institution’s effectiveness.*

419 **Description (1.1-1.5)**

420 Founded in 1898, Husson University provides an education engaged in transforming lives with a
421 strong focus on experiential learning that connects educational theory to real-life professional
422 practice. Husson University’s distinctive approach to education is captured in its vision and
423 mission statements that were collaboratively developed by faculty and staff and formally adopted
424 by the Board of Trustees on October 2, 2011. Located on our website ([HERE](#)), they read:

425 **Vision:** *Husson is a university of choice for premier professional programs where*
426 *students succeed, experiential learning is championed, and global engagement is*
427 *emphasized.*

428 **Mission Statement:** *Husson University inspires and prepares students for professional*
429 *careers in current and emerging fields within the context of an education informed by the*
430 *sciences and humanities.*

431 Table 1.1 outlines the guiding principles that delineate the University’s mission. The table also
432 provides information on how these active descriptions of the mission will be covered in the
433 subsequent NECHE standards.

434 *Table 1.1: Husson University’s Guiding Principles:*

Husson University’s Guiding Principles	Related NECHE Standards
Outstanding teaching.	4, 6, 9
Scholarly contributions to one's discipline or field of expertise.	6
An undergraduate and graduate curriculum that is challenging, relevant, and promotes critical thinking skills, self-confidence, and effective communication skills.	4, 8
Commitment to ethical behavior and social responsibility through involvement in the world by faculty and students, administrators, and staff, board members, and involved citizenship as a university.	3, 5, 6, 9
Lifelong learning prepares students professionally and personally for the challenges of a constantly changing world.	1, 4, 8, 9
A diverse cultural and global perspective achieved through student development and experiential learning opportunities that reinforce our commitment to a strong academic community.	4
Careful management and stewardship of university resources.	2, 7

435 Although these statements were initially developed twelve years ago, the mission and vision are
436 periodically reviewed by the Board of Trustees as indicated under Article I.1 ([HERE](#)). The most
437 recent review of the mission and vision occurred in January 2022, with revisions being approved
438 in April 2022. The Board also utilizes the mission and vision statements as guides for strategic
439 planning and decision-making. An example of the Board’s utilization of fiscal responsibility may
440 be seen in the closure of the satellite campuses in Northern and Southern Maine, as the growing
441 online modality could effectively support students in more flexible pathways towards developing
442 knowledge and skills for careers, making the extended physical sites unnecessary. Another
443 example is seen in the Board’s process for approving or continuing academic programs ([HERE](#)),
444 which includes market analysis to help clarify to what extent there are current or future careers to
445 prepare for in each field. Examples of innovative programs selected as a response to market
446 analysis include:

- 447 • 2013: Bachelor of Science in Forensic Science (projected growth in employment by the
448 United States Bureau of Labor Statistics [USBLS] is 11% by 2031)
- 449 • 2016: Bachelor of Science in Exercise Science (associated careers with this degree are
450 projected by the USBLS to grow 21% between 2014 and 2024)
- 451 • 2021: Bachelor of Science in Extended Reality (which supports a market expected to
452 grow to \$167 billion globally by 2026)
- 453 • 2021: MS Nursing Adult-Gerontology Acute Care Nurse
454 Practitioner (projected growth in employment by the USBLS is
455 40% by 2031)

456 The words “Character and Humility,” Husson’s motto since the tenure of
457 Chesley Husson's assumption of the presidency seven decades ago, are
458 emblazoned on a white banner across the Husson shield. The motto ties to
459 Husson’s mission, serving as a reminder that to be successful
460 professionals in current and emerging fields, faculty, staff, and students
461 alike must demonstrate humility within an increasingly interdependent
462 workforce, while maintaining, as individuals, the distinctive values and
463 integrity of their chosen fields.

464 The mission and vision continue to resonate with Husson University’s stakeholders and the
465 larger community as the statements capture the resilience and innovation associated with Husson
466 University’s stakeholders, programs, and priorities. As an example, despite the COVID-19
467 pandemic, the University transitioned from outsourcing its online learning initiatives to an in-
468 house undertaking, while also constructing and opening a new 16.6-million-dollar building for
469 the College of Business to provide multiple pathways for preparing students for future careers.

470 As noted in Standard 4, the University maintains the belief and expectation that all students,
471 regardless of modality, can meet the intended learning outcomes at levels of rigor as appropriate

472 for the degree. Husson University strives to support students with the Center for Student Success
473 and support structures within the Online and Distance Education program, both of which
474 continue to develop approaches that will be exceptionally responsive to unique student needs and
475 differentiate Husson University from other programs. This belief is also evidenced in the support
476 provided for faculty in all modalities for the development of curriculum, course design,
477 assessments, and application of researched instructional methodologies. An overview of how
478 Husson University's investments in infrastructure to support student success in meeting the
479 intended learning outcomes are addressed in Standards 5 (admissions, student services), 6
480 (faculty), 7 (technological resources), and 8 (assessment).

481 In Standard 7, Husson University will demonstrate a strong connection to the mission through
482 financial planning and the growth of the physical campus. This is highlighted by the 2021
483 completion of the 16.6 million-dollar Harold Alfond Hall for the College of Business. Husson
484 University designed and dedicated this building to the preparation of future leaders through
485 innovative undergraduate and graduate programs. This building project was initiated in 2017
486 when the Harold Alfond Foundation, after a thorough evaluation of Husson University's mission
487 and vision, committed to contributing one dollar for each two dollars Husson University raised to
488 up to a maximum contribution of \$4 million from the Alfond Foundation, the largest gift in the
489 Husson University's history. Husson University exceeded the eight million dollar threshold to
490 merit the Alfond donation by December 31, 2019, and the building was constructed in time for
491 the faculty and students to utilize in the fall of 2021. This building's primary purpose is to
492 support student learning, and it was constructed without incurring any new debt by Husson
493 University.

494 Curriculum development at Husson University is derived from the mission. Each curriculum
495 prepares students for professional careers in *current and emerging fields within the context of an*
496 *education informed by the sciences and humanities*. This will be addressed further in Standard 4
497 and Standard 8 and is exemplified by each of the accredited programs at Husson University
498 ([HERE](#)). In addition to NECHE, Husson University has eight specialized accreditors that
499 approve curricula for professional programs such as Business, Occupational Therapy, Physical
500 Therapy, Pharmacy, Counseling, Education, and Nursing. Each program demonstrates alignment
501 between the programmatic mission and Husson University's Mission/vision statements as part of
502 the accreditation process. All of Husson's programs are supported by the University's strong
503 General Education program ([HERE](#)). Programs without specialized external accrediting bodies
504 also demonstrate alignment to the mission through an annual and multiyear review led by the
505 dean of the corresponding college (this process is explained further in Standard 8).

506
507 As will be explored further in Standards 5 and 7, one of the many paths Husson University
508 provides for student development is through athletics. Husson has had a long and rich history of
509 success in athletics, attracting student-athletes from Maine, across the country, and around the
510 world. Since 2013, Husson athletes have made 40 national tournament appearances and won 49

511 conference championships, while developing tangible skills for the workplace. Husson’s student-
512 athletes have maintained a departmental GPA of 3.0 or higher for over a decade. In 2013-2014,
513 the number of students engaging in intercollegiate athletics was 353 students. This number has
514 increased by approximately 50% over the past ten years, with the 2021-2022 count of student-
515 athletes reaching 517 following a pre-pandemic high point of 537.

516 Husson maintains deliberate efforts to keep its tuition affordable, providing access to a wide
517 range of potential applicants. This may be evidenced by the considerable number of Pell-eligible
518 and first-generation students who have selected Husson as their university; these unique
519 populations are discussed in greater detail in Standard 5 and Standard 8. Husson University also
520 provides an outreach program for Maine high school students through a free Early College
521 Access Program, ECAP ([HERE](#)).

522 **Appraisal**

523 The Board of Trustees has demonstrated effectiveness in reviewing and approving the mission,
524 vision, and guiding principles as indicated in Article 1 of the bylaws as seen most recently in
525 January of 2022, with formal revision and approval occurring in April of 2022 ([HERE](#)).

526 The Husson University Mission and Vision have been appraised by multiple external
527 stakeholders as part of the grant-awarding process, and Husson has provided consistent support
528 for our experientially-focused instruction. The incorporation of community partners who
529 recognize and support the Husson mission is amply demonstrated by the School of Nursing’s
530 three state-of-the-art simulation labs, funded, in part, by generous donations and grants from the
531 Stephen and Tabitha King Foundation ([HERE](#)) and the Hearst Foundation in 2014 ([HERE](#)) and
532 2019 ([HERE](#)); by the School of Pharmacy’s simulation lab which has been supported by gifts
533 from Hannaford Brothers Inc. ([HERE](#)); and by the College of Business VR/XR Center ([HERE](#))
534 supported in part by grants from the Harold Alfond Foundation ([HERE](#)) and donations from the
535 community of interest ([HERE](#)).

536 Husson University continues to demonstrate alignment with scholarship, research, and
537 academics through the completion of the renovated science laboratories ([HERE](#)) including
538 1,500 square feet of renovations to a Microbiology lab (meeting Biosafety Level 2
539 criteria), upgraded spaces for Anatomy and Physiology, and General Chemistry classes, and
540 updated equipment for Advanced Chemistry. These enhanced interprofessional spaces support
541 the preparation of students for current STEM careers while supporting faculty scholarship.
542 These investments, in addition to the Marshall Road Resource facility, firmly establish Husson
543 University’s dedication to student success, demonstrating a shared understanding of the mission
544 and vision with the community of interest, and solidifying Husson University’s commitment to
545 Maine.

546 As noted in Standard 8, Husson University in part fulfills the mission by the impact of alumni on
547 the Maine workforce. The 2021 Alumni Survey indicated that 74% of our recent alumni gained

548 employment in Maine. Husson alumni also persist with Maine employment, as supported by the
549 Maine Department of Labor, which indicates that 66% of Husson University's baccalaureate
550 alumni remain employed within the state of Maine for two years post-graduation ([HERE](#)).

551 The success of Husson's advancement and alumni relations efforts is an indirect appraisal of the
552 internal and external community's support of the mission. Husson is building a culture of
553 philanthropy, both externally and internally. As will be explored further in Standard 7, Husson
554 invested in a significant expansion of its advancement and development efforts over the last 10
555 years and completed its first comprehensive campaign in 2019. With an original goal of \$21
556 million, the University raised \$37,988,400 from 5746 donors.

557 The Mission and Vision drive the University's Strategic Plan (please see Standard 2). Based on
558 the Board of Trustees' continual review of the vision, mission, and strategic plan an office of
559 Diversity, Equity, and Inclusion was established to help advance *a diverse, global perspective*.
560 Husson University successfully hired a Diversity, Equity, and Inclusion officer during the
561 spring of 2021 to help with these initiatives and further Husson University's ability to address
562 all aspects of the mission.

563 Alignment to the mission is also seen in scholarship, research, and public service by both faculty
564 and students. Examples include faculty and students from Physical Therapy and Counseling
565 providing services at the Soaring Eagle Pro-Bono clinic ([HERE](#)); the securing of NIH and FDA
566 grants by the School of Pharmacy faculty ([HERE](#)); the publications in areas of content by
567 faculty and their students ([HERE](#)); the faculty and students who are shaping the future of
568 education with their professional peers within the School of Education Advisory Board ([HERE](#)),
569 and outreach and support to community partners through the student-run One Circle Agency,
570 ([HERE](#)) which provides students with the opportunity to create marketing plans for real clients.

571 Husson University has historically served Maine students, with a five-year 70.3% average of
572 entering first-year students from Maine. Husson University is the most affordable private
573 university with NECHE accreditation and was recognized as the 51st top performer among
574 nationally classified institutions for social mobility by US News (2021). Husson attracts
575 economically diverse students as seen in the 2019-2020 IPEDS data which shows 48% of
576 students as Pell-grant recipients. In addition, in the fall of 2019, 28% of the entering students
577 were of first-generation status (these student populations are discussed in greater detail in
578 Standard 5 and Standard 8). Husson has strategically prioritized expanding into new markets,
579 which is especially important given the declining demographic in Maine and other New England
580 states.

581

582 Projection

583 While the mission continues to resonate with the community, and the Board of Trustees regularly
584 reviews the mission (the Board provided reaffirmation in 2022), Husson University aspires for its

585 mission to meet the fluid needs of our constituents in future years. As such, by the fall of 2024,
586 the President will establish a mission committee comprised of stakeholders of administration,
587 community members, staff, and faculty to ensure:

- 588 • The mission and vision continue to position Husson University and Husson Alumni
589 for success given market, technological, global/demographic changes
- 590 • Evaluate the alignment between the Husson University Brand and the Husson
591 University Mission

592 This committee will help ensure Husson University's mission and vision statements anticipate
593 emerging global demands while promoting the character and humility that are the hallmark of
594 Husson University's success.

596

597 Standard 2 – Planning and Evaluation

598

599 Introduction (2.1–2.2)

600

601 Supported by careful financial stewardship, and given Husson’s strong dependence on tuition
602 revenue and its professional academic portfolio, the university maintains multiple strategic
603 planning processes, such as financial planning, enrollment planning, facility planning, and
604 Information Technology planning, all of which are guided by the overarching University
605 Strategic Plan. This overarching University Strategic Plan *Soar to new heights A strategic course
606 for Husson's future* ([HERE](#)) has four pillars, which are 1) achieving academic excellence, 2)
607 enhancing the student experience 3) strengthening University resources, 4) Expanding
608 community impact.

609 As a private nonprofit in rural Maine, the University needs to remain responsive to the shifting
610 landscape of higher education and the declining demographics of Husson’s primary market. The
611 strategic plan reflects Husson University's mission to prepare students for future careers. As
612 explored in Standard 5 and 8, Husson serves a large portion of Maine students and students who
613 are Pell-eligible. Husson University strategically maintains a financial model of affordable,
614 value-added education to serve this community and to deliver opportunities for professional
615 growth and social mobility as indicated in the mission and with strategic planning. As seen in the
616 *Shaping our Future Strategy Implementation Matrix* ([HERE](#)) fiscal impact indicators on the
617 budget are provided for initiatives to help guide the connection between resource allocation and
618 prioritization of efforts.

619 Updated in 2020 by stakeholders and approved by the Board of Trustees, Husson University’s
620 *Shaping our Future* strategic plan is a continuous working document that encapsulates the
621 University’s efforts in strategic planning and is used as guidance by all levels for
622 operational/planning cycles. Institutional research supports planning and evaluation through the
623 systematic gathering of data to inform key benchmarks of the strategic plan ([HERE](#)), including a
624 comprehensive benchmark report to the Board of Trustees. The efforts of strategic planning at
625 all levels of the community have resulted in coherent operational responsiveness, reflecting a
626 collaborative undertaking for long-term sustainability.

627 Sustained strategic planning can be evidenced by Board Retreat minutes for 2016 and 2019
628 reflecting strategic planning sessions spanning facilitated by a consultant from Starboard
629 Leadership Consulting ([HERE](#)). These sessions show the University’s systematic and sustained
630 efforts in strategic planning, and the dedication to utilizing appropriate outside guidance, such as
631 that found in Starboard Leadership Consulting.

632

633 The results of careful strategic planning and execution are demonstrated by the commitment to
634 an expanding physical presence, which is supported by the Master Plan for physical facilities
635 ([HERE](#)). The resulting expansions over the past ten years include the newly constructed
636 Wellness Center and labratopry space (\$4.0M), Darling Learning Center (12.1M), a renovated
637 maintenance facility (\$1M) three new apartment-style townhouses (\$6.5M), and Harold Alford
638 Hall (\$16.6 M), in addition to the purchase of the Marshall Road Research Facility (\$2M) and
639 upgraded athletic turf fields (\$2M).

640 The University is also committed to a comprehensive enrollment growth strategy that prioritizes
641 new online markets to offset the demographic decline in its primary market of Maine and
642 Northern New England in alignment with the Husson mission and brand.

643 **Planning (2.3 – 2.4)**

644 **Description**

645

646 Each of the four pillars of Husson’s strategic plan ([HERE](#)) is addressed on an annual basis by
647 their respective operational units as coordinated through the Senior Cabinet and led by the
648 President. Accordingly, delivering academic excellence is primarily addressed by the Senior
649 Vice President for Academic Affairs and Provost, Deans, faculty, and academic administrative
650 staff. The Vice President of Finance and Administration, the Vice President of Enrollment
651 Management, and the Vice President for Advancement address outcomes associated with
652 strengthening university resources. The Dean of Student Life, the Athletic Director, and other
653 cabinet members are responsible for the remaining two pillars of Enriching Community
654 Engagement and Integrating Student Life.

655 From the four pillars, the University developed an implementation matrix ([HERE](#)) that more
656 clearly defines each of the pillars and establishes strategic actions. The pillar of “Delivering
657 Educational Excellence” is more fully described as follows:

658 *Husson seeks to offer academic programs that are challenging and distinctive, with*
659 *the capacity to create and support transformative experiences for all students.*
660 *Husson focuses on delivering educational excellence in programs that prepare*
661 *students for professional careers in current and emerging fields. Vital to advancing*
662 *this commitment is the recruitment and support of faculty scholars who aspire to*
663 *be leaders both in the art of teaching and in their disciplinary field expertise. To*
664 *ensure that Husson delivers educational excellence, all programs will be subject to*
665 *assessment and review to ensure continuous improvement and implementation of*
666 *new and innovative programs. These actions will ensure that programs retain their*
667 *relevance and adapt to new and changing environments in the professional world.*

668

669 Within that pillar are eight strategic actions assigning the Senior Vice President for Academic
670 Affairs and Provost the leadership role along with targeted dates for accomplishment and
671 potential fiscal impact. Graduation and retention rates, degrees awarded, graduate and
672 undergraduate enrollment, and staffing data are among the data collected annually to promote
673 planning and implement effectiveness measures for the University.

674 A similar structure is established for the second pillar of “Strengthening University Resources.”
675 This second pillar is more fully described:

676 *The capacity to “shape our future” is heavily dependent upon the quality of the*
677 *University’s infrastructure and the ways that Husson maximizes its assets,*
678 *resources, and personnel. The University will continue to review, develop, and*
679 *implement policies and procedures that support efficient and responsible*
680 *decision-making. As well, the University will design and initiate opportunities to*
681 *garner the resources necessary to support its aspirational goals.*

682 This pillar has 18 strategic actions ranging from enrollment management to retention to
683 budgeting. IPEDS data, student financial information, endowments, assets, and student loan
684 information are collected annually to promote planning and to implement effective measures for
685 the University.

686 The third pillar, “Enriching Community Engagement,” is described as follows:

687 *Recognizing that no institution is separate from its community, Husson seeks to*
688 *engage its community through various educational and cultural initiatives. Husson*
689 *will develop and execute programs that support the communities that the University*
690 *serves, including southern and northern Maine regions, thus instilling an*
691 *awareness of the positive influence Husson and its faculty, staff, and students have*
692 *in these communities.*

693

694 This pillar reflects the external outreach of the University and as such involves a variety of
695 stakeholders including the Board of Trustees, all members of the Senior Cabinet, as well as the
696 Executive Director of Marketing. Data collected annually to promote planning and implement
697 effectiveness measures for the University include information regarding community events and
698 alumni giving rates.

699 The final pillar, “Integrating Student Life,” is more inward-focused, yet it reflects the importance
700 of Husson’s student-centered approach.

701 *Husson’s learning community represents a unique blend of residential and*
702 *commuting student populations. Recognizing the opportunities of these often*
703 *divergent, but similar populations, Husson seeks to create a robust, holistic*

704 *relationship between these two student groups and engage students with faculty in*
705 *ways that significantly enhance student learning. Husson’s core priority of*
706 *“Transforming Student Lives – Advancing Student Success” allows the University*
707 *to engage students in ways that reflect experiential learning and its importance in*
708 *preparing professionals for the 21st Century by enhancing their skills, becoming*
709 *exposed to the diversity that exists in all communities, and gaining an*
710 *understanding of the intricacies of the ever-changing, more globally-infused*
711 *landscape. The University will continue its commitment to link resources across*
712 *boundaries in order to create the transformative experiences that are so important*
713 *to preparing future professionals.*

714
715 This pillar provides indicators related to the collection of campus housing occupancy, the
716 number of students on athletic teams, minority enrollment, the number of student activities and
717 clubs, and other measures collected annually to promote planning and implement effective
718 measures for the University.

719 **Appraisal**

720 Husson University has a wealth of experience in bringing long-term strategic initiatives to
721 completion and in using external consultants to guide and inform decisions. As an example,
722 evidence of this effectiveness is clearly seen in Auxiliary Services under the second pillar. As a
723 steward of institutional resources, Auxiliary Services engages with external consultants
724 specializing in the review of facilities operations, maintenance, and capital advancement. For
725 example, the construction, planning and benchmarking firm, Sightlines ([HERE](#)), evaluates
726 campus facilities and produces an annual report for the University detailing recommendations for
727 advancements in operations, capital, and maintenance. Additionally, the firm analyzes overall
728 facilities operations against peer groups to provide confirmation of the institution’s overall
729 direction and successful approach to facilities management. Auxiliary Services uses Sightlines’
730 recommendations to implement operational efficiencies and to propose capital planning
731 initiatives. Prioritized capital improvements are then absorbed into the Capital Projections Plan
732 ([HERE](#)) in line with the University’s higher-order strategic initiatives. For instance, the FY2019
733 analysis performed by Sightlines proposed that at least \$1M be allocated in capital funding to
734 facilitate Science Lab Renovations in FY2021. Given the enrollment demands for the science
735 and health degrees, the trustees voted to double the commitment to the renovation project to
736 \$2M, which included attention to deferred maintenance. The renovated lab space will support
737 academic growth and opportunities in career preparation. External assessments coupled with
738 Auxiliary Services’ expertise have advanced the University’s infrastructure via the execution of
739 147 capital projects allocating more than \$41 million toward deferred maintenance, space
740 renewal, and new facilities.

741 To support the planning of all academic programs, the office of the Provost utilizes external
742 entities such as Eduventures (sample report [HERE](#)) and the Maine Department of Labor to help

743 inform current and proposed academic programs. These external perspectives allow Husson to
744 consistently evaluate its current academic portfolio, identify areas for growth opportunities, and
745 appropriately allocate resources.

746 The online program was also a strategic initiative that helped alleviate the need for the Northern
747 and Southern Maine campus satellite locations. For decades, Husson University maintained its
748 Bangor campus in Central Maine as well as locations in Northern Maine (Caribou and Presque
749 Isle) and Southern Maine (Portland and Westbrook). Over ten years ago, the University rented an
750 office and a classroom at the Northern Maine Community College, which was the only public-
751 private collaboration of its type in the state. Nine years ago, the University purchased a facility in
752 Westbrook, Maine, to provide a more enhanced presence in the Southern Maine market. The
753 emergence of online learning resulted in a shift in those markets. At the same time, technology
754 has become more accessible to potential students. Husson students sought the online learning
755 environment to help balance work, life, and family. Seeing this shift and recognizing that
756 students demonstrated a preference for the online environment, the University sold the
757 Westbrook property in a strong real estate market, which exceeded Husson's initial and
758 renovation investments, and terminated the lease in Northern Maine.

759 The quality, integrity, and effectiveness of Husson's academic programs are examined in-depth
760 in Standards 4 and 8. All programs with required specialty accreditation have gained and
761 successfully maintained accreditation status from the appropriate entity. Husson programs
762 currently carry specialty accreditation with ACPE, ACOTE, CAPTE, ABPTRFE, CACREP,
763 CCNE, IACBE, and the Maine Department of Education ([HERE](#)). At the time of the last
764 NECHE self-study, Husson University had candidacy status for ACPE and earned accreditation
765 in 2014 and did not have any CACREP status prior to earning a full eight-year accreditation in
766 2015.

767 The University has achieved many of the objectives noted in the Implementation Matrix. For
768 example, Standard 6 will show that the University has advanced in strategic objective 1.2 under-
769 delivering educational excellence. That strategic objective relates to supporting faculty in
770 research and achieving best practices in advising and teaching.

771 There are clear examples of vertically aligned strategic planning between sub-organizations and
772 the University's strategic plan. Two examples are found in the Facilities Capital Projection
773 document ([HERE](#)) and the Department of Information Technology's strategic plan ([HERE](#)).
774 Achievement of these long-term strategic initiatives is due in part to the University's timely
775 response to unprecedented challenges. In March of 2020, the COVID-19 pandemic caused
776 upheaval to industries and communities around the world. When evaluating the social and
777 economic disruption caused by the pandemic, the charge from the Trustees was to include
778 substantial and innovative sources of revenue in the three-year financial plan ([HERE](#)). Husson
779 understood that disturbances could be mitigated through nimble planning. In response, Husson
780 University created the Innovation Committee, a group of individuals pulled together from all

781 facets of operations to solicit, review, assess, and recommend new revenue-generating
782 opportunities and cost-containment initiatives. The Innovation Committee received 240
783 initiatives from individuals across the institution and selected a number for presentation to Senior
784 Cabinet for evaluation and subsequent implementation. These initiatives included the expansion
785 of our online portfolio, the implementation of a new E-Sports program, and the opening of a new
786 School of Innovation & Technology in the College of Business. These initiatives are key
787 components of the institution's three-year financial plan.

788 As previously noted, the University's strategic planning may be impacted by unforeseen
789 contingencies, such as the COVID-19 pandemic; however, Husson's planning allows for
790 immediate adaptations to continue toward achieving institutional goals while meeting short-term
791 needs. The University's response to COVID-19 highlights this dimension. When it was time to
792 follow the guidelines and switch to remote learning, Husson University was able to facilitate a
793 two-week transition of all face-to-face didactic courses into quality online courses with the
794 assistance, supervision, and support of the offices of Assessment and Online and Distance
795 Education. This approach allowed Husson to continue with its mission of preparing students for
796 careers. In Spring 2020, Husson University was the only Maine institution rated "High" for its
797 online learning experience, according to EDMIT as reported in the Boston Globe ([HERE](#)).

798 The engagement of the Board in providing strategic financial planning is often noted by the
799 President when he communicates in periodic town hall meetings and at monthly Faculty Forum
800 sessions. This strategic planning is also carried out through the budgeting process as noted in
801 Standard 7. The Finance office works diligently in tandem with managers of high-priority
802 strategic initiatives to develop multiyear financial models. In these collaborations, the Finance
803 office assists in the development, assessment, and review of the initiatives' financial impact for
804 four subsequent years past the current year. In line with the annual financial planning process,
805 these models are consolidated into the University's universal multiyear financial plan. This
806 deliverable is critical in determining the University's path for the proper allocation of resources
807 as determined by Senior Leadership and approved by the Board.

808 The multiyear plan integrates each branch of the University's operations and transforms their
809 qualitative actions into a monetary road map. For instance, Enrollment Management engages
810 with external consultants (EAB) to determine a plethora of scenarios including the entering
811 class's projected discount rate. This rate, as agreed upon by Enrollment Management, is then
812 utilized in the multiyear plan to determine financial aid in the future years as the rate follows a
813 specific class. With this comprehensive perspective regarding the impact of diverse variables,
814 Senior Leadership and the Board are favorably positioned to evaluate scenarios and their
815 economic consequences.

816

817 Evaluation (2.6-2.8)

818 Description

819 Given its size and location, Husson University's main focus through its entrepreneurial
820 positioning is to remain committed to its mission and to remain responsive to market shifts
821 particularly caused by Maine's demographic profile. Achieving strategic objectives as
822 established in planning with stakeholders has always been the primary means by which the
823 University measures its success and sustainability and is also seen in Husson's retention and
824 licensure rates, feedback from community stakeholders, and alumni employment in the state of
825 Maine.

826 With the four pillars established through planning, the University took the next step of gathering
827 data more specifically aligned with the strategic plan and uses this data to inform future actions.
828 While this data indicates that the pillars are being evaluated on several criteria, the hallmark of
829 achieving strategic objectives remains the overall critical evaluative mode of Husson University
830 and its stakeholders. The University's response to COVID-19 and the shift to in-house online
831 learning as envisioned by strategic action 1.8 under "Delivering Academic Excellence"
832 demonstrates this notion.

833 Over the past 10 years, the University has focused on assessing its academic programming. As
834 will be explained in Standard 8, all academic programs have developed assessment plans and
835 curricular maps and engage in accreditation reviews or annual and cyclical evaluations. Each
836 program must demonstrate the use of student assessment data for curricular enhancement and
837 alumni success. Husson University has also modified the required syllabi template to address
838 intended student learning outcomes and highlight alignment between outcomes and assessments,
839 which is in alignment with the teaching emphases as seen in standard 6. The online learning
840 efforts have benefited from the emphasis on external trainings such as Quality Matters, and
841 curricular/assessment mapping techniques derived from experience with specialty accreditations.

842 Appraisal

843

844 Considering the unique circumstances caused by COVID-19, the Trustees along with the
845 President and Senior Staff members addressed the second pillar of "Strengthening University
846 Resources," by providing a three-year financial plan that prioritizes these innovative initiatives.
847 Key decisions were made in conjunction with the University regarding Payroll Protection Plan
848 (PPP) loans. Also, the University community members suggested initiatives to generate a long-
849 term revenue stream for the University. Among those initiatives included a Title III grant
850 application, the initiation of an E-sports program, the science lab expansion, and expanding the
851 online portfolio. The result of this planning was the retention of all Husson employees amidst a
852 challenging environment.

853 The University recognizes that data-driven decision-making with regard to aligned strategic
854 planning is an area for improvement. The data could be used to further refine strategic action
855 plans and provide a more tightly aligned vertical integration from mission and vision, through
856 strategic objectives, and through meaningful participation by employees at all levels and across
857 units of operation.

858 **Projection**

- 859 • The Board will continue to monitor innovation initiatives and the financial plan and its
860 components quarterly. In the summer 2024 meeting, the Board of Trustees will establish
861 a committee to review the four pillars of the strategic plan for enhanced vertical
862 alignment.

882 Standard 3 – Organization and Governance

883

884 Introduction (3.1-3.2)

885

886 The organization and governance of Husson University reflect its shared commitment to the
887 mission of inspiring and preparing students for professional careers. The self-study process
888 revealed the transparent approach of Husson University in achieving the institution’s educational
889 endeavors at each level of decision-making.

890 Husson is a legally constituted degree-granting institution recognized by the State of Maine
891 ([HERE](#)). The University is governed by a board of trustees who develop, approve, review, and
892 maintain bylaws ([HERE](#)). Board membership is outlined in a later section but includes one *ex-*
893 *officio* member (a ranked member of the University faculty who is elected by the faculty for a
894 two-year term) as well as the president of the student body. Trustees contribute their expertise
895 regularly to the campus and represent the Husson academic programs as community leaders in
896 such areas as healthcare and business.

897 As outlined in the bylaws, the Board of Trustees appoints the President who serves as the Chief
898 Executive Officer of the University. With the affirmation of the board, the President appoints the
899 Provost who serves as the Chief Academic Officer. The President also appoints additional
900 administrators with board approval, who, along with the Provost, sit on the Senior Cabinet. The
901 Provost is the chair of the Deans Council, which maintains oversight of curriculum, instruction,
902 and academic planning and policy at the University. The Deans Council comprises the associate
903 and assistant provosts, the deans of the colleges, the Dean of Student Success, and DEI Officer.
904 Husson University organizes academic units into colleges, schools, departments, and programs.
905 Assistant deans and academic chairs/ directors under the deans support schools and departments
906 and administer each of the colleges. Full-time faculty members serve as Academic
907 chairs/directors and have administrative responsibilities within their respective academic units.
908 The Dean appoints each academic chair/ director upon the recommendations of the department
909 members. Chairs and directors have contractual terms for their appointments.

910 This organizational structure allows for communication and decision-making, enabling the
911 University to achieve the mission's outcomes. To support decision-making within this structure,
912 the University maintains and updates governance bylaws. These documents provide clarity to
913 administration, faculty, and staff regarding their roles and responsibilities within the governance
914 structure of the University. Additionally, individual job descriptions and contracts elucidate
915 responsibilities and reporting lines consistent with the organizational charts at the University.
916 The Board meets with the President and Senior Cabinet quarterly, and the executive committee
917 meets every other month. The Senior Cabinet meets bi-weekly and schedules regular meetings

918 with their respective reports. Deans meet with faculty and staff in their respective colleges. The
919 faculty are organized as a forum and meet monthly in a general assembly format to address
920 issues of relevance in accordance with the Faculty Handbook.

921 **Governing Board (3.3-3.11)**

922 **Description**

923 The Board of Trustees serves as the governing body for Husson University. The bylaws were
924 most recently updated as of April 2022. The officers of the University are the Chair, Vice-Chair,
925 Clerk of the Board of Trustees, President, Treasurer, Controller, and Vice Presidents who serve
926 as the senior staff. The President may appoint subordinate officers of the corporation with the
927 approval of the board. The Board of Trustees is linked to other bodies within the institution as
928 one of its members is elected by the faculty and another of its members is the President of the
929 student government. The trustees serve for three-year terms and organize themselves in the
930 following committees: Academic Affairs, Student Affairs, Advancement, Investment, Audit,
931 Finance, Governance, and Buildings and Grounds.

932 The board's basic structure is outlined in the published bylaws and described by Article II,
933 Section 5 of the Board of Trustees Bylaws which also provides membership criteria. Under
934 Article III, Section 1 of the Bylaws, the Chair and Vice-Chair of the University are elected by the
935 Board of Trustees to serve for a one-year term. Their responsibility is to oversee the Board of
936 Trustees, which provides guidance and final approval for administrative undertakings. Articles
937 IV-VIII of the Board of Trustees Bylaws discusses the powers of senior leaders and trustees.
938 Article IX of the Board of Trustees Bylaws states there will be at least four meetings per year.
939 Article XI of the Board of Trustees Bylaws indicates what each committee is required to do to
940 assist with the operations, strategy, and decision-making for the University.

941 The Governance Committee of the Board of Trustees is responsible for identifying new trustees.
942 The Committee looks for potential trustees who have demonstrated problem-solving capabilities,
943 an ability to work in a team environment, and would be able to dedicate the necessary time to be
944 an active Board member. In addition, the Committee considers how their addition would change
945 the board's composition based on factors such as the number of alumni, the number of members
946 with backgrounds in healthcare or business, or other areas of expertise and association with
947 Husson. One of the strengths of the Board over time has been the tenure of Board
948 members. While there are many advantages to this continuity of leadership, the Board
949 recognized several years ago a need for new trustees with different perspectives. Over the past 10
950 years, the Governance Committee has made this a priority and, as a result, Husson's Board now
951 has a fuller representation and increased diversity (The Board has shifted from 26% female or
952 minority representation to 38%). This shift has changed the representation on the board to align
953 with the composition of Husson's student body more closely. In addition, 78% of the board are
954 Husson alumni, and 90% have expertise in professions relating to Husson degree offerings.

955 Board members are sufficiently independent, as can be affirmed by the annual gathering of
956 information that might reveal any conflicts of interest. The most recent annual disclosure forms
957 revealed that 25 of 29 trustees are free of conflict (a copy of the annual disclosure form may be
958 found [HERE](#)). This exceeds the NECHE expectation of greater than two-thirds for board
959 independence. The composition of the current board reflects the University’s mission of
960 preparing students for professions, particularly in the business and healthcare fields. All board
961 members understand their fiduciary obligations to the institution and receive training. The Board
962 has adopted an orientation process where new board members meet with the Senior Cabinet and
963 other campus stakeholders ([HERE](#)). This is also a chance for the new board members to deepen
964 their understanding of Husson’s mission, how that mission is carried out, and how they can
965 assure mission success from their board position. All board members understand their fiduciary
966 obligations to the institution and receive the training and support needed to carry out their
967 responsibilities. External perspectives are provided via the consultation by Starboard Leadership
968 Consulting as seen in strategic planning. The Chair and Vice-Chair oversee the Board of
969 Trustees, which provides guidance and final approval for major administrative undertakings.

970 The University’s President and Chief Executive Officer, Dr. Robert Clark, has full-time
971 responsibilities in administration and fundraising. He reports directly to the trustees. Trustees
972 provide an annual review of his performance. Reporting directly to the President and serving as
973 members of the senior cabinet are the Senior Vice President for Academic Affairs and Provost,
974 Vice President for Finance and Administration, Vice President of Advancement, Director of
975 Athletics, Chief Human Resources Officer, Vice President of Enrollment Management, and the
976 Dean of Student Life. These individuals oversee operations and provide the leadership to present
977 initiatives to the Board of Trustees and carry them out once approved.

978 The board’s involvement in the creation of the mission reflects that the trustees have a clear
979 understanding of the institution’s distinctive mission. When first presented to the board, the
980 mission began with “prepares students for professional careers...” The board added the word
981 “inspires” at the beginning of the mission. The words “Character” and “Humility” which appear
982 on the University’s shield also hold meaning for the board in relation to Husson’s education.
983 With this sense of mission, the board engages in ongoing efforts to review institutional policies,
984 monitor fiscal conditions, and approve new initiatives. In particular, as noted in Standard 2 on
985 planning, the board was a driving force behind a three-year financial plan to address the
986 challenges presented by COVID-19. The Board has actively encouraged and supported revenue-
987 generating initiatives for long-term sustainability.

988 The committees of the board provide a systematic review of essential functions through its
989 committee structure. For example, the Audit Committee assures that external audits are ordered
990 and performed on the institution and review any management notes derived from the audit.

991 Since the pandemic, some Board activities have moved from in-person to a Zoom format. This
992 was a seamless transition due, in large part, to the fact that most Board members have worked

993 with one another extensively considering that the range of service is 1-35 years, with an average
994 of 15 years of service. This virtual format also provided some advantages, such as increasing
995 attendance at the Board meetings. Attendance is not a significant challenge for the Husson Board
996 as by Board policy members are required to attend three of the four Board meetings each year,
997 but each Zoom meeting during the pandemic had close to full attendance. Prior to this utilization
998 of Zoom, the Board struggled to find a solution that provided remote attendees with a productive
999 experience. Zoom has presented an environment where remote attendees are integrated into the
1000 meetings in a much more productive way than prior video and audio attempts.

1001 **Appraisal**

1002 The 2020 review of the Faculty Handbook exemplifies the efficacy of the board's engagement
1003 with key university policies. The Academic Committee of the Board of Trustees requested a
1004 thorough review of the Faculty Handbook. The Provost and faculty trustee member presented the
1005 handbook over four quarterly meetings with the Academic Committee which provided comments
1006 and feedback. Among the more involved discussions with the trustees related to the role of
1007 advising and the amount of time that faculty are required to spend in office hours in that regard.
1008 The examination also resulted in a change in the handbook that clarified that the Board of
1009 Trustees does not review amendments to the appendices of the handbook, which serves as the
1010 Bylaws of the Faculty Forum. This action helped affirm the governance structure and delineated
1011 the role of the Board of Trustees and Faculty. This engagement of the board provided an
1012 opportunity for enhanced understanding by the Board of the faculty's role, particularly regarding
1013 their workload and advising commitments.

1014 Regarding operations, the University recognizes the importance of managing risk. An example of
1015 enterprise risk management includes the creation of a Compliance Governance Council in 2019.
1016 Membership on this Council included representation from academics, admissions, financial aid,
1017 finance, human resources, information technology (IT), operations, and safety and security. The
1018 Council analyzed the institution, assigning areas to responsible parties to identify issues within
1019 those areas as priorities for the evaluation of risk. A survey was drafted to be sent out to all
1020 university constituents to further prioritize areas of risk. However, the focus on COVID-19
1021 caused the overall enterprise risk analysis specifically related to compliance to be put on hold.

1022 Information Technology (IT) has successfully addressed risks to the network from external
1023 hacking and malware. University employees undergo regular training to that end. Additionally,
1024 IT established dual authentication protocols consistent with the expectations of our insurance
1025 carrier. Risk to the institution is also communicated financially through financial planning and
1026 good stewardship of resources and are further described in Standard 7.

1027

1028 **Internal Governance (3.12-3.19)**

1029 **Description**

1030 The President and Chief Executive Officer, Dr. Robert Clark, assumed his role on January 1,
1031 2010. He is empowered through the Trustee's bylaws, specifically under Article V (Powers and
1032 Duties of the President of the University). Given his long-standing tenure, his duties are to
1033 ensure that the University is continually achieving its mission through ongoing strategic planning
1034 and evaluation, faculty/staff recruitment, and professional development and to maintain
1035 communication with the internal and external community of interest (including alumni and
1036 current students). Dr. Clark also has regularly scheduled meetings with the Provost and
1037 operations staff. He also regularly updates the community in Town Meetings on important
1038 matters, particularly the financial standing of the University (HERE).

1039 As noted above, the Senior Vice President for Academic Affairs and Provost is the Chief
1040 Academic Officer. Dr. Lynne Coy-Ogan assumed her role in 2009, overseeing the academic
1041 community and coordinating with the Deans through Council meetings which are held biweekly.
1042 She also schedules biweekly meetings with the Deans and members of the administrative team to
1043 provide ongoing guidance and priorities and receive important updates. Additionally, she meets
1044 with the Faculty Forum President and Executive Board monthly to review concerns and establish
1045 agenda item priorities.

1046 As also noted above and in Standard 6, the faculty organize themselves through the Faculty
1047 Forum. This is a plenary body that meets monthly. The Forum is organized into a variety of
1048 committees such as the Undergraduate and Graduate Academic Affairs Committees,
1049 Compensation Committee, Development and Evaluation Committee, Handbook Committee,
1050 General Education Committee, Graduate Council, and Honorary Degree Committee. Cross-
1051 collaboration and shared governance occur through the plenary sessions of the Forum. Both the
1052 President and Senior Vice President for Academic Affairs and Provost make initial presentations
1053 at those meetings. Deans and other administrators are invited to attend as non-voting members.
1054 In addition, several institutional committees involve faculty, including the Promotion
1055 Committee, Research Committee, Scholarship Committee, and Review Committee.

1056 Students are represented by Student Government. The President of Student Government is an ex
1057 officio member of the Board of Trustees and votes on all Board matters except those dealing
1058 with personnel or legal issues. Also, students are nominated and serve on several Faculty Forum
1059 committees and can participate as voting members. Finally, there is also student representation
1060 on the Security and Emergency Planning Committee, which is not organized under the Faculty
1061 Forum and has representation from faculty, staff, and students.

1062 Since the last self-study, the University has consolidated its governance structure from five
1063 schools and colleges to three colleges, with the inclusion of NESCom (which as outlined in the
1064 2018 NECHE Interim Report has completed the integration process initiated in 2013 after having
1065 been a wholly-owned subsidiary of the University) under the College of Business. This change

1066 reflected shifts in academic programming. Given that the new School of Innovation and
1067 Technology ([HERE](#)) was physically incorporated into the Harold Alfond Hall, the technological
1068 aspects associated with NESCom have merged nicely within the College of Business.

1069 The digital transformation is driven by rapid evolutions in technology that has caused the
1070 University to analyze its internal governance structure relating to information systems and
1071 control. Under the direction of the Associate Vice President of Information Technology, the
1072 University has established clear policies for such areas as Social Media compliance. Each of
1073 these policies has corresponding enforcement considerations. Additionally, in 2018, the
1074 University hired an external consultant (Campus Works) to examine IT governance, while also
1075 considering the replacement of the University’s aging Student Information System (SIS), CAMS
1076 enterprises. As a result, the AVP of IT assembled a group of CAMS users to examine IT
1077 governance as it relates to the Student Life Cycle (from recruitment through to alumni services).
1078 In the spring of 2022, after a thorough RFP process, the University contracted with Berry Dunn,
1079 a leading accounting and technology firm, to further examine IT governance and guide the
1080 eventual replacement or upgrading of the SIS system. The IT department has achieved its
1081 benchmarks demonstrating operational excellence in its support and service to the members of
1082 the Husson community, and ITs efforts in preventing data breaches and in technological
1083 compliance have significantly reduced institutional risk.

1084 [Appraisal](#)

1085 The University’s response to COVID-19 is demonstrative of the internal organizational structure
1086 of the University and its highly collaborative community. In response to COVID-19, the
1087 University established task forces led by Senior Cabinet members. The Academic, Finance,
1088 Health and Safety, Community Engagement, and Athletic Task Forces addressed their respective
1089 areas with members from various stakeholder departments participating on each committee. This
1090 temporary governance structure facilitated key decisions regarding the COVID-19 response and
1091 engaged appropriate stakeholders in efforts to identify and secure federal financial loan
1092 programs.

1093 Due to a collaborative and well-structured response to COVID-19, the University gained
1094 cooperation and support from the administration, faculty, staff, and students. The COVID-19
1095 Response is also addressed in standards 4, 5, 6, 8, and 9 but it should be noted in this standard
1096 that the collaborative governance systems utilized in this transitional period were successful as
1097 noted by sustained retention rates and by the recognition that in Spring 2020, Husson University
1098 was the only Maine institution rated “High” for its online learning experience, according to
1099 EDMIT as reported in the Boston Globe ([HERE](#)).

1100 Given that the shifts in organizational structures of the Colleges within the University occurred
1101 during the COVID-19 pandemic, certain academic programs needed to respond to changes in
1102 pedagogical structure by reference to accreditation standards rather than guidance from the
1103 University. This was particularly the case for the health programs needing to meet experiential

1104 and clinical requirements. As the University was making decisions for the University in its
1105 entirety, these departments needed to consider the best and often unique courses of action for
1106 their programs of study. Given the University's academic emphasis is on experiential learning,
1107 the academic units responded well to the challenges and found ways to deliver the needed
1108 experimental and clinical opportunities through simulation, increased social distancing,
1109 alternative placements, and alternate schedules.

1110 Overall, the University's internal governance allows for broad-based participation and
1111 contributions to governance. One measure noted in Standard 4, is the Student Government's
1112 efforts to comment on the General Education requirement of Community Service. Another
1113 ongoing effort is the request by Student Government that a seat be reserved on Faculty Forum
1114 committees for a representative from Student Government rather than by general nomination by
1115 the committees with affirmation by the Deans. Such a measure would solidify student
1116 participation on Faculty Forum committees and enhance student contributions to decision-
1117 making at the University.

1118 Projection

- 1119 • In the spring of 2023, the Senior Cabinet will reconvene its COVID-19 response
1120 committee. As also noted in Standard 7, this committee will be tasked with evaluating the
1121 University's response to COVID-19, and strategies for addressing any lingering impacts
1122 of the COVID-19 crisis. The committee's report will also reflect on lessons learned with
1123 respect to the governance structure and provide action statements for improvement.

1124

- 1) Enrollments by Location and Modalities include degree-seeking and non-degree-seeking students.
- 2) Enrollment counts are unduplicated within locations and modalities but may be duplicated across locations and modalities.
- 3) Enrollments are calculated from fall through summer (fall, spring, & summer).
- 3) "As of 2022/FA" values are consistent with previous "as of" data as well as in comparison to reported Board Report values for Fall Census Enrollments.

Standard 4 – The Academic Program

Introduction (4.1-4.3)

Husson is classified by the Carnegie Classification as a Doctoral/Professional University and provides two first professional doctoral degrees, eight masters degrees, four post-masters certifications, and 31 bachelor degrees. Standard 5 will detail the roughly 3000 students who engage in Husson academic programs. Consistent with the University’s mission, academic programs at Husson emphasize lifelong learning that prepares students for careers in professional fields. Because of the University’s size and its collegial environment, the disciplines and colleges collaborate to create pathways of learning and success from General Education through to graduate degrees and, in many instances, professional licensure. The curricula for each of Husson’s degree programs prioritize opportunities to connect theory to real life professional practice. The variety of experiential learning opportunities are exemplified in simulated crime scene investigations, healthcare simulation with the use of high-fidelity manikins, internships, clinical placements, and a pro bono healthcare clinic. These are all examples that are hallmarks of the Husson experience. These diverse experiential activities allow students to connect theory to practice. All educational pathways provide for professional-level outcomes and lead to degrees in a recognized field of study. Creating these pathways generates collaboration among the academic departments and demonstrates innovative academic programs such as those seen within the School of Technology and Innovation, housed in the new College of Business building.

All of the collegiate-level programming at Husson University provides a curriculum that leads to a degree in a recognized field. Since the interim report, the University has decided to focus its attention on Bachelor’s, Master’s, and First Professional Doctoral degrees. The one remaining Associates Degree is that of Liberal Studies for purposes for provisioning a pathway for degree completion for students who have earned credits at Husson University. All of the learning goals (intended knowledge and skills obtained at the conclusion of each academic program) and requirements are published in the catalog ([HERE](#)). Additionally, specific student learning outcomes for each course are published on the Eagle Connect site ([HERE](#)), each syllabus ([HERE](#)), and the suggested course sequence, is published in the curriculum sheet ([HERE](#)). All degrees and programs are characterized by appropriate breadth, depth, continuity, sequential progression, and synthesis of learning as approved by the faculty with university support.

Husson University is committed to ongoing academic innovation as evidenced by the brand new IEX center with state-of-the-art technology, the acquisition of an offsite space for a pro bono health care clinic, a new Wellness center with expanded healthcare simulation capabilities and recently renovated science labs. Additionally, Husson is exploring the use of badging and

1163 certificates as another means of a curricular pathway. In 2021, Husson University established a
1164 Badge Committee, which is made up of stakeholder faculty and staff. The committee meets
1165 every two weeks to consider badging possibilities generated by the committee chair, committee
1166 members, and other community stakeholders.

1167 The COVID-19 response highlights the support and collaboration found at Husson University to
1168 ensure quality educational opportunities. During the rapid shift to online instruction, the
1169 University provided each instructor with a coach from the Office of Assessment or the Division
1170 of Online and Distance Education to support faculty and to help with online technologies for
1171 student engagement, digital classroom management, and content delivery. The faculty also
1172 benefited from the sustained professional development opportunities through the ACUE program
1173 and Quality Matters training as discussed in Standard 6. Additional selective professional
1174 development workshops were offered as a sequence for building a course with fidelity. These
1175 collective experiences helped Husson University and, specifically, the Husson faculty, to
1176 maintain a quality educational program even in the midst of a pandemic. This provided the
1177 foundation to transition to in-house efforts of online learning after separating from the previous
1178 contract with The Learning House. Husson continues to assess lessons learned from the COVID-
1179 19 pandemic to remain agile and flexible in response to the shifting higher education
1180 environment.

1181 **Assuring Academic Quality (4.5-4.12)**

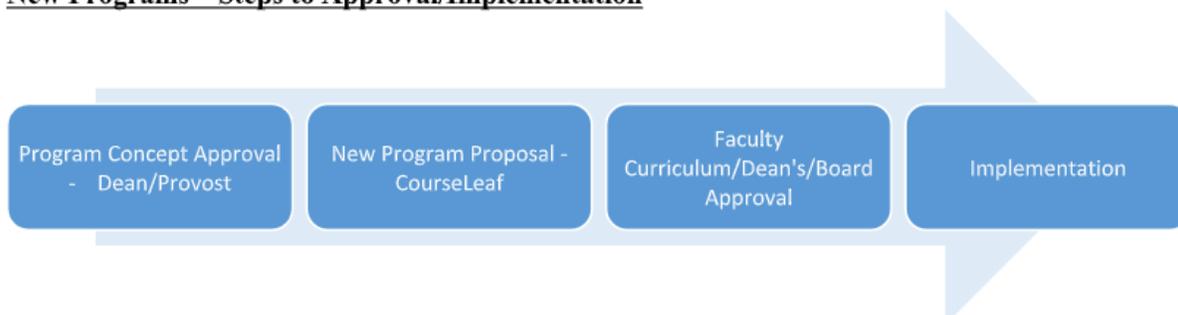

1182 **Description**

1183 At an organizational level, the University demonstrates oversight of curriculum matters through
1184 the program and course approval process. Figure 4.1 below shows the general process for course
1185 and program approval. Additional supports such as that found in the Division of Online and
1186 Distance Education and the Office of Assessment are not included. The approval process
1187 includes a conceptual development phase with the dean and appropriate faculty for alignment to
1188 mission followed by market research to determine feasibility. A program moving forward from
1189 this phase will develop necessary material, such as a curriculum sheet, curricular mapping,
1190 modality information, marketing information, and general education alignment to move forward
1191 in the University approval process that is outlined below. The full process is found [HERE](#).

1192 Figure 4.1: General course and program approval process (*for new initiatives with budgetary
1193 implications)

1194

New Programs – Steps to Approval/Implementation

1195

1196 Each academic college approves proposed programs or courses based on the specific areas of
1197 content and the guidance of market/community needs. The Faculty Forum committees
1198 (Undergraduate Academic Affairs Committee [UAAC] and Graduate Academic Affairs
1199 Committee [GAAC]) ensure that each program or course has appropriate learning outcomes,
1200 assessments, and content appropriate for the level of study. The General Education program
1201 verifies that proposed programs will meet the expected General Education outcomes, and that
1202 specific proposed courses align with intended General Education learning outcomes and are
1203 available to the campus community. Each of these committees has faculty representatives from
1204 the relevant disciplines, and each has student representation. The Deans Council, consisting of
1205 the academic deans and members of the Provost’s office, provides approval ensuring that courses
1206 or programs will be appropriately resourced and viable under the mission. Finally, all new
1207 programs require approval from the Board of Trustees, further ensuring mission alignment and
1208 resource allocation.

1209 All curricular matters move through “CourseLeaf” which is a workflow software platform
1210 utilized by the University. CourseLeaf also provides the central infrastructure that connects
1211 curricular changes to the annual publication of the catalog, ensuring that approved changes are
1212 appropriately included in each catalog publication.

1213 Policy and program reviews are initiated by departments, the Registrar’s Office, or the Deans
1214 Council. Similar to the process noted above, these are first approved at the originating level and
1215 then entered into CourseLeaf to go through the approval process noted above. A review of
1216 academic programs for ongoing relevancy and sustainability occurs at the Deans Council. As
1217 indicated, faculty have a substantive voice in all of these academic matters. New program
1218 submissions follow the Guidelines for New Program Approvals as found on the intranet in the
1219 folder of the Office of the Provost ([HERE](#)). In addition, all programs are evaluated through
1220 market research and cost analysis by the Finance Office in conjunction with the Office of the
1221 Provost. This allows for a realistic approach that considers the goals derived from the mission
1222 accounting for available resources and utilizes multiple external perspectives such as those

1223 provided by Eduventures ([HERE](#)). As will be noted in Standard 7, the University provides a
1224 value-added education maintaining a highly competitive net tuition pricing structure.

1225 Husson University offers 12 extracurricular digital badges. Information about all current digital
1226 badging opportunities can be located on the Husson website ([HERE](#)). Current badging
1227 opportunities are communicated to students, faculty, and advisors by email, newsletters, and the
1228 webpage. Husson currently has an additional 10 badges in development, which are a mixture of
1229 extracurricular and curricular badges. These badges are related to Inter-professional Honors,
1230 Community Service, DEI, and Animal-Assisted Therapy. The Associate Director of Online and
1231 Distance Education is responsible for managing the Badge Committee, educating campus about
1232 existing badges, supporting the development of new badges, and overall badge communication
1233 and education. Badges are not equivalent to degrees and do not lead to licensure but are in
1234 alignment with the mission of preparing students for careers as badges offer students a way of
1235 showcasing their experiences and skills to potential employers.

1236 As seen in Standard 8, Husson University supports eight other accreditations, which offer
1237 evaluation of the associated academic quality. The current position within the accreditation cycle
1238 for each program is noted on the E-Series form ([HERE](#)). All programs without specialty
1239 accreditation will follow a process of annual and cyclical review as adopted by the Deans
1240 Council beginning in the fall of 2022 ([HERE](#)). While most of the programs without specialty
1241 accreditation had already been participating in ongoing reviews as seen in the E-Series form,
1242 having a planned schedule of review will allow for a more manageable workflow for faculty and
1243 administration.

1244 Standard 7 notes the sufficiency of resources to sustain and improve academic programming.
1245 Indirect measures of sufficient resourcing and meeting the mission of being prepared for entry
1246 into a career may be seen by the employment numbers for alumni who remain in the State of
1247 Maine ([HERE](#)) and licensure rates of alumni who have some form of certification examination
1248 post-graduation as seen in Data First form 8.3. This adequacy of resources is also evidenced in
1249 Husson's demonstrated ability to support students from lower socioeconomic backgrounds in
1250 achieving professional careers as seen by Husson's national ranking as the 51st top performer in
1251 social mobility by US News (2021) ([HERE](#)). An additional example may be seen in the
1252 resources provided to students, such as in the Ronan Center for Financial Technology ([Here](#))
1253 which is equipped with two LED stock ticker displays that show current market activity in real
1254 time, and interactive touchscreens that provide students with the ability to research stock, mutual
1255 fund and bond investment performances, or with NESCom's mobile television remote truck,
1256 which is the most technologically advanced mobile unit in the U.S. owned by a college or
1257 university ([HERE](#)) and allows Husson students to experience control room settings for broadcast
1258 television shows like "The Nite Show with Danny Cashman" and the Maine High School
1259 Basketball Tournament.

1260 The narrative from Standard 8 demonstrates that it is through continuous assessment that the
1261 community reflects on the outcomes of its efforts to assure such quality and to engage in overall
1262 planning. This planning involves curricular and assessment support from the Office of
1263 Assessment and results in “coherent design and appropriate breadth, depth, continuity, sequential
1264 progression, and synthesis of learning.” These processes will be noted more specifically within
1265 the narrative on this standard, in particular in the General Education section.

1266 Appraisal

1267

1268 The increased use of the LMS Canvas for both online and face-to-face programming provides an
1269 opportunity to ensure academic quality by providing a streamlined communication method of
1270 academic policies and course outcomes through the shared syllabus template ([HERE](#)). A review
1271 of course outcomes is required as part of the syllabi process by UAAC/GAAC. The use of
1272 Canvas as a shared electronic syllabus also has allowed for the centralization of Student Policies
1273 & Support Resources on the “left side navigation” panel of each Canvas shell. These include
1274 links for taking attendance and policies related to absences for religious considerations, Student
1275 Support Services resources, netiquette resources, and library hours. This enhancement allows the
1276 University to update policies and supportive information in one location to ensure all students
1277 have equitable access to accurate information. This digital syllabus format also allows deans or
1278 program chairs to review all syllabi before the semester starts to make sure instructors list the
1279 correct outcomes and course materials.

1280 Curricular effectiveness has been consistently evaluated by CACREP, IACBE, ACPE, CCNE,
1281 CAPTE, ABPTRFE, ACOTE, and Maine State DOE for each associated academic program, and
1282 each follows the unique accreditation cycle and reporting requirements as appropriate for the
1283 respective accreditor ([HERE](#)). The ongoing successful accreditations are evidence of the
1284 effectiveness of the curricular evaluation, as well as the attainment of the intended learning by
1285 the students. Clinical partners also attest to the effectiveness as evidenced by feedback related to
1286 student performance. Here is a testimonial from a Physical Therapist preceptor to the Chair of
1287 the Physioal Therapy Program regarding a DPT student. *“I just wanted to let you know that both
1288 of [name]’s clinical instructors went out of their way today to tell me she is the best student we
1289 have had (Here). We’ve had some really good students over the years, but both inpatient and
1290 outpatient, [name] stood out. Well done!!!!”* These informal comments and reflections on
1291 student performance are consistent across all disciplines.

1292 There are multiple assessment points ensuring students develop collegiate-level skills in English
1293 (including information literacy), most notably within the required General Education sequence –
1294 specifically that of EH 105 followed by an upper-level Literature course. The aggregate score in
1295 standard 4A (*Students will demonstrate essential college-level skills associated with reading
1296 comprehension, careful interpretation of texts, clear oral and written communication, and use of*

1297 *technology*) in EH 105 and upper-level Literature courses is 84%, with a lower performance
1298 noted during the heaviest COVID-19 constraints.

1299 Students must also complete a General Education approved writing-intensive course to reinforce
1300 skills in English throughout the curriculum. Approved courses are found on the General
1301 Education site ([HERE](#)) and the General Education Criteria for approval of a writing intensive
1302 course are found [HERE](#).

1303

1304 Undergraduate Degree Programs (4.13-4.15)

1305

1306 Description

1307 In alignment with the mission, all curricula prepare students for careers within the context of the
1308 sciences and humanities. It is within the context of the sciences and humanities that students are
1309 introduced to the broad areas of human knowledge; it is within their disciplines of choice that
1310 they achieve the level of knowledge to pursue a selected career path. This rationale is noted in
1311 the catalog, in curriculum sheets published through the Registrar's Office, and in official
1312 publications that reference the catalog.

1313 Each new program is reviewed by the General Education Committee to assure compliance with
1314 the expectations of the University, while departmental reviews assure appropriate sequence,
1315 scope, and depth of content areas. All students have opportunities for choice within their
1316 academic plan, though the amount of choice may be more limited based on the specific
1317 disciplines of study.

1318 All undergraduate degree programs must meet the requirements of general education. Courses
1319 that are utilized in general education are broken into 5 major categories including Core Skills (10
1320 credits), Natural & Social Science (12 credits), Humanities (9 credits), and Prospective (9
1321 credits) for a minimum of 40 credits. These diverse groupings of course categories ensure
1322 students have a broad foundation in the skills and knowledge necessary to be educated global
1323 citizens. The General Education course requirements are found on the website ([HERE](#)) and in the
1324 University's course catalog ([HERE](#)).

1325 General Education also requires a demonstration of scientific and quantitative reasoning, critical
1326 thinking, and communication skills, information literacy as well as the elements of the NECHE
1327 4.15 (i.e., "*understanding of scientific, historical, and social phenomena, and a knowledge and
1328 appreciation of the aesthetic and ethical dimensions of humankind*"). General Education
1329 Outcomes (updated and adopted in 2016) are seen [HERE](#) and the alignment between the General
1330 Education Outcomes and NECHE 4.15 may be seen [HERE](#).

1331 **Appraisal**

1332 As noted, since the Interim Report, the University no longer admits students to Associate level
1333 programs and currently retains only one such program to allow for the attainment of a degree for
1334 students who are unable to complete their bachelor's degree program for a variety of reasons.
1335 This decision allows the University to focus its energies on certificates and alternative
1336 credentials to create multiple pathways for students, as well as credentialing to allow for
1337 increased access to academic content for potential students and increased value for currently
1338 enrolled students. Husson now offers two Doctoral degrees, eight Master's degrees with ten
1339 different concentrations, four Post-Masters certifications, 31 Bachelors degrees with 23 different
1340 concentrations, and one Associates degree.

1341 The number of certificates earned at Husson has grown from 44 in 2016/2017 to 123 in
1342 2020/2021. The chart also indicates whether those certificates were awarded to degree-seeking
1343 students. The vast majority of certificates are earned by students also earning a Husson degree,
1344 as evidenced by the 90% of certificates in 2020-2021 going to students also earning Husson
1345 degrees. Earning certificates is consistent with the University's mission of preparing
1346 professionals for their future careers as they may more clearly depict key skills or knowledge
1347 associated with professional goals.

1348 **General Education (4.16 – 4.18)**

1349 **Description**

1350 It is through the General Education requirements and structure that the University is able to meet
1351 the mission of providing education within the context of the sciences and humanities and
1352 preparing future alumni for lifelong learning. Since the interim report, the General Education
1353 Committee has been able to fulfill the expectations of having an assessment for the learning
1354 objectives as established by the Committee.

1355 The current General Education Curriculum was implemented in 2016, and at this time the
1356 General Education Committee has approved new curriculum sheets reflecting these outcomes for
1357 all academic programs at Husson University. All approved courses are found at the General
1358 Education site ([HERE](#)) and the approved curriculum sheets are found on the registrar's site
1359 ([HERE](#)). The 2016 General Education revision was supported by a \$142,000 grant from the
1360 Davis Foundation awarded in 2015. This grant supported faculty development, consultants,
1361 conference attendance, and technological resources for faculty and students ([HERE](#)).

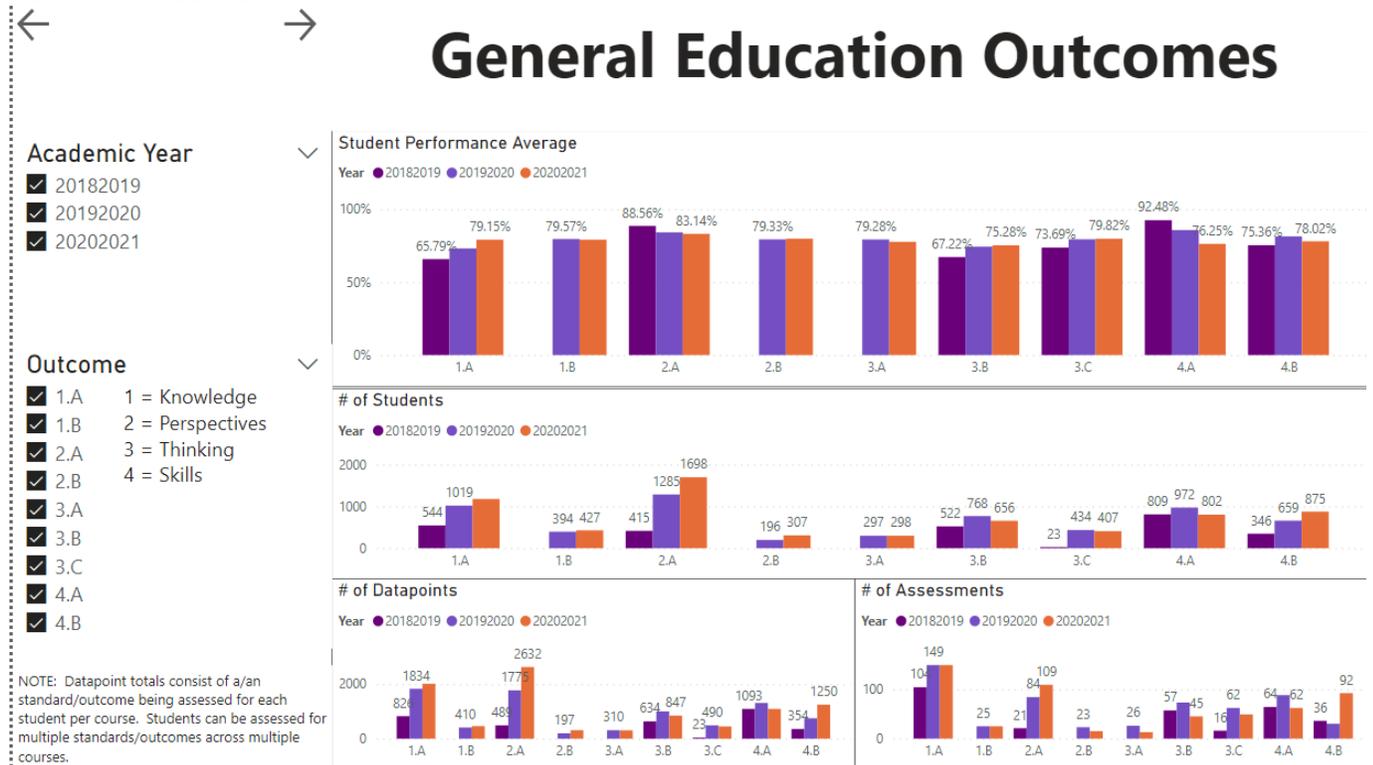

1362 Each General Education course also addresses specific student learning outcomes found
1363 [HERE](#) and can be broken into the four broader categories of knowledge, perspective, thinking,
1364 and skills. Faculty submit an online application ([HERE](#)) in order to have a course approved by
1365 the General Education Committee (a standing faculty committee as listed by the Faculty Forum).
1366 The application process involves a review of the alignment of the course to the General
1367 Education intended outcome, the development of an assessment plan to utilize valid and reliable

1368 assessments, the sharing of the assessment data with the General Education Committee for
1369 ongoing programmatic evaluation and improvements, and final chair approval.

1370 **Appraisal**

1371 Husson University students are achieving the intended General Education outcomes. In the 2020-
1372 2021 academic year, the General Education committee gathered data from 2197 unique students
1373 and 559 assessment opportunities through the ExamSoft platform. Figure 4.x provides the 2018-
1374 2021 General Education data. The earlier years had lower levels of data compliance as most
1375 assessments were in the piloting phase. The 2020-2021 year will serve as the base year for future
1376 comparison. Data compliance (receiving all appropriate data) is a challenge, but for the past three
1377 years Husson has been able to gather assessment data about individual performances towards
1378 specific General Education from more than 1500 students each year. The Office of Assessment
1379 continues to develop a process of harvesting categorical data from the embedded Canvas
1380 assessment platform to reduce any barriers the ExamSoft platform may present. Faculty may
1381 now work with the Office of Assessment to develop an approved rubric that will fill the General
1382 Education or accreditation need and work with the Canvas data extraction process.

1383 In the fall of 2022, the General Education Committee conducted a preliminary evaluation of the
1384 General Education assessment data (Figure 4.1), which indicated that Husson students had
1385 reached their intended General Education outcomes. As seen in the data, aggregate student
1386 scores for the intended outcomes are at an acceptable level (aggregate scores above 73% or a
1387 grade of C) in the most recent academic year. The committee also took the step of requiring all
1388 performance assessments to utilize the same five-point scale to make future comparisons easier.
1389 The university will gather three years of data before making significant changes. Additionally,
1390 now that the General Education Committee has approved submissions for each academic
1391 program and every course within the General Education offering, the committee will consider a
1392 systematic review of approved courses to ensure the ongoing alignment to the intended course
1393 outcomes.

1395

1396 In the fall of 2022, the General Education Committee also resolved concerns regarding the
 1397 Community Service requirement. Since the advent of this General Education component in 1998,
 1398 the Community Service requirement had been satisfied by students providing evidence of 40
 1399 hours of service. This standard was inconsistently applied in various departments and modalities.
 1400 To address these inconsistencies in application and to provide meaningful, measurable, and
 1401 manageable outcomes for students, in the 2022 fall semester, the General Education Committee
 1402 changed the community service requirement to a one-to-five-hour requirement and a 250 to 500-
 1403 word reflection on how Community Service is linked to their professional and career
 1404 development. These changes align the outcome directly with the university’s mission.

1405 **The Major or Concentration (4.19)**

1406 **Description**

1407 Through its majors and concentrations, the University advances its mission to prepare students
 1408 for careers. Academic programs provide opportunities for growth and development in the
 1409 designated area of study ensuring students achieve the articulated learning objectives resulting in
 1410 a mastery of the knowledge, information resources, methods, skills, and theories pertinent to
 1411 particular areas of inquiry. As our mission indicates, our programs strive to prepare students for
 1412 careers by providing rigorous undergraduate and graduate curricula that are relevant and promote
 1413 critical thinking skills, self-confidence, and strong communication skills. Through experiential
 1414 learning, Husson merges didactic learning in the classroom with undertakings that lead to

1415 effective practice in the chosen disciplines, while also preparing students for life-long
1416 contributions that demonstrate the ability to interrelate knowledge across disciplines.

1417 The Psychology degree at Husson University will be used as an example of the major or
1418 concentration for this section. The Psychology degree is delivered in both a face-to-face and in
1419 the fully online modality.

1420 The Psychology program faculty developed a curricular map and program assessments that serve
1421 all modalities. The online division also developed a standard course template to ensure
1422 comparable experiences for students, an appropriate scope and sequence for content delivery,
1423 and ensure students have opportunities to develop, rehearse, and apply the intended skills and
1424 knowledge. These curricular and assessment activities involved all the full-time Psychology
1425 faculty and were supervised by the Dean of the College of Science and Humanities and were
1426 supported by the Office of Assessment to help ensure that all outcomes were meaningful and
1427 measurable and to ensure that data for programmatic review could be collected. The Instructional
1428 Designers from the Division of Online and Distance Education also worked with the Psychology
1429 faculty as content experts to translate the face-to-face experiences into online methodologies that
1430 would support distance learners. The updated mapping is found [HERE](#). This mapping is shared
1431 by both modalities of the Psychology program, including the broad program outcomes of the
1432 intended APA goals and sub-goals, and the associated course-level student learning outcomes.
1433 This level of clarity provides clear expectations for cognitive rigor in content and skill
1434 proficiency for psychology students. The mapping also ensures equitable curricular expectations
1435 regardless of modality. In this example, both modalities share the same summative course
1436 assessments and the same capstone assessment, thus providing a comprehensive assessment of
1437 the intended program outcomes, a vehicle for programmatic and curricular evaluation, and an
1438 opportunity to compare the efficacy of each modality in terms of student learning.

1439 **Appraisal**

1440 Husson University has dedicated systems in place to ensure the students attain the intended skill
1441 and knowledge within each discipline, as evidenced by the Psychology example.

1442 The success of majors or concentrations includes both indirect measures from all programs, such
1443 as performance on licensure exams as seen in Data First for 8.3, alumni employment in Maine
1444 ([HERE](#)) and direct measures of intended student learning and skill as discussed in Standard 8
1445 and experiential opportunities.

1446 **Graduate Degree Programs (4.20 – 4.28)**

1447 **Description**

1448 Underlying the mission of professional career readiness, the University has designed all graduate
1449 degree programs to achieve mastery in complex professional areas, and it is through career
1450 preparation that they achieve an appropriate rationale, focus, and readiness as evidenced by the

1451 learning outcomes. Out of the nine graduate degree programs at Husson University, seven have
 1452 achieved specialized accreditation (a listing of Husson’s accreditors is found [HERE](#)). Husson
 1453 notes that each has engaged in successful accreditation cycles within the past ten years, including
 1454 the earning of initial full accreditation status for the School of Pharmacy under ACPE in 2014,
 1455 and Graduate Counseling programs under CACREP in 2016.

1456 *Table 4.2: Graduate Accreditations*

Program	Last Accreditation Self-Study	Outcome	Next Accreditation Self-Study
ACPE: Pharmacy	2020 (Postponed from 2019 – COVID-19)	4-year Approval (with one year counting from the COVID-19 Delay)	2023
CCNE: Nursing	2017	10-year approval	2027
ACOTE: Occupational Therapy	2016	10-year approval	2026
CACREP: Clinical Mental Health Counseling and School Counseling	2022	TBA	2026
CAPTE: Physical Therapy	2016	10-year approval	2026
IACBE: Business	2022	7-year approval	2029
ABPTRFE: Physical Therapy Residency	2020	5-Year approval	2025

1457 The Faculty Handbook provides for a differentiated teaching workload for graduate faculty at 18
 1458 credits, acknowledging their additional scholarly expectations as compared to undergraduate
 1459 faculty who are assigned 24 credits annually. Specialized accreditation organizations further
 1460 define this distinction. Standard 6 notes more fully the ongoing distinctions in scholarship among
 1461 the various disciplines and how clinical expectations drive further consideration for the scholarly
 1462 workload.

1463 The graduate disciplines coordinate with graduate admissions to admit students who are qualified
 1464 for graduate-level study. The catalog provides information in relation to the necessary standards
 1465 and expectations for ongoing participation. Each program has extensive curricular mapping and
 1466 has requirements for assessing student learning outcomes for programmatic improvement (please

1467 see the E-Series sheet [HERE](#)). In addition, each program monitors progression and graduation
1468 rates, professional licensure, and attempts to gather alumni data such as employment and
1469 advancement, though tracking alumni data has proven a challenge for multiple programs (please
1470 see Data First Form 8.3).

1471 Interprofessional Education (IPE) is also a key component of the College of Health and
1472 Pharmacy. In 2019, Husson dedicated a 0.5 FTE to coordinate interprofessional education and
1473 oversee the University IPE committee. This committee has been instrumental in fostering
1474 communications to help allocate resources and to provide shared IPE opportunities for students.
1475 Husson University has also entered into an agreement with the Maine Area Health Education
1476 Center to provide additional opportunities for Husson graduate healthcare students to engage in
1477 interprofessional experiences within rural Maine settings.

1478 As noted in the introduction, faculty and staff collaborate to provide many pathways for students
1479 to the professions. This collaboration has led to a number of undergraduate feeder programs for
1480 graduate education. Because of its career focus, the University places undergraduate students on
1481 track to graduate degree completion as early as possible. Should these undergraduate students
1482 determine to no longer pursue graduate education, the University can assist them in their
1483 placement into an appropriate undergraduate degree completion path. In addition, the University
1484 offers courses with listings at the undergraduate and graduate levels of study. While
1485 undergraduates and graduate students can enroll in the same course, the faculty members are
1486 responsible for providing additional learning outcomes and requirements for graduate students
1487 on the 4+1 track to complete their BS and MBA or MJC. Such an approach has a long history at
1488 Husson, particularly in the Business and Criminal Justice programs. In the junior year of study,
1489 students with a minimum GPA of 3.0 can take graduate courses to fulfill the requirements of the
1490 five-year program.

1491 The graduate admissions office admits students into the graduate programs of study. Because of
1492 the unique requirements, graduate admissions coordinate closely with the Departments. The
1493 University recently re-examined its approach to the Graduate Nursing program, which is offered
1494 online and currently serves out-of-state students. Because of the regulatory requirements
1495 concerning licensure expectations, graduate admissions now provide specific consumer
1496 protection notifications for those students.

1497 **Appraisal**

1498 Graduate programs have eight different specialized accreditors that assure the achievement and
1499 aspirations for Graduate programs. Specialized accreditation provides the assurances of
1500 appropriate levels of rigor for cognitive and skill expectations, academic content, faculty
1501 credentialing, and resourcing.

1502 Graduate programs are sufficiently resourced and have properly credentialed faculty. Two
1503 graduate programs, MBA and Criminal Justice, are housed in the newly constructed Harold

1504 Alford Hall that opened in the fall of 2021. Resources include a forensics lab, which provides for
1505 the hands-on experiential learning component (this lab was previously housed in the University’s
1506 off-campus facility at Marshall Road). The health professionals have access to the Dahl Gross
1507 Anatomy Laboratory which is one of two higher education cadaver labs in the State of Maine,
1508 three high-fidelity simulation centers, and a Pharmacy simulation center. Of all baccalaureate or
1509 higher degrees awarded in the spring of 2021, 79% came from programs requiring internships,
1510 clinical placements, practicums, fieldwork, or other required experiential components.

1511 One area that generates ongoing discussion with respect to graduate faculty resources is advising.
1512 To create a seamless pathway for students to their graduate studies, the University enrolls
1513 students in many early assurance programs, such as a 5-year MBA, a 3+3 DPT program, a 2+3
1514 OT program, and a 2+4 PharmD program. Graduate faculty who advise undergraduate students
1515 may start building relationships with their future students earlier and help shape professional
1516 identity at earlier stages of education, which will benefit the student as they progress within the
1517 program. Examples of undergraduates engaging in professional identity development are seen in
1518 PT where all undergraduate students have opportunities to engage in the Pro bono clinic, Boxing
1519 club, the Organization of Physical Therapy Students and observe labs and classes within the
1520 professional phase.

1521 **Transfer Credit (4.29 – 4.32)**

1522 **Description**

1523 To encourage degree completion, Husson University actively engages in the acceptance of
1524 transfer credits. The Transfer Coordinator assures the integrity in the award of credit and
1525 conducts a timely review of transcripts considering efforts to be responsive to student inquiries.

1526 Policies and procedures are consistently applied regarding all awarding of transfer credits.
1527 Students must earn a minimum grade of “C” from an appropriately accredited program to receive
1528 the transfer of credits. Consistency in the acceptance of transfer credits is achieved through the
1529 efforts of the Transfer Coordinator who has aligned Husson University courses with those of
1530 specific institutions such as Maine Community Colleges ([HERE](#)). The University also accepts
1531 AP credits ([HERE](#)), CLEP ([HERE](#)), and DANTES Subject Standardized Tests (DSSTs)
1532 Equivalencies ([HERE](#)). In 2021, Husson University simplified the policies on accepting AP
1533 credit, so all Husson academic programs shared the same expectations of required scores and
1534 credit awards.

1535 Given the recent decision to expand and bring online offerings in-house, the Registrar and the
1536 Division of Online and Distance Education meet frequently to discuss Standard Operating
1537 Procedures and to address matters of consistency and efficiency when responding to transfer
1538 inquiries from online students.

1539 **Appraisal**

1540

1541 Husson has a well-established process for accepting credit. Between fall 2013 and spring 2022,
1542 Husson accepted 146,984 credits in transfer from 6,978 students.

1543 The efforts of the Transfer Credit Coordinator have increased the integrity and consistency of
1544 awarding transfer credits. Particularly helpful is the development of an online tool, updated
1545 annually, that allows for a comparison of courses from Maine Community Colleges to Husson
1546 University ([HERE](#)), as it makes all of the pre-agreed transfer expectations known to prospective
1547 students or other higher education professionals. This allows for integrity and transparency in
1548 awarding of transfer of credit as most frequent transfer requests have pre-authorized and
1549 published equivalencies.

1550 At the graduate level, the University has a general approach whereby about one-fourth of the
1551 total credits earned can be transferred from other institutions. Yet, each department has adopted
1552 transfer credit policies to reflect its own programmatic needs.

1553 Integrity in the Award of Academic Credit (4.33 – 4.49)

1554 Description

1555 All degrees at Husson University are appropriately named. The registrar assigns Classification of
1556 Instructional Programs (CIP) Codes accordingly. Each program has the appropriate credits in
1557 accordance with their classification as associate's, baccalaureate, master's, and first professional
1558 doctoral degrees.

1559 The Senior Vice President for Academic Affairs and Provost, as supported by the Deans Council
1560 and Office of the Registrar, maintains ongoing authority over the curriculum. The Senior Vice
1561 President for Academic Affairs and Provost and deans are responsible for the selection, approval,
1562 professional development, and evaluation of faculty. The disciplines are responsible for course
1563 content and delivery. The disciplines, with the Office of Assessment, are responsible for
1564 curriculum mapping, learning outcomes, and assessment. No credit toward graduation is awarded
1565 for precollegiate-level or remedial work. Within this framework of oversight, students complete
1566 at least one-fourth of their undergraduate credits at Husson.

1567 The standards of satisfactory academic progress are aligned across the institution, including in
1568 financial aid and athletics. The advent of alternative terms for the Division of Online and
1569 Distance Education has resulted in satisfactory academic progress being determined as of every
1570 three terms, which represents half of the number of terms offered in any given year.

1571 The University has a clearly defined policy regarding the violation of standards of academic
1572 integrity published in the catalog ([HERE](#)), allowing for formal and informal resolution of such
1573 matters. The standards of any given profession are maintained at the departmental level.

1574 With the in-house conversion of online programming, the University embarked systematically on
1575 the development and recognition of badges. To provide a systematic approach to badging, the

1576 division of online and distance learning developed an application and process for approval,
1577 which includes the requirements, outcomes, and assessment of badging criteria. Once approved,
1578 all digital badging is completed through Credly. This process provides a central location of
1579 reference for students to track earned badges.

1580 **Appraisal**

1581 As assured through the Office of the Registrar, the University functions with expectations of
1582 integrity and in accordance with all policies and expectations. Matters of transfer credit, course
1583 substitutions, and completion of degree requirements are subject to standard processes and
1584 approvals. The foundation is a close collaboration with staff members of the Office of the
1585 Registrar, faculty, deans, and the Office of the Provost.

1586 The badging system has allowed the University to reinforce specific learning outcomes that
1587 otherwise would be lost within the curriculum. For example, the library has advanced a series of
1588 badges relating to research and information literacy. Any of these badges could be assigned by
1589 faculty based on the course's needs or the program of study.

1590

1591 **Projection**

1592

- 1593 • During the spring of 2024, the Senior Vice President for Academic Affairs and Provost
1594 and Deans Council will establish a committee of representatives in the various colleges to
1595 examine the extent to which assessment data is being provided to the General Education
1596 Committee and the ability of the Committee to take meaningful action steps. This
1597 committee will provide recommendations to the Deans Council as to the nature of
1598 organizational support needed to increase the response rate for providing General
1599 Education data. This committee will also examine the number of courses and sections
1600 within required areas of General Education to ensure a level of flexibility in meeting the
1601 General Education outcomes. It will honor the principle of shared governance,
1602 recognizing the limits of the authority of the General Education Committee while tapping
1603 into the collaborative spirit of the educational community, honoring the necessary
1604 limitations of the authority of the Gen Ed Committee, and supporting it in carrying out its
1605 important mission.
- 1606 • The University aspires to create pathways from undergraduate to graduate education
1607 resulting in levels of mastery and lifelong preparation for meaningful contributions to the
1608 professions. As such, improvements could be made in facilitating existing pathways and
1609 fostering new pathways.
1610 Accordingly, during the summer of 2023, the Assistant Provost of Assessment will
1611 collaborate with the directors of graduate programs to examine additional pathways. The
1612 committee will also include advising and members of the Science Department and the

1613 Dean of Student Success to examine this projection from the perspective of academic
1614 programming.
1615

**Standard 4: The Academic Program
(Summary - Degree-Seeking Enrollment and Degrees)**

Fall Enrollment by location and modality, as of Census Date for 2022/FA

Degree Level/ Location & Modality	Associate's	Bachelor's	Master's	Clinical doctorates (PharmD and DPT)	Total Degree-Seeking
Main Campus FT	1	2,105	72	81	2,259
Main Campus PT	2	66	89	39	196
Other Locations FT					0
Other Locations PT			14		14
Distance education FT		138	152		290
Distance education PT		103	104		207
Unduplicated Total Headcount	3	2,412	431	120	2,966
Unduplicated FT Headcount	1	2,243	224	81	2,549
Unduplicated PT Headcount	2	169	207	39	417
Total FTE (see below for calculation methodology)	1.7	2,299.3	327.5	100.5	2,729.0
Degrees Awarded, Most Recent Year	1	576	292	67	936

Explanatory notes:

- 1) Definitions of "Locations and Modalities" are defined in Data Form 3.2.
- 2) Enrollment numbers include all students in the named category.
- 3) Each Student is recorded in only one category.
- 4) Master's degrees include Post-Master's certificates.
- 5) Total FTE Definitions:
 - Full Time Undergraduates are student enrolled for 12 credit hours or more, except for Online students who must be enrolled in 4 credits or more during the 7-week T1 Online term to be considered full-time. Online term T2 students are not included in this calculation.
 - Full Time Graduates are students enrolled for 9 credit hours or more, except for Online students who must be enrolled in 3 credits or more during the 7-week T1 Online term to be considered full-time. MSOT students who must be enrolled in 15 credits or more to be considered full-time.
 - Full time Doctoral Students are students enrolled for 15 credits or more.
 - Undergraduate FTE = Number of Full-Time Students + 1/3 (Number of Part-Time Students)
 - Graduate FTE = Number of Full-Time Studnets + 1/2 (Number of Part-Time Students)
- 6) "Degrees Awarded" values are based on August/December/May graduation dates as reported by the Registrar's Office.

Standard 4: The Academic Program
(Summary - Non-degree seeking Enrollment and Awards)

Fall Enrollment by location and modality, as of Census Date for 2022/FA

Degree Level/ Location & Modality	Title IV-Eligible Certificates: Students Seeking Certificates	Non-Matriculated Students	Total Non-degree-Seeking	Total degree-seeking (from previous page)	Grand total
Main Campus FT	3		3	2,259	2,262
Main Campus PT	8	97	105	196	301
Other Locations FT			0	0	0
Other Locations PT			0	14	14
Distance education FT	4	2	6	290	296
Distance education PT	3	5	8	207	215

1616 Standard 5 - Students

1617 Introduction (5.1)

1618 Over the past decade, as Husson has continued its transition from a college to a university, the
1619 community has altered its perspective regarding its students. As a college, Husson initially saw
1620 itself as an opportunity school for those who might be considered “diamonds in the rough.”
1621 Today, the community sees itself as transforming student lives. The new marketing campaign of
1622 “Husson is How” demonstrates that attitude shift. While still holding true to its roots of
1623 providing an affordable education aimed at a career path and lifelong learning, Husson is
1624 engaged in diversifying its student body through recruitment and educational modalities. Husson
1625 has increased its support to all students and all modalities through enhanced services as seen in
1626 the Center for Student Success with an expanded footprint in the main academic building, and
1627 the Wellness Center housed in a newly constructed building centrally located on campus. The
1628 University is also working to foster a sense of belonging for all its students through its DEI
1629 initiative.

1630 Husson University currently enrolls over 3,000 graduate and undergraduate students in face-to-
1631 face and online modalities. Husson’s students come from many different socioeconomic, gender,
1632 age, geographic, and cultural backgrounds. In alignment with the mission, Husson helps
1633 transform student lives through education to prepare them for careers and to offer opportunities
1634 for social mobility.

1635 Over the past decade, Husson has experienced significant growth in its physical footprint,
1636 including increased opportunities for student athletics and the ever-growing importance of online
1637 education. Husson was established to serve the needs of the broader community and has long
1638 served the needs of diverse communities in Maine, including first-generation students, and
1639 supporting many Pell-eligible students at higher rates than our competitors. As Husson has
1640 transitioned to a professional focus as a university, administration, and faculty continue to place
1641 our emphasis on transforming students’ lives through experiential, equitable, and affordable
1642 education. Since 2013, Husson has added professional programs such as Pharmacy and Graduate
1643 Counseling, and these students have persisted and reported feeling deeply supported and a sense
1644 of belonging within the Husson community. While Pell eligible percentages have stayed the
1645 same, to meet the needs of all students in all programs, Husson has leveraged the ongoing
1646 priority of highly interactive student experiences, preparing students for perspectives that
1647 enhance not only didactic learning but emphasize soft skills necessary for the global workforce
1648 and supporting students’ confidence and independence as learners and contributors to society.
1649 These significant commitments to student engagement inside and outside the classroom and
1650 emphasis on global learning are enhanced by Husson’s emphasis on online learning. This
1651 broader reach has also brought with it opportunities to increase the diversity of our student
1652 demographics. Husson is located within a state with lower levels of racial/ethnic diversity, but
1653 high levels of cultural and socioeconomic diversity. The outreach from online learning across

1654 state boundaries is undergirded by Husson’s desire for equity in education by broadening the
 1655 target population. This broadening may be out of state, but it may also be in reaching even more
 1656 socioeconomically diverse or rural populations in Maine. Additionally, online education may
 1657 make Husson education available to students who otherwise could not attend courses on the
 1658 Bangor Campus, or at other institutions, thus providing opportunities and support for the type of
 1659 social mobility for which Husson is known. In this way, Husson demonstrates that it is living its
 1660 mission of inspiring and preparing students for professional careers in current and emerging
 1661 fields.

1662 Admissions (5.2-5.6)

1663 Description

1664 The current Vice President of Enrollment Management joined the University in June of 2021 and
 1665 oversees both Admissions and Financial Aid. The undergraduate, graduate, and international
 1666 admissions staff ensures that students admitted are within the scope of what is envisioned by the
 1667 University’s mission and purpose and engages admissions counselors within and outside of the
 1668 State of Maine. They seek students interested in pursuing a value-added education leading to
 1669 careers in the professions. Admissions and Financial Aid have a combined total of twenty
 1670 professionals (Org chart [HERE](#)) to support future and current Husson students.

1671 Student demographics

1672 Husson has many unique populations as are seen in the following tables:

1673 Degree-Seeking Student Census (Campus-Based / Online):

	2016/FA	2017/FA	2018/FA	2019/FA	2020/FA	2021/FA	2022/FA
Male	1514 / 37	1440 / 63	1380 / 65	1359 / 85	1215 / 81	1061 / 139	1022 / 108
Fulltime	1253 / 7	1219 / 21	1199 / 21	1211 / 23	1029 / 19	958 / 41	956 / 41
Part-time	261 / 30	221 / 42	181 / 44	148 / 62	186 / 62	103 / 98	66 / 67
Female	1922 / 71	1877 / 135	1927 / 147	1902 / 148	1788 / 179	1544 / 390	1442 / 144
Fulltime	1505 / 10	1474 / 33	1575 / 50	1564 / 36	1424 / 64	1388 / 120	1301 / 120
Part-time	417 / 61	403 / 102	352 / 97	338 / 112	364 / 115	156 / 270	141 / 124
Total	3436 / 108	3317 / 198	3307 / 212	3261 / 233	3003 / 260	2605 / 529	2464 / 252

1674
 1675 Husson University has had a six-year average enrollment of 3344 students per year. While there
 1676 has been a slight decline in overall enrollment since the COVID-19 pandemic, the online
 1677 population has increased from 108 in 2016 to 478 in 2022, an increase of 343%.

1679 Degree-Seeking Pell Recipients Census:

	2016/FA	2017/FA	2018/FA	2019/FA	2020/FA	2021/FA	2022/FA
Male	435	483	468	479	386	330	319

Fulltime	413	459	456	461	373	321	308
Part-time	22	24	12	18	13	9	11
Female	593	594	673	631	567	564	503
Fulltime	546	546	630	602	546	543	483
Part-time	47	48	43	29	21	21	20
Total	1028	1077	1141	1110	953	894	822

1680

1681 Husson University has consistently supported students from lower socioeconomic backgrounds.
 1682 Husson consistently has one of the highest percentages of Pell recipients among institutes of
 1683 higher education in the State of Maine and has taken deliberate steps to enhance the Center for
 1684 Student Success to help provided the necessary resources to support the unique needs of
 1685 Husson’s student body.

1686 *Degree-Seeking First-Generation Census:*

	2016/FA	2017/FA	2018/FA	2019/FA	2020/FA	2021/FA	2022/FA
Male	198	242	233	237	225	206	243
Fulltime	196	237	232	232	214	196	234
Part-time	2	5	1	5	11	10	9
Female	309	322	332	342	342	352	381
Fulltime	304	315	322	327	313	322	366
Part-time	5	7	10	15	29	30	15
Total	507	564	565	579	567	558	624

1687

1688 Husson supports a significant population of students who are first-generation students. Given the
 1689 aforementioned student population from lower socioeconomic backgrounds, Husson university
 1690 has explored gaining a TRIO grant to expand on the current support structures in place. Husson
 1691 University did apply for a TRIO Student Support Services grant in 2020 (with the assistance of
 1692 McAllister and Quinn consultants) and narrowly missed the funding mark. Husson is currently
 1693 preparing for the next TRIO application cycle.

1694 *Campus-Based Degree-Seeking Residence Status (Resident / Commuter)*

	2016/FA	2017/FA	2018/FA	2019/FA	2020/FA	2021/FA	2022/FA
Male	538 / 976	542 / 898	554 / 826	527 / 832	432 / 783	463 / 598	514 / 508
Fulltime	535 / 718	541 / 678	552 / 647	526 / 685	430 / 599	458 / 500	512 / 444
Part-time	3 / 258	1 / 220	2 / 179	1 / 147	2 / 184	5 / 98	2 / 64
Female	532 / 1390	532 / 1345	603 / 1324	638 / 1264	533 / 1255	579 / 965	642 / 800
Fulltime	529 / 976	531 / 943	603 / 972	637 / 927	525 / 899	577 / 811	637 / 664
Part-time	3 / 414	1 / 402	0 / 352	1 / 337	8 / 356	2 / 154	5 / 136
Total	1070 / 2366	1074 / 2243	1157 / 2150	1165 / 2096	965 / 2038	1042 / 1563	1156 / 1308

1695

1696 Husson continues to be primarily a “Brick and Mortar” university. The on-campus residence is
1697 currently at 100% occupancy, and significant investments have been made in the physical
1698 resources for on-campus students in both living facilities, the Wellness Center found in the
1699 middle of the campus, renovations to dining facilities, and enhancements to recreational
1700 facilities. Please see Standard 7 for more information on enhancements to physical resources on
1701 campus.

1702 *Student-Athletes:*

	AY2016- 2017	AY2017- 2018	AY2018- 2019	AY2019- 2020	AY2020- 2021	AY2021- 2022
Student Count	Male: 292 / Female: 244	Male: 317 / Female: 201	Male: 307 / Female: 223	Male: 324 / Female: 223	Male: 301 / Female: 195	Male: 316 / Female: 206
Total:	536	518	530	547	496	522

1703

1704 As will be discussed further in this chapter, student-athletes represent a significant percentage of
1705 the student body, and the athletic experience (for both athletes and fans) enhances the Husson
1706 experience, offering a focal point for identity formation and unity through common experiences,
1707 shared events, and celebrations of success.

1708 *Top 10 states for enrollment (Undergraduate and Graduate) from Fall 2021*

	ME	MA	NH	CT	VT	NY	RI	FL	NJ	MD
Online	466	4	10	4	2	4	2	6	3	8
Campus-Based	1952	198	168	89	72	44	39	25	23	9
Total	2418	202	178	93	74	48	41	31	26	17

1709

1710 Husson continues to draw heavily from Maine in both modalities, which is expected due to the
1711 solid reputation Husson has earned within this state, and based on the relationships Husson has
1712 fostered with many Maine stakeholders including employers, secondary education partners, and
1713 community leaders. Husson continues to explore out-of-state markets to further diversify the
1714 student population and expand Husson’s brand and educational opportunities into new areas.

1715

1716

1717

1718

1719 *Percent of all students by race/ethnicity:*

	Fall 2017	Fall 2018	Fall 2019	Fall 2020
Nonresident Alien	3%	2%	2%	2%
Race / Ethnicity Unknown	3%	3%	3%	3%
Two or More Races	3%	3%	4%	3%
White	84%	83%	83%	84%
Native Hawaiian or Other Pacific Islander	0%	0%	0%	0%
Hispanic	1%	1%	1%	1%
Black or African American	5%	5%	5%	5%
Asian	1%	1%	1%	2%
American Indian or Alaska Native	0%	0%	1%	1%

1720

1721 As seen in the data above, Husson supports many Maine students. This is significant as it
1722 reinforces the importance of Husson’s mission in preparing students for employment, many of
1723 whom remain in Maine to work. 71% of the alumni between 2016 and 2018 were employed in
1724 Maine by one quarter after graduation per data provided by a partnership with the Maine
1725 Department of Labor ([HERE](#)). In the most recent alumni survey (delivered to the graduating
1726 cohort of 2021) 97% of respondents seeking employment or other educational opportunities have
1727 been successful in doing so.

1728 Graduate students seeking advanced degrees in professional fields also represent an essential
1729 element of Husson’s student profile with nearly 20% of the enrollment. Husson’s graduate
1730 programs are accredited by outside bodies (see Standard 8) and are well aligned with the mission
1731 and profile of the Husson student body.

1732 The Admissions office has worked to enhance equity in the admissions process. In 2020 and
1733 2022, all personnel reviewing applications engaged in a norming exercise to ensure consistency
1734 of review of each application based on admissions requirements and expectations for specific
1735 academic programs.

1736 With the shift away from an OPM (Learning House) to an in-house oversight of online
1737 programming, the University now has two different admissions sequences. For those who attend
1738 coursework on-campus, the University engages in its traditional practice of a cycle of spring
1739 admissions and preparing students for the transition over the summer and into the fall with
1740 various orientations followed by a one-credit course (Husson Experience) in the first fall. Online
1741 students are admitted by the same admissions criteria but are not enrolled until they have been
1742 vetted for additional requirements of access to technology, internet access, and financial means
1743 to ensure students are situated for success prior to incurring student debt. Online students may
1744 enter any of the six terms of admissions (two in the fall, two in the spring, and two in the

1745 summer) due to the 7-week format of online offerings. Once the online admitted student is ready
1746 to enroll, they are registered for a 3-credit Husson Experience course that addresses specific
1747 matters for online learning success that would otherwise be covered by summer orientation
1748 programs for on-campus students when combined with the one-credit Husson experience course.

1749 Husson University also deliberately fosters opportunities for new students through corporate
1750 partnerships. These partnerships come in many forms, including cohort delivery of programs at
1751 the employer's site or online, presentations in classrooms from employers on career opportunities
1752 and recruiting of students for jobs, presentations from employers on real-life problems for
1753 students to assist in solving, and discounts for corporate partner employees. Examples of current
1754 partnerships include LL Bean, Bangor Savings Bank, Jackson Laboratory, and Maine Employers'
1755 Mutual Insurance Company (MEMIC).

1756 **Appraisal**

1757 Husson University has invested in the admissions process over the past five years in anticipation
1758 of the declining traditional-aged applicant pool within the primary market of Maine. Recognizing
1759 a strategic opportunity for growth in new markets, Husson's investments include both new
1760 personnel and technology. One such innovative technology, Slate, provides the admissions team
1761 with enhanced data that facilitates strategically timed student communications. Husson is
1762 committed to scaling resources to meet an increased volume of online students while also
1763 ensuring qualified and academically prepared candidates in all modalities.

1764 Partially as a result of attention to marketing and recruitment plans, over the past decade, Husson
1765 has improved its retention rates. Retention data noted in Standard 8 reflect that Husson
1766 University is remaining diligent in assuring that students admitted into its programs succeed as
1767 evidenced by an increase in first to second-year retention from 65% in 2009 to 79% in 2022.
1768 This is especially noteworthy given Husson has remained committed to being a high value
1769 institute with lower cost tuition with high value degrees and career opportunities. This is seen in
1770 the 2018 publication from U.S. News & World recognizing Husson University is the least
1771 expensive private college in New England ([HERE](#)).

1772 **Student Services and Co-Curricular Experiences (5.7-5.20)**

1773

1774 **Description**

1775 Since the last self-study, Husson University has placed tremendous efforts into academic
1776 advising and academic support. Over the past five years, The Office of Academic Success and
1777 Intercultural Services (OASIS) has transitioned to the Center for Student Success (CSS),
1778 working to build relationships and provide direct services targeted to meet the individual needs
1779 of all Husson students. The department believes that every student entering the institution is
1780 worthy of support and has the potential of becoming a successful student and graduate. The CSS
1781 is working with the advising, faculty, and academic leadership groups to implement more

1782 research supported retention strategies which support the 45% percent of students receiving Pell
1783 awards; Husson's peer group averages 34%.

1784 The theoretical framework adopted by the CSS has provided the foundations for staff actions.
1785 The Dean for Student Success adheres to the Appreciative Advising model ([HERE](#)), a student-
1786 centered model of advising that provides strategies for students to optimize their success and
1787 achieve their goals. CSS has supported the Faculty Advising Committee in adopting the National
1788 Academic Advising Association (NACADA) pillars of academic advising ([HERE](#)) as a
1789 framework to engage in conversations about effective advising. As previously discussed, the
1790 majority of Husson students come from Maine, and students from Maine often come from
1791 smaller school districts with significant socioeconomic needs. Both appreciative advising
1792 strategies and the introductory Husson Experience course ([HE 111](#)) provides a framework for
1793 engagement and motivation in helping students transition to higher education.

1794 During the 2021-2022 academic year, Student Life hosted multiple events ([HERE](#)) and ([HERE](#))
1795 to advance social, recreational, educational, and cultural themes. Student Life also utilizes
1796 strategic planning to incorporate the eight dimensions of wellness (emotional, physical,
1797 occupational, social, spiritual, intellectual, environmental, and financial) into student
1798 interactions. During the pandemic, Student Life varied its execution of programs to safely host
1799 small groups, incorporate more outdoor events, and provide virtual opportunities for both on and
1800 off-campus interactions.

1801 The newly constructed Wellness Center serves as a permanent location for its health services (as
1802 noted in Standard 7). This facility was intentionally designed at the center of campus, to both
1803 raise awareness among students of the support available to them and to reduce the stigma that
1804 can be associated with students with mental health diagnoses. Center staff work to holistically
1805 support our students and mitigate the physical and mental health challenges faced by an ever-
1806 growing number of college students.

1807 The University is grateful for the collaboration of students in working through the challenges of
1808 COVID-19. Students demonstrated their appreciation for on-campus learning by responding to
1809 remote learning initiatives and complying with masking and vaccine mandates. Due to
1810 community-wide collaboration, the University kept nearly all students progressing to on-time
1811 graduation. As an example, during COVID-19 the School of Nursing was unable to access many
1812 clinical partnerships; however, by using our simulation labs, students were able to meet the
1813 required clinical hours to remain on track for graduation.

1814 Financial Aid has significantly evolved over the past ten years. In 2016, the Financial Aid office
1815 moved away from a caseload model (where one counselor was responsible for everything related
1816 to a student, including counseling, verification, and packaging) to a model where a specialist for
1817 each area is identified. This allowed for expertise in that area and increased customer service.
1818 This model reduced annual audit findings and increased timely service to students and their

1819 families by cross-training staff members to provide backup and support for each area and
1820 automate many processes, allowing more time for counseling.

1821
1822 This increased time for financial aid counseling has been seen in face-to-face, Zoom, and
1823 telephone consultations. Many of these discussions focus on student loans and payment plans.
1824 Husson has started more intrusive financial aid counseling for all students and families,
1825 prioritizing those who request to borrow up to the cost of attendance to educate them on interest
1826 rates, loan repayment, and debt. Early in the student life cycle, Husson's financial aid staff
1827 present at Accepted Student Days, New Student Orientation, and in the Husson Experience
1828 classes for all first-year students. Similarly, conversations with seniors regarding student loan
1829 repayment options have been implemented and will be expanded in the spring of 2023.

1830
1831 While Husson has always promoted its affordability, financial aid packaging at Husson has
1832 evolved immensely over the past decade. Husson University took the lead in the State of Maine
1833 in introducing the SALT financial literacy program (created by American Student Assistance
1834 [ASA] and provided as a partnership with the Finance Authority of Maine) and integrated the
1835 information into HE 111, the first-year student experience. For the fall of 2018 with the
1836 assistance of EAB, Husson has implemented a financial aid leveraging strategy where a
1837 percentage of a student's need is covered by grants and scholarships, based on the level of merit
1838 awarded at the time of admission. The percentage of grant aid runs from 47% - 66%, which
1839 ranges from \$6,000 - \$22,500. While this strategy has increased our discount rate, this
1840 commitment has allowed Husson to support students equitably and fairly, leading to increased
1841 retention and graduation rates. The average aid package for a first-year student in the 2021-22
1842 academic year was \$19,419. Husson's institutional aid budget has increased from \$8.6 million in
1843 FY15 to \$18.7 million in FY22.

1844
1845 As of Fall 2022, Husson has changed the aid structure for the term-based online student
1846 population to a Borrower-Based Academic Year (BBAY), allowing students to receive a
1847 disbursement each term they are enrolled. Husson's current academic year definition under
1848 BBAY is 42 weeks, so once students reach 42 weeks of instructional time and complete 24
1849 credits, they will move on to their next academic year. This keeps students on track to graduate
1850 within five academic years. This BBAY model allows students to stop out a term as necessary
1851 and move their aid eligibility to a later term without being penalized.

1852 COVID-19

1853
1854 The COVID-19 pandemic impacted Husson in March 2020, and like most schools, Husson
1855 utilized remote instruction for most coursework during the final seven weeks of the spring term.
1856 Husson continued to serve the programs with experiential components in a face-to-face format
1857 with reduced class size, social distancing and scheduled disinfecting.

1858 In the 2020-2021 academic year, all Husson University face-to-face students and faculty returned
1859 to campus with reduced class sizes, decreased residence hall occupancy, the removal of fall and
1860 spring vacation time to minimize disease transmission opportunities, and required student
1861 COVID-19 testing. These measures were successful as Husson had only one week of campus
1862 closure due to related COVID-19 conditions during the 2020-2021 academic year. In the fall of
1863 2021, with a COVID-19 vaccination requirement in place, students returned to campus with few
1864 restrictions beyond masking as appropriate based on the CDC recommendations.

1865 Throughout the COVID-19 pandemic, the University maintained student services through careful
1866 planning, coordination, and reallocation of money and services. Dining reshaped its services
1867 through staggering dining hours, grab-and-go opportunities, and delivering meals directly to
1868 students. The library altered the check-in and check-out procedures to ensure adequate time for
1869 disinfection and utilized the web service to support contactless service. By using social
1870 distancing, masking, and strict disinfection protocols, the University maintained an on-campus
1871 presence throughout the pandemic for students in experiential learning disciplines. To further
1872 support face-to-face interactions during the pandemic, the University reduced class enrollment to
1873 provide for adequate social distancing, installed Plexiglass in service areas, and provided face-
1874 shielding to faculty members.

1875 In these ways, Husson supported multiple preferred modalities of education (face-to-face and
1876 online) and timely progression toward gaining the intended skills and knowledge of each
1877 program and prioritizing on-time graduation.

1878 Inclusion initiatives at Husson University provide a means by which students can experience a
1879 sense of belonging and can develop their authentic selves in appreciating that the Husson
1880 Community is intent on helping all students thrive. Often, traditional-aged students entering
1881 higher education are beginning to fully explore their multiple identities (e.g., race, ethnicity,
1882 sexual orientation, gender identity, national origin, religion, and politics). In this stage of
1883 development in understanding themselves in a broader context and in relation to others, Husson
1884 is striving to create inclusive environments in which all community members can express the
1885 fullness of their identities. In February of 2021, the University hired a Diversity, Equity, and
1886 Inclusion Officer. Those efforts originally resulted in the assessment of the climate, training
1887 initiatives, and policy-shaping initiatives ([HERE](#)). The DEI Officer and the Associate Dean of
1888 Student Life created the DEI programming committee to curate events of interest to the campus
1889 community. Various student organizational leaders, faculty, and staff serve on the committee to
1890 integrate DEI throughout the institution ([HERE](#)). In the Spring of 2022, the DEI Officer
1891 launched an Appreciative Inquiry Strategic Planning initiative to infuse a sense of belonging
1892 throughout the University ([HERE](#)). The intended outcome would be inclusive and open
1893 environments for the civil discourse of expression and listening with an underpinning of cultural
1894 competence.

1895 Husson has a robust offering of over 50 clubs and organizations on campus which are based on
1896 student interest and engagement ([HERE](#)). Student Government also plays a crucial part in the
1897 functioning of the University as members of the Student Government occupy seats on the
1898 Faculty Forum sub-committees such as the UAAC and General Education. Each year a small
1899 number of clubs will dissolve due to a lack of participation, and students quickly form new clubs
1900 that better match their evolving interests and passions. Within these clubs are students from
1901 every college and major across campus. 180 different students serve as student club officers, and
1902 50 different employees serve as advisors. These club advisors are members of the faculty, Safety
1903 and Security, Student Life, Wellness Services, Dining, Student Accounts, and other departments
1904 across campus.

1905 Husson University offers twenty-two varsity sports programs and is a member of the NCAA
1906 Division III, North Atlantic Conference (NAC), Commonwealth Coast Football Conference
1907 (CCC Football), Northeast Women's Golf Conference (NWGC), and New England Collegiate
1908 Conference (NECC). Varsity sports include Baseball, Women's Basketball, Men's Basketball,
1909 Women's Cross Country, Men's Cross Country, Men's Golf, Women's Golf, Field Hockey,
1910 Football, Women's Indoor Track & Field, Men's Indoor Track & Field, Women's Lacrosse,
1911 Men's Lacrosse, Men's Outdoor Track & Field, Women's Outdoor Track & Field, Women's
1912 Soccer, Men's Soccer, Softball, Men's Swimming & Diving, Women's Swimming & Diving,
1913 Women's Tennis, and Women's Volleyball. In the 2021-2022 academic year, 517 Husson
1914 student-athletes participated in athletic programs. Since 2013, Husson teams have made 40
1915 national tournament appearances, won 49 conference championships ([HERE](#)) including back-to-
1916 back NAC conference championships in 2021 and 2022 for both the Husson softball and baseball
1917 teams. All students, regardless of participation on any official sports team, have access to the
1918 Swan Fitness Center, Webber Pool, and Newman Gymnasium. The University has had no major
1919 NCAA infractions in the entire ten-year review period.

1920 At Husson, student-athletes are recognized as students first. Coaches are active in mentoring
1921 students on and off the field and will regularly make referrals to academic support services
1922 within CSS to ensure that students are academically successful. Student-athletes looking to study
1923 together or participate in group work with teammates are encouraged to use the Wadleigh
1924 Academic Center, a dedicated study location in the gym reserved for athletes to study.

1925 Given the number of participants involved in student affairs, it is clear that Husson students are
1926 engaged across campus. These experiences provide experiential learning opportunities where
1927 students can take the lessons learned in the classroom and put them into practice. Examples
1928 include students learning to lead a meeting, delegate, balance a budget, handle conflict, and work
1929 as a team. Allowing the students to develop these skills, may help them to learn skills to
1930 successfully navigate their careers thus enhancing opportunities for future social mobility.

1931 Appraisal

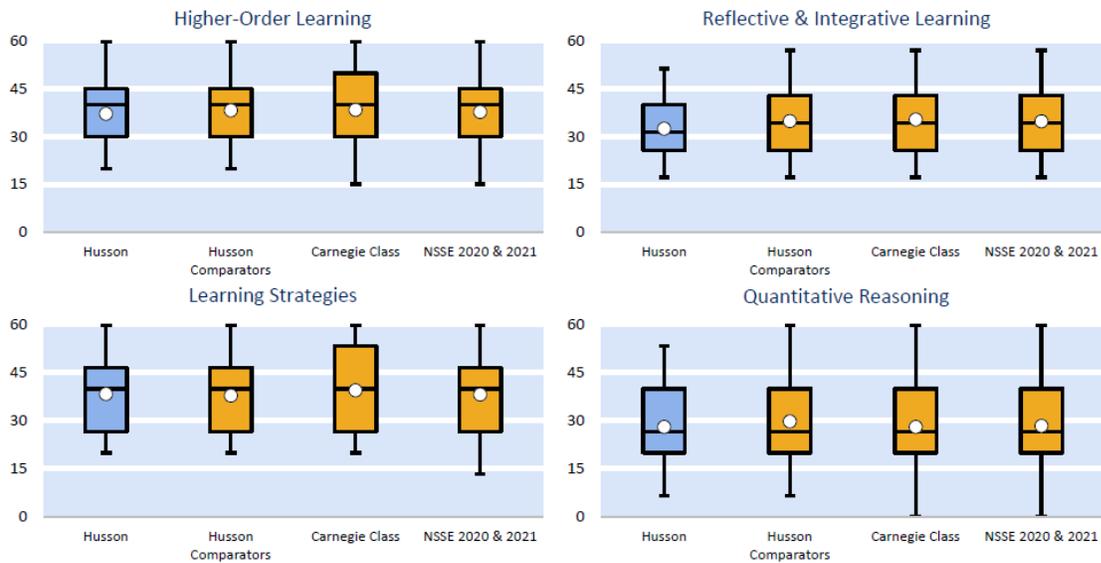

1932

1933 Husson University has been highly effective in academic support efforts. However, even with
1934 extensive community collaboration and the successful maintenance of an on-campus
1935 environment, the impact of COVID-19 on the student body is palpable. Those coming from high
1936 school for the fall 2020 and 2021 semesters did not have the typical social interactions from their
1937 last year in secondary school to build upon in the first year of higher education. Though not
1938 independently verified through research or assessment, as reported by students participating on
1939 the Standard 5 Committees, these students did not have the same capacity to build the social
1940 bonds that form a foundation for the four years of higher education. Employees in the Office of
1941 Student Life reported that these students also exhibited a lack of resiliency. All these factors
1942 required additional efforts and consideration from faculty and staff who were themselves stressed
1943 in working through the COVID-19 challenges.

1944 An indirect measure of the transition in the student body rests with student government. While
1945 the student senate has 30 openings for students, about 10 students serve in a representative
1946 capacity. Students have a full array of activities, clubs, and organizations, yet participation at
1947 events is currently lower than desired. Husson students often must balance work, family, and
1948 academics making it more difficult to engage in extracurricular activities, but the 2021 data
1949 indicates that the Husson students do continue to engage in high-impact practices associated with
1950 retention and learning. Recently, 70% of seniors responding to the NSSE survey reported
1951 engagement in two or more high-impact practices (such as completing an internship or doing
1952 research with faculty) and 80% of first-year students reported they planned to complete an
1953 internship before graduation. While it is likely that these are shared experiences similar to other
1954 institutions of higher education, Husson continues to explore additional ways to increase student
1955 engagement with the campus community.

1956 Indirect assessment of student engagement is available through the National Survey of Student
1957 Engagement. The University implemented the NSSE Survey in 2005 and delivered this
1958 assessment most recently in 2015, 2018, and 2021. Though subject to a higher margin of error
1959 due to the relatively low response rate, Figure 5.X provides an overview of the broad
1960 engagement indicators for Husson's first-year students. Husson was not significantly different
1961 from the national or peer groupings in three of the four areas but was significantly lower in
1962 responses under *Reflective & Integrative Learning* (Husson mean: 32.5, comparators mean: 34.9,
1963 national mean 34.9). This information helps support the earlier observational data of lower levels
1964 of engagement and will be utilized by the academic and student life communities in the 2022-
1965 2023 academic year for planning improvements in this area. It may also be observed that the
1966 student body's socioeconomic background necessitates that Husson students work at higher rates
1967 than peer institutions with students of different socioeconomic backgrounds.

1968 Figure 5.1: 2021 NSSE Engagement Indicators for First-Year Students at Husson

Notes: Each box-and-whiskers chart plots the 5th (bottom of lower bar), 25th (bottom of box), 50th (middle line), 75th (top of box), and 95th (top of upper bar) percentile scores. The dot represents the mean score. Refer to Detailed Statistics for your institution's sample sizes.

1969

1970 In the Spring of 2021, the Director of DEI conducted a survey to assess the campus climate. The
 1971 information revealed a need for more opportunities for education and engagement around DEI.
 1972 As such, the DEI Officer has provided training and support to multiple campus initiatives and
 1973 has developed an online DEI certificate that is predicated on a three-course sequence. This
 1974 program was implemented in the fall of 2022. The current Appreciative Inquiry efforts underway
 1975 will provide the framework for a systemic approach to infusing inclusivity through the
 1976 University. At this juncture, the sense is that greater efforts at inclusivity would foster greater
 1977 equality on campus.

1978 **Projections**

1979

- 1980 • In the Spring of 2023, the President of the Student Government will work with the
- 1981 University administration to consider the use of Restorative Practices in fostering
- 1982 community engagement skills among students. NSSE data will be used as an
- 1983 underpinning for assessing the progress in using Restorative Practices.
- 1984 • Starting in the fall of 2023, The Dean of Student Success and the Director of IR will
- 1985 engage in a comprehensive Student Retention study to improve student retention and
- 1986 graduation across all colleges and departments. The study will aim to engage those
- 1987 working most closely with specific student populations to develop meaningful targets and
- 1988 to adopt research-based practices to improve the student experience. Husson's target is to
- 1989 improve student retention for first-time, full-time students to 80%.
- 1990 • In January of 2024, the Director of Institutional Research will assemble a team to
- 1991 determine the rotation and nature of assessments for Student Life. Examples of surveys
- 1992 that need to be in the rotation include the NSSE survey, the University survey for DEI
- 1993 and sexual assault prevention, as well as a survey to enhance the relationship between

1994 Safety and Security and the campus to support a culturally competent community. Other
1995 surveys, such as those from dining, wellness, and student activities, will also be
1996 scheduled on a cyclical and systematic basis. Consolidating these surveys may improve
1997 sampling results and reduce survey fatigue.

1998

Please enter any explanatory notes in the box below

- 1) First, second, third and fourth years are degree-seeking students.
- 2) Unclassified students are dually enrolled high school and non-degree students.
- 3) Total Headcount Definitions:
 - Full Time Undergraduates are student enrolled for 12 credit hours or more, except for Online students who must be enrolled in 4 credits or more during the 7-week T1 Online term (for 2022/FA-only) to be considered full-time. Online term T2 students (2022/FA-only) are not included in this calculation.
 - Full Time Graduates are students enrolled for 9 credit hours or more, except for Online students who must be enrolled in 3 credits or more during the 7-week T1 Online term (for 2022/FA-only) to be considered full-time. MSOT students who must be enrolled in 15 credits or more to be considered full-time.
 - Full time Doctoral Students are students enrolled for 15 credits or more.
- 4) Total FTE (by credit hour) Definitions:
 - FTE calculations are based on the NECHE definitions of 15 credit hours for full-time undergraduate students and 9 credit hours for full time graduate students, except for Online students who must be enrolled in 8 undergraduate credits or more (5 graduate credits or more) during the 7 week T1 Online term (for 2022/FA-only) to be considered full-time. Online term T2 students (for 2022/FA-only) are not included in this calculation.

1) Total FTE Definitions:
 Undergraduate FTE = Number of Full-Time Students + 1/3 (Number of Part-Time Students)
 Graduate FTE = Number of Full-Time Students + 1/2 (Number of Part-Time Students)

1999 **Standard 6 – Teaching, Learning, and Scholarship**

2000 **Faculty and Academic Staff (6.1-6.14)**

2001

2002 **Description**

2003

2004 In 2008, Husson transitioned from being a college to being a university to reflect the diversity of
2005 programming, including its first-professional doctoral degrees. Since that time, the University
2006 has continued to define what it means to be a university with a mission of inspiring and
2007 preparing students for the professions. This undertaking has engaged the faculty in all aspects of
2008 teaching, learning and scholarship, as evidenced by advancements within the General Education
2009 program and in publications, presentations, research, and advising.

2010 Faculty roles and categories are clearly defined in the Faculty Handbook and subject to ongoing
2011 review by the Faculty Handbook Committee. The Faculty Handbook was reviewed by the Board
2012 of Trustees in the 2020-2021 academic year. Definitions and criteria for each category of faculty
2013 may be found in section 2.1 of the Faculty Handbook ([HERE](#)).

2014 On an ongoing basis, deans and chairs hold meetings with faculty to review departmental
2015 assignments. The classroom workload of faculty is appropriately aligned to the teaching mission
2016 of the institution with consideration given to the expectations of the respective disciplines and
2017 the level of instruction whether graduate/undergraduate or face-to-face/online. This is
2018 exemplified in section 2.8.2 of the Faculty Handbook:

2019 *All full-time undergraduate faculty are generally obligated to twenty-four*
2020 *(24) credit hours per academic year. Full-time graduate faculty are*
2021 *generally obligated to eighteen (18) credit hours per academic year, of which*
2022 *at least 50% (9 credit hours per academic year) must be taught in graduate*
2023 *courses. A school may determine a full-time teaching load to be less than*
2024 *twenty-four (24) credit hours for undergraduate faculty or less than eighteen*
2025 *(18) credit hours for graduate faculty in specific situations, such as teaching*
2026 *a certain number of classes or labs which are each less than three credits*
2027 *hours.*

2028 The expectations of faculty for scholarship and service are also addressed in the Faculty
2029 Handbook. These criteria are outlined in sections 2.5.2 and 2.5.3 and examples of each are
2030 provided in Appendix D (here). These guidelines are flexible to more fully support the different
2031 needs and expectations of each discipline, while still providing clear expectations for teaching,
2032 scholarship, and service for all faculty.

2033 Section 2.6.2 of the Faculty Handbook relates the importance of academic freedom to the
2034 endeavors of faculty at Husson University.

2035 *Institutions of higher education exist for the free search for truth, and its free expression.*
2036 *Academic freedom is essential to these purposes and applies to both teaching and*
2037 *research. Freedom in research is fundamental to the advancement of truth. Academic*
2038 *freedom in its teaching aspect is fundamental for the protection of the rights of the*
2039 *teacher in teaching and of the student in learning. Faculty members are entitled to full*
2040 *freedom in research and in publication of the results, subject to the adequate*
2041 *performance of other academic duties; but research for pecuniary return should be based*
2042 *upon an understanding with the authorities of the institution. Faculty members are*
2043 *entitled to freedom in the classroom in discussing their subject. Because the faculty*
2044 *members are citizens and members of a learned profession, when they speak or write as a*
2045 *citizen, they should be free from institutional censorship or discipline. However, their*
2046 *special position in the community imposes special obligation since the public may judge*
2047 *their profession and institution by their utterances. Hence, they should at all times be*
2048 *accurate, should exercise appropriate restraint, should show respect for the opinions of*
2049 *others, and should make every effort to indicate that they do not speak on behalf of the*
2050 *University.*

2051 The University has continued to enhance faculty numbers and qualifications through recruiting,
2052 with a continued focus on enhancing pedagogical practices and improving student learning. As
2053 seen in Table 6.1 of the data first forms, Husson faculty are well credentialed with a growing
2054 number of doctorally prepared full professors (increase from 8% in 2019/2020 to 12% in
2055 2021/2022).

2056 The University's policy regarding the hiring protocols for faculty members provides the
2057 guidelines for an open and orderly process for recruiting and appointing faculty ([HERE](#)). The
2058 policy includes faculty participation. This policy was updated by the Deans Council with input
2059 from Human Resources in March 2022.

2060 Recruiting efforts include advertising in the *Chronicle of Higher Education* and *Inside Higher*
2061 *Education* advertising in national publications in content-specific fields. Examples of this may be
2062 seen in a recent search for a chair for the Counselor Education program. In addition to national
2063 postings, Husson targets the profession-specific publication hiring process also included postings
2064 in CESNET-L and at the Association for Counselor Education and Supervision Conference. The
2065 conference provided an opportunity for interested candidates to interview with the Dean of
2066 CoSH and the Counseling Program Director at a recent conference.

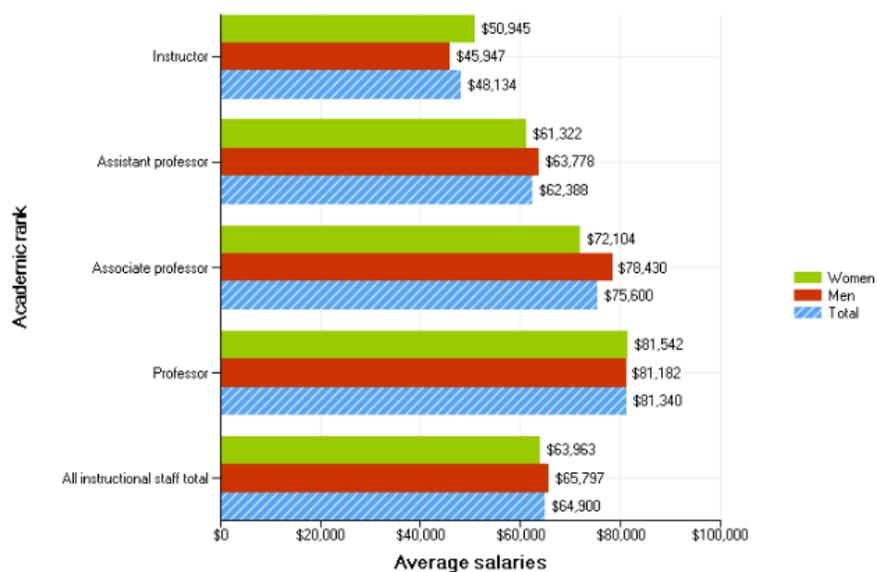

2067 As emphasized in Standard 1, bringing online programming in-house was a significant shift from
2068 having an online program manager (OPM). While operating with the OPM of The Learning
2069 House, purchased by Wiley Education Services, the University utilized its faculty and hired

2070 adjuncts for the delivery of courses developed by full-time faculty. To enhance the achievement
 2071 of learning outcomes and to promote a more uniform experience for online students, the Division
 2072 of Online and Distance Education has redesigned available courses, sought the development of
 2073 unique programming to attract students from beyond the borders of Maine, and dedicated
 2074 exclusive faculty positions as well as joint positions. Additionally, this past year, Husson
 2075 established two positions within the online division to support innovative course development
 2076 and support and oversee the adjuncts. To respond to growth and the need to quickly expand
 2077 class offerings, the Division of Online and Distance Education established a pool of qualified
 2078 online instructors, providing small retainer fees with the guarantee of at least one course in a six-
 2079 month period.

2080 Salaries and benefits are also monitored to ensure the institution’s continued ability to attract and
 2081 retain qualified individuals. Figure 6.1 provides the breakdown of faculty salaries based on rank
 2082 and gender as reported in the 2020-2021 IPEDS data. Husson also utilizes data from the College
 2083 and University Professional Association for Human Resources (CUPA-HR) to ensure that
 2084 faculty are compensated an appropriate amount for their area of expertise. As discussed in
 2085 Standard 7, Husson has already enhanced specific salaries to ensure a competitive salary to peer
 2086 institutions by content area and will continue to adjust. The Compensation Committee (Appendix
 2087 B of the Faculty Handbook) also provides recommendations to the administration regarding
 2088 wages and other benefits for faculty, evidenced, most recently, by the increase of \$100 per year
 2089 for adjunct compensation.

2090 Figure 6.1: Breakdown of faculty salaries based on rank and gender as reported in the 2020-2021
 2091 IPEDS data

Average salaries of full-time instructional nonmedical staff equated to 9-months worked, by academic rank and gender: Academic year 2020-21

2092

2093 When faculty are recruited and assigned for instruction by their dean, a primary consideration is
2094 given to instructional workload as outlined in Section 2.8.2 of the Faculty Handbook. The
2095 principal faculty obligation noted in Section 2.6.1.3 is the responsibility of teaching; this
2096 obligation is consistent with the mission of the University of preparing students for professional
2097 careers within the context of the Sciences and Humanities. Teaching and developmental
2098 opportunities for improvement in pedagogy include a partnership with The Association of
2099 College and University Educators (ACUE) which has involved 83 Husson University faculty;
2100 110 faculty enrollments in Courses Development seminars; and 48 faculty earning Quality
2101 Matters certification.

2102 The Faculty Handbook describes the expectations of faculty. The contractual relationship with
2103 faculty is based on a multiyear contract system with the opportunity for faculty to apply for
2104 promotion based on years of service and attainment of certain expectations regarding teaching,
2105 scholarship, advising, and service. Each year faculty meet with their supervisor to devise a
2106 faculty development plan to continue the ongoing balance of workload and appropriate allocation
2107 of time toward teaching, scholarship and advising. Professional expectations and academic
2108 freedoms are advanced through the Faculty Handbook in section 2.6 entitled “The Faculty’s
2109 Obligations, Rights, Academic Freedom and Code of Ethics.”

2110 In conjunction with the Faculty Forum Development committee, the Senior Vice President for
2111 Academic Affairs/Provost’s office sponsor University Faculty Development Day(s) at the
2112 beginning and end of the academic year. These sessions often include various topics on teaching,
2113 scholarship, services, and advising by internal and external guest speakers. Examples of
2114 University sponsored development include: “Harnessing the science of learning and transforming
2115 teaching” by Pooja K. Agarwal, Ph.D. on May 11, 2017; “Scholarship made easier: best
2116 practices for writing and publishing” by Linda Nilson, Ph.D. on August 23, 2017; “Advancing
2117 education through scholarships” keynote and workshop by Kristin Janke, Ph.D. on May 10,
2118 2018; “Integrating Learning, Teaching, and Assessment: Fostering Deep and Flexible Learning”
2119 by Peter Doolittle, Ph.D. on May 13, 2019; “Accessibility Services at Husson University” by
2120 Elizabeth Atkinson on August 22, 2019.

2121 Consistent with its teaching mission while accounting for enhanced expectations of research and
2122 scholarship, Husson annually provides \$20,000 for research funds and provides financial awards
2123 for faculty selected in the *Global Scholars* and *Research* categories as part of annual faculty
2124 recognition. These funds may be used to develop both creative areas of international
2125 collaboration and to provide faculty with a global viewpoint to share with their students. Husson
2126 has provided physical support for research through the 2000-square foot state-of-the-art research
2127 laboratory space at the Husson University Research and Education Center on Marshall Road
2128 ([HERE](#)) that supports Pharmacy, PT, OT, Counseling, science, and Nursing research and
2129 simulation. The University provides resources for research as exemplified by support for
2130 nanoparticle bench research that has been funded by the National Institute of Health (NIH).

2131 **Appraisal**

2132 While Husson University’s mission of preparing students for emerging careers emphasizes
2133 teaching, specialized accreditations, such as CAPTE and ACPE, contain separate expectations of
2134 scholarship for those program faculty. Even within the construct of being a teaching institution,
2135 there are ongoing discussions of what constitutes the scholarship of teaching as contrasted with
2136 the scholarship of practice. Additionally, the health professions require consideration of clinical
2137 expectations in relation to scholarship. Husson provides the resources and support for faculty to
2138 be successful when considering promotions and multiyear contracts.

2139 Husson has been fostering scholarship expectations around Boyer’s model since an initial task
2140 force was initiated in 2003. The Office of the Provost distributed Boyer’s Scholarship
2141 Reconsidered to all faculty and facilitated conversations in the academic areas. This information
2142 helped broaden consideration of what constitutes scholarship and allowed for the individual
2143 schools to develop scholarship expectations appropriate for their disciplines ([HERE](#)). As an
2144 example, given that scholarly endeavors by NESCom faculty included audio and visual
2145 undertakings, the Handbook Committee amended Appendix D to include, “Creative or
2146 interpretive works including but not limited to the following: fine arts, performing arts, film,
2147 technology, photography, audio, video, and web and software development,” under the category
2148 of Scholarship of Application. As an example, given that scholarly endeavors by NESCom
2149 faculty included audio and visual undertakings, the Handbook Committee amended Appendix D
2150 to include, “Creative or interpretive works including but not limited to the following: fine arts,
2151 performing arts, film, technology, photography, audio, video, and web and software
2152 development,” under the category of Scholarship of Application. A listing of faculty’s scholarly
2153 work may be found [HERE](#).

2154 When considering matters of promotion, the broader definitions of scholarship expectations can
2155 make it challenging for faculty members to determine whether the level of scholarship has been
2156 met. Within the Faculty Handbook, scholarship as an expectation is noted as a “Contribution to
2157 the discipline or field of study through refereed articles; textbooks or books; presentation at
2158 conferences; or other evidence” (2.1.2.2.2). The criteria for appointment to a professor, as well as
2159 the ongoing expectation for renewal of multiyear contract, adds the word “substantial” to the
2160 definition above. Through the application of Boyer’s model, the University is giving credence to
2161 various forms of research in the scholarship of teaching, discovery, application, and integration.
2162 However, some faculty are concerned that scholarship expectations are difficult to balance with
2163 Husson's significant teaching load. What has changed is the need for scholarship and research to
2164 robustly support some of the programs that have been added over the years. Engagement of
2165 students in scholarship is a powerful teaching method, and many faculty are involving their
2166 students in research for this purpose.

2167 One example of the connection between teaching and scholarship is the Faculty Noon Seminar
2168 Series where faculty members present their scholarship to the University community. Another

2169 example of this connection between teaching and scholarship occurred in the Spring of 2020. At
2170 that time, the College of Health and Pharmacy held its annual Evening of Inter-professional
2171 Conversation. Given the circumstances of COVID-19, the University determined to hold the
2172 event via video conferencing. The simulated exercise involved the consideration of a discharge
2173 plan for a patient. Students were divided into 24 groups (6-8 people per group) with Husson
2174 students from Nursing, Occupational Therapy, Pharmacy, Physical Therapy, and University of
2175 Maine students from the Communication and Speech Disorders program. There was one faculty
2176 member per group serving as a facilitator and one student actor trained to play the part of the
2177 patient. The purpose of the study was to compare the student experience between in-person and
2178 video-conferencing discharge planning simulations.

2179 This research study exemplifies the creative approach of Husson University and its community
2180 in identifying scholarship of teaching opportunities presented by COVID-19. Husson University
2181 faculty and staff were able to advance experiential learning and give credence to its remote
2182 educational undertakings.

2183 Students who graduated in the spring of 2020, following the University's action to temporarily
2184 move all its courses online, remained overwhelmingly positive about their Husson experience.
2185 The percentages of the 2020 graduating class who rated their Husson experiences as good or
2186 excellent were higher than the 2019 graduating class for the "Quality of Their Interactions with
2187 Faculty" (92% compared to 84%); "How Well Their Major Prepared Them for Their Careers"
2188 (88% compared to 78%); and "The Quality of Student Support" (88% compared to 82%).

2189 Another example of advancing scholarship is seen through the Office of Research and
2190 Scholarship (founded in 2012), which oversees the Annual Research and Scholarship Day, an
2191 annual event on campus since 2010. Presentations and posters come from many disciplines
2192 including Economics, Occupational Therapy, Physical Therapy, Biology, and Pharmacy, and
2193 include both student and faculty scholarship and presentations. This allows students to learn
2194 about research in other fields of interest from their peers and to engage in the multidisciplinary
2195 approach of scholarship. It also provides an opportunity for the community to hear national and
2196 international speakers who foster broad-based interest to provide further exposure to scholarship
2197 beyond the Husson faculty.

2198 Teaching and Learning (6.15-6.20)

2199 Description

2200 The mission of inspiring and preparing students for professional careers reflects the University's
2201 commitment to the best pedagogical practices. There are many areas in which the University has
2202 shown support for quality instruction, including the development of online programming and the
2203 offering of Quality Matters training, and this support can be most readily seen in the partnership
2204 with the Association of College and University Educators (ACUE).

2205 In August 2018, the University announced that it was one of 26 colleges across the country
2206 selected by the Council of Independent Colleges (CIC), in partnership with the ACUE, to join
2207 the national Consortium for Instructional Excellence and Career Guidance. The program was
2208 designed to help faculty from multiple disciplines enhance their instructional skills to be used to
2209 improve Husson students' motivation, learning, and persistence. Faculty members completing
2210 the program's requirements earned a nationally recognized Certificate in Effective College
2211 Instruction which is co-endorsed by ACUE and the American Council on Education (ACE). This
2212 training session and those at the other 25 colleges and universities were made possible by a \$1.2
2213 million grant from the Strada Education Network.

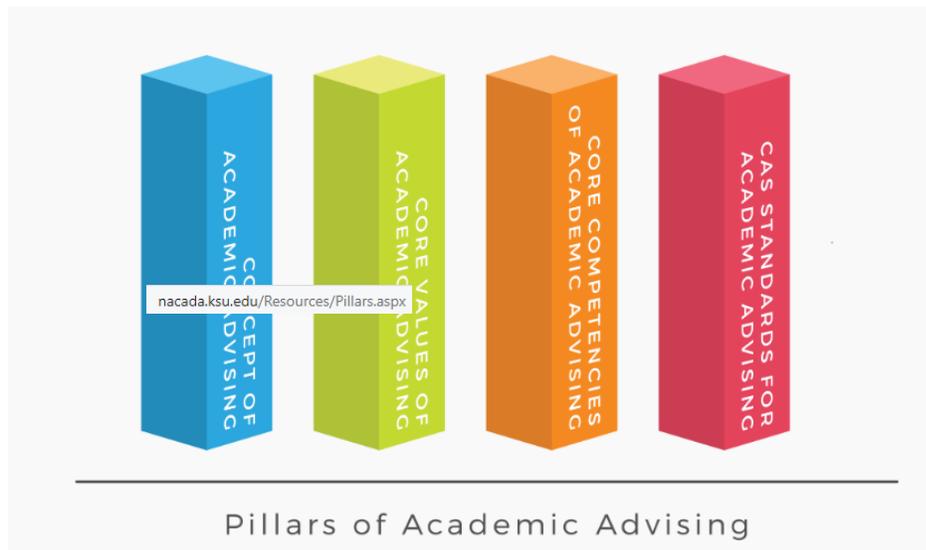

2214 Aligned with the latest research in cognition and adult learning, ACUE's courses address over
2215 200 evidence-based teaching practices, covering topics such as how to design an effective
2216 course; establish a productive learning environment; use active learning techniques; promote
2217 higher-order thinking, and utilize assessments to inform instruction and promote learning. One of
2218 the course modules, "Embedding Career Guidance," helped faculty members learn how to
2219 provide frequent, course-embedded information about specific careers and encourages faculty to
2220 embed authentic experiences related to the field of study into their didactic coursework.

2221 The first Husson ACUE cohort in 2019 contained 47 faculty members, and 36 more completed a
2222 second cohort for a total of 83 Husson faculty receiving ACUE training. Husson set four goals
2223 for the ACUE program, 1: Faculty members skilled in better instructional and career guidance
2224 methods; 2: Creation of a cohort of highly accomplished teachers capable of modeling
2225 exemplary practices for their colleagues and students; 3: Improved student outcomes as
2226 measured by both quantitative and qualitative assessment practices currently in place; 4: Faculty
2227 with a higher level of satisfaction in the institutional commitment to their professional
2228 development. To further assist in the attainment of these goals, Husson provided
2229 supplementation to the ACUE program in the form of a campus-based facilitator to provide
2230 support for faculty members as they went through the program. With the support of the ACUE
2231 representative, the Senior Vice President of Academic Affairs and Provost and the facilitator
2232 conducted in-person meetings to help faculty work collaboratively to discuss applications of
2233 course materials to their professional practice, while the Husson campus-based facilitator also
2234 provided small group and individual support of the ACUE learning modules. The results of the
2235 Faculty Survey after the program demonstrated that the faculty were able to apply this
2236 information in a meaningful way and felt that student education benefited from their involvement
2237 in the ACUE program.

2238 As a teaching institution and as part of communal engagement leading to the professions, the
2239 University continues to maintain faculty advising for degree programs. This support contrasts
2240 with centralized advising through the Center for Student Success for undeclared students. In the
2241 online modality, students have faculty as professional mentors, but the more transactional needs
2242 of advising are conducted by an online academic advisor. During the spring semester of 2022,

2243 the Faculty Forum adopted new standards for advising based on the informational and relational
2244 expectations of the National Academic Advising Association (NACADA). In the fall of 2022,
2245 the keynote speaker was selected for Faculty Development Days to represent NACADA and
2246 present the content and application of these pillars of academic advising to the faculty ([HERE](#)).

2247 *Figure 6.1: NACADA Pillars of Academic Advising*

2248

2249

2250 The online learning program implemented a model for online instruction which pairs course
2251 design experts who specialize in online pedagogy with the content expertise of the University’s
2252 faculty. The purpose of this approach is to combine the strengths of online pedagogy with the
2253 curriculum mapping and content expertise of the faculty, maximizing the experience for online
2254 students while also creating an effective means of assuring that students achieve the same
2255 learning outcomes regardless of the modality.

2256 Additionally, the Division of Online and Distance Education presents a comprehensive model for
2257 advising to ensure increased access, support, and response time. These efforts create a “one-stop
2258 shop” for online students to handle transactional aspects of advising and increased access to
2259 additional resources. Online students also have faculty mentors to provide support in career
2260 exploration, content questions, and professional development. This is distinct from the on-
2261 campus programs where the faculty member, as part of their advising responsibilities, assists in
2262 registration and is responsible for the relational expectations as noted by NACADA.

2263 **Appraisal**

2264 The ACUE program was well received by the Husson faculty, and the majority of participants
2265 self-reported that this experience helped them establish stronger learning environments, develop
2266 strategies for student learning, promote learning at higher cognitive levels, and increase course

2267 alignment. This is crucial as these factors contribute to knowledge and skill development and
2268 student retention.

2269 Based on this feedback, the University has developed a similar faculty development program that
2270 all faculty will participate in within the first two years of their contract and will also include
2271 faculty mentoring. This faculty development and mentoring program will be initiated in the fall
2272 of 2023 with a \$207,000 grant from the Davis Educational Foundation. For the 2022-2023
2273 academic year, the Office of Assessment is offering two eight-week sessions with places for 10
2274 faculty in each session. Faculty can participate in the eight-week program to develop a course
2275 that includes meaningful, measurable, and manageable outcomes, a course assessment map,
2276 demonstration of alignment of instruction to outcomes, and opportunities to embed active
2277 learning and varied modes of instruction to meet the needs of all learners, as well as
2278 opportunities to review the course in the LMS for ADA compliance. The University anticipates
2279 similar positive outcomes with its in-house programming.

2280

2281 Projection

2282

2283 As a teaching institution, the University aspires to utilize the best instructional practices in all
2284 modalities. The University also aspires to best practices in relation to advising as can be seen by
2285 the recent adoption of national standards. The growth efforts in online learning have provided a
2286 chance to reflect on pedagogical and advising practices. Additionally, the different modalities of
2287 advising could inform the University's ongoing consideration of faculty advising based on
2288 professional expertise and more centralized advising for the earlier years of study.

- 2289 • In the fall of 2023, Husson will initiate the faculty development program recently funded
2290 by the Davis Education Foundation. The outcomes of this program will be closely
2291 monitored and reported to the Davis Education Foundation.
- 2292 • In the Fall Semester of 2026, the Advising Committee of the Faculty Forum will examine
2293 the extent to which the new standards on advising have been implemented into faculty
2294 evaluations. They will also devise an instrument that will help assess overall advising in
2295 both online and on-campus settings. This will lead to recommendations relating to
2296 measurable outcomes and considerations of training and other resources that may be
2297 needed to achieve NACADA standards.
- 2298 • In the Spring of 2023, the Senior Vice President for Academic Affairs and Provost will
2299 convene a committee of faculty members with representatives from each of the colleges.
2300 Their charge is to review the school's scholarship expectations to provide the handbook
2301 committee with expanded language recommendations for scholarship criteria.
2302 Additionally, the Deans Council will formulate a revised adjunct evaluation policy that

2303 will incorporate greater consistency in training, support, and evaluation of adjunct faculty
2304 in both face-to-face and online modalities.

Please enter any explanatory notes in the box below

The faculty counts are duplicated because faculty members (ranked & non-ranked) can deliver instruction in more than one subject area. This count does not include staff members that may also deliver instruction outside of their normal job duties.

**Standard 6: Teaching, Learning, and Scholarship
(Faculty and Academic Staff Diversity)
(Fall 2022)**

For each type of diversity important to your institution (e.g., gender, race/ethnicity, other), provide information on faculty and academic staff below. Use current year data.

Faculty	Full-time	Part-time	Total Headcount	Headcount Goal (specify year)
Category of Faculty (e.g., male/female, ethnicity categories); add more rows as needed				
Male	62		62	Pending
Female	62	1	63	Pending
Asian	3		3	Pending
Two or More Races	1		1	Pending
Unknown Race	30	1	31	Pending
White	90		90	Pending
Academic Staff	Full-time	Part-time	Total Headcount	Headcount Goal (specify year)
Category of Academic Staff (e.g., male/female, ethnicity categories); add more rows as needed				
Male	134	45	179	Pending
Female	133	13	146	Pending

2307 Standard 7 – Financial Resources

2308 The University has a long-standing history of being highly tuition driven; therefore, it prioritizes
2309 careful stewardship of its resources. The University’s commitment to on-campus infrastructure
2310 and improvements, its in-house online learning initiative, and its ongoing efforts to enhance
2311 operational infrastructure provides a solid foundation for long-term adaptability and
2312 sustainability. These efforts have allowed the University to respond with alacrity to COVID-19
2313 and have laid the foundations to sustain the University's core values and innovative initiatives as
2314 it prepares to deal with the declining demographic of traditional college-age students in New
2315 England. The ongoing modes of operating embodied by fiscally conservative stewardship, cross-
2316 departmental collaboration, and operational effectiveness will be the sustaining modalities for
2317 future success.

2318 Human Resources (7.1-7.3)

2319 Description

2320 As seen in the 7.1 Human Resources data first sheet, Husson University continues to develop and
2321 expand its infrastructure to support the mission of preparing students for current and future
2322 careers. This data first form shows that over the past two years, Husson has increased both full-
2323 time and part-time instructional staff, full-time Student and Academic Affairs staff, and full-time
2324 support personnel. The overall workforce at Husson University has increased 11.1% over the
2325 past two years, including infrastructure growth during the COVID-19 pandemic. As evidenced in
2326 Data First sheet 7.1, not all areas have expanded their workforce; however, Husson has
2327 prioritized the needs of the University and has taken steps to ensure that the infrastructure in
2328 terms of human capital is sufficient to meet the mission of the University.

2329 Husson University has sufficient human resources with which to meet its mission of preparing
2330 students for careers in emerging fields. The human resource office works with department
2331 managers to review and assess staffing levels by reviewing overtime reports and the ability to
2332 complete projects and tasks. Individuals in these departments understand the mission and
2333 purpose of the University and rely on collaborative efforts to maintain efficiency. That there are
2334 long-term employees in many of these departments is indicative of the unique balance achieved
2335 by Husson University in continuing to thrive in competitive market conditions. In 2022, Husson
2336 was able to celebrate the service of one employee who reached 30 years of service, 2 employees
2337 who reached 20 years of service, 12 who reached 15 years of service, four who reached 10 years
2338 of service, and 19 who reached five years of service, each sharing the commitment to the Husson
2339 community and Mission with their peers.

2340 In September of 2015, Husson University hired a new HR Director (now Chief HR Officer) who
2341 completed an initial needs assessment of the entire Human Resources (HR) Division which
2342 informed the 2017-2020 Human Resources strategic plan ([HERE](#)). Another needs analysis and
2343 more strategic planning occurred in 2019 with updates in 2022 ([HERE](#)). A continuing thread was

2344 the need to modernize and digitize HR policies and practices. Great strides have been taken
2345 toward meeting this charge, with the most significant contributions of the HR Department
2346 evidenced by the transition to the ADP online environment (an overview of the ADP system may
2347 be found [HERE](#)). This system allows for the consolidation of all payrolls, visualization of
2348 organizational hierarchy, employee time allocation and requests, disbursement of tax documents,
2349 and notifications of policy into a single system. Within ADP, employees have 24-hour access to
2350 HR policies and resources. Additional efforts at moving functionality online include the
2351 collaboration with Maine Employers Mutual Insurance Company (MIMC) to provide a
2352 consistent platform for employee training and development with ongoing needs, such as safety
2353 training, sexual harassment, and OSHA regulations. This system allows for the consolidation of
2354 all payrolls, visualization of organizational hierarchy, employee time allocation and requests,
2355 disbursement of tax documents, and notifications of policy into a single system. Within ADP,
2356 employees have 24-hour access to HR policies and resources. Additional efforts at moving
2357 functionality online include the collaboration with Maine Employers Mutual Insurance Company
2358 (MIMC) to provide a consistent platform for Employee training and development with ongoing
2359 needs, such as safety training, Sexual harassment, and OSHA regulations.

2360 Additionally, LogicGate, an enhanced platform, provides a consistent platform for all the
2361 University policies and payroll changes, and tuition waivers. Similarly, NEOED (another HR
2362 software) was deployed in October of 2022 to track applicants for Husson Employment and
2363 facilitate new employee onboarding.

2364 The Employment Handbook is developed by the Chief Human Resources Officer in
2365 collaboration with Student Life, Safety and Security, and the Senior Cabinet. Senior Cabinet
2366 approval is required for revisions to the Employee Handbook and policies. Policies that provide
2367 for the fair redress of grievances are reviewed by external legal counsel on an alternating-year
2368 basis unless there are changes in applicable legislation that require a more frequent review. The
2369 process of student grievance is found on the University website ([HERE](#)). Within the ADP portal,
2370 faculty can access the faculty handbook ([HERE](#)); faculty grievances are addressed in section
2371 2.10. All employees are supported in reporting sexual misconduct in the annual publication of
2372 the Notice Concerning Sexual Harassment Policy as required by Title VII of the Civil Rights
2373 Act. Information is also posted on how to address grievances of all forms on the HR bulletin
2374 board posted in the public area near the HR offices.

2375 All Title IX issues are supervised by the Title IX coordinator for the University followed by an
2376 appropriate process by HR or Student Life. Human resources provide training for all employee
2377 supervisors on the appropriate use of university policies and supervision techniques ([HERE](#)).
2378 These monthly trainings were developed through consultations with supervisors regarding what
2379 types of development they would like to receive and by assessing what human resources
2380 observed as needs. Topics include such things as wellness, financial planning, and
2381 communication styles. Quarterly leadership meetings were also instituted which provided a

2382 framework for leadership to come together for strategic discussions, as well as developmental
2383 opportunities.

2384 Another transition brought about by the HR Office is the implementation of an electronic annual
2385 process for the evaluation of all employees within the HRIS system. Faculty experience the
2386 annual review process as outlined by the Faculty Handbook. All other employees and their
2387 supervisors follow the process and evaluation steps as outlined in the Employee Handbook
2388 ([HERE](#)). This review ensures the ongoing verification of current job descriptions.

2389 Finally, in alignment with the 2019 HR strategic plan under area 2.8 (Expanding opportunities to
2390 drive passion and engagement/commitment in the workforce, specifically in areas of “*identify
2391 and improve recruitment process to recruit top talent*”) it became apparent to the Senior Cabinet
2392 that a goal of hiring a Director of Diversity, Equity, and Inclusion would be appropriate as it
2393 would help provide a more intentional effort to foster diversity beyond mere compliance with
2394 Equal Employment Opportunity standards, and would support the recruitment and retention of
2395 employees. This goal was achieved in February of 2021. The Director of Diversity, Equity and
2396 Inclusion is engaged in strategic planning to establish the context of the University. The
2397 University also ensures that position openings are posted nationally for exempt positions and
2398 regionally for non-exempt positions. This allows the university the potential to draw diverse
2399 candidates more broadly.

2400 **Appraisal**

2401 At Husson, 100% of employees have access to the ADP system for HR functions and have been
2402 able to engage in the streamlined evaluation process. All job descriptions are reviewed on an
2403 annual schedule by each employee and their supervisor.

2404 Human Resources also conducts a comparative analysis against other institutions of higher
2405 education via the CUPA-HR Compensation Data, which provides salary information based on
2406 multiple criteria such as Institutional Classification, Affiliation, Enrollment, and Total Expenses
2407 as reported to IPEDS. Husson is monitoring the compensation of employees to ensure
2408 equitability to peer institutions. Human resources utilize CUPA-HR Compensation Data to
2409 develop an average annual salary for positions across campus and continuously assess Husson’s
2410 positions against the data to ensure we are offering competitive wages. However, the University
2411 recognizes that in the current COVID-19 market, there have been significant increases. The
2412 University will continue to provide ongoing market and peer analysis and make adjustments to
2413 compensation as appropriate.

2414 **Financial Resources (7.4-7.20)**

2415 **Description**

2416 The University has seen financial growth in the last ten years as a result of careful oversight and
2417 control of its limited financial resources. As discussed in Standard 2, the University has a

2418 thorough and robust framework for financial planning and evaluation. Looking in detail at the
2419 fiscal operations, Husson’s processes adhere to the following framework.

2420 Financial Control Framework

2421

2422 The University policies ([HERE](#)) are the baseline guidance for daily operation and financial
2423 oversight. Control of procurement, travel, and documentation of approvals all operate under
2424 these policies. Any deviation from these written controls and sound business practices must have
2425 approval from the Senior Cabinet and, if necessary, the President.

2426 The foundation that supports adherence to these policies and assurance of our financial resources
2427 in alignment to our strategic annual plan for operations is our budgeting process. Fee structures
2428 are typically approved at the winter board meeting; capital and operating budgets (FY 2023
2429 example [HERE](#)) are approved by the Board of Trustees in the spring meeting. Husson’s budget
2430 sets general anticipation for revenue and expenditures for the year. Broad-based institutional
2431 support is maintained through integrated budgeting practices. The finance office maintains a
2432 planning timeline throughout the year for key points in developing new plans or updating current
2433 plans and outlooks (forecasting). The finance office disburses a planning memo and templates to
2434 budget managers for their review and input of budgetary needs for the upcoming fiscal year with
2435 overall guidance from senior leadership on efforts to maintain a manageable level of costs on an
2436 annual basis. Recent investment in Vena software allows for more intuitive planning and better
2437 transparency in data with all stakeholders. There are multiple levels of review (Budget
2438 Managers, Deans, AVPs, and Directors and Senior Cabinet members) prior to submission to the
2439 Board of Trustees. The approved budget is distributed back to budget managers, and Cabinet and
2440 Sub-cabinet Members and subsequently monitored through monthly reports.

2441 Budget managers and the Senior Cabinet engage in monthly reviews and oversight of results.
2442 The Finance Office provides regular updates to the Executive Committee and full reports to the
2443 Board of Trustees (see fiscal reporting pages 22-23 of the 4/24/22 - 4/25/22 Board Meeting
2444 Agenda Packet [HERE](#)). While monitoring the annual budget through fiscal reporting is integral
2445 to financial stability, the University also utilizes fiscal modeling of a three-year forecast ([HERE](#))
2446 as projection and contingency planning. To fully support sustainability, the University
2447 consistently plans on a three-to-five-year basis. This includes a periodic profitability review of
2448 each major program conducted through the offices of Finance and the Senior Vice President for
2449 Academic Affairs/Provost. This thorough cross-functional analysis provides for multiyear
2450 planning to guide new academic programs and strategic initiatives. This fiscal forecast is
2451 developed in conjunction with the annual budget and provides reconciliation with overall fiscal
2452 strategies.

2453 All these controls and processes culminate annually in the production of a series of audit reports
2454 including Husson’s annual financial statement audit, ([HERE](#)) federal grants compliance audit

2455 ([HERE](#)), and retirement plan audit (403b audit) ([HERE](#)). These reviews assure compliance with
2456 GAAP and other regulatory requirements of the University.

2457 **Financial Services Staff**

2458 In addition to the strong oversight, policies, and internal controls described above, Husson had a
2459 long-serving CFO for the last 13 years who recently retired in December of 2021. Upon
2460 completion of a national search, the University hired an individual who had served for over 11
2461 years at Francis Marion University, a medium-sized public institution of higher education, in
2462 Florence, SC (See CV [HERE](#)). Currently, within the Finance and Business office, the
2463 University has two CPAs, one with an MBA, and two additional staff members who hold
2464 MBA degrees. Collectively the Finance and Business office staff have over 50 years of
2465 experience in higher education finance.

2466 **Advancement**

2467 One of the most significant factors behind Husson's asset growth over the last 10 years has been
2468 the University's advancement and alumni relations department. This team has grown over the
2469 past ten years and plays a significant part in the University's financial health. This evolution in
2470 the department was a critical strategic move as the University had never engaged in a
2471 comprehensive capital campaign, and the University's ambitions required additional resources.

2472
2473 In 2011, the consulting firm Bentz Whaley Flessner completed a Campaign Readiness and
2474 Feasibility study generating comprehensive plans that have only recently been implemented, due
2475 to challenges in staffing and technology. Husson's advancement and alumni relations department
2476 has upgraded from the Sage 50 software platform to Blackbaud's Raiser's Edge software. This
2477 new software is the leading advancement software and allowed Husson to develop and refine a
2478 well-developed procedure manual to improve reporting and constituent/gift management
2479 effectiveness. This significant improvement in the consistency and accuracy of data has allowed
2480 for better tracking of historical information. Additional software has further assisted growth.
2481 Two examples include Donor Centrics, which allows for the comparisons between Husson and
2482 similar institutions, and Fundriver, which helps provide an improved system for releasing and
2483 tracking restricted gifts and assists in collaboration with the Finance office. The enhanced
2484 technology has led to significantly improved analytics and reporting to all stakeholders,
2485 including donors.

2486
2487 The 2011 Campaign Readiness and Feasibility study also carried a recommendation for a \$21
2488 million comprehensive capital campaign. This goal was adopted by the Board of Trustees.
2489 Subsequently, due to early successes, the goal was raised to an aspirational \$30 million, and a
2490 new College of Business building was added to the campaign goals.

2491
2492 In December 2019, Husson University completed this campaign raising a total of \$37,988,400 in
2493 new commitments (cash, pledges, and future bequest intentions) from 5,746 donors. A

2494 significant highlight of the campaign included raising \$10.7 million in new commitments to
2495 endowment. The impact of this may be seen in the “Cash & Investments per student” line of
2496 NECHE Financial Screening. These commitments were predominately endowed through
2497 scholarships, but also included a planned gift to endow the first faculty chair in the College of
2498 Business. Husson also raised almost \$19 million for capital projects with most of these funds
2499 allocated to the construction of Harold Alfond Hall—the new home of Husson’s College of
2500 Business. This building provided key physical space needed to accommodate the growth of
2501 Maine’s largest college of business as well as provide the updated technology needed for today’s
2502 students. Due to the campaign, the building was constructed without incurring any new debt.
2503 Finally, a lead \$1 million gift from an anonymous donor provided Husson the opportunity to
2504 launch the School of Technology and Innovation with a state-of-the-art extended reality
2505 program. In June of 2022, Husson received an additional \$2.2 million from the Harold Alfond
2506 Foundation in program start-up funds to help the University market and accelerate the new
2507 technology program.

2508
2509 Husson’s trend for the total number of donors has steadily increased in the last decade. In 2012,
2510 there were 1,438 total donors. In 2022, Husson received donations from 1,790 different donors, a
2511 25% increase. Likewise, while varying greatly from year to year based on the timing of major
2512 gifts, our trends for attracting new gift commitments have steadily increased. In 2012, at the start
2513 of the capital campaign, Husson raised \$2.3 million and since then has raised between \$4.7 and
2514 \$9.7 million per year. This trend of increasing participation can also be seen in the successful
2515 Giving Day program. The program encourages constituents to give to the area of campus that
2516 means the most to them. Husson engages faculty and students in planning, promoting, and
2517 participating in Giving Day, and each of the four years of the program has outpaced the previous
2518 year’s success. For 2022, Husson received 1,471 gifts from 1,244 donors and raised a record
2519 \$177,333. 160 employees and 311 students made donations on that day. Of the 420 alumni gifts,
2520 130 came from alumni who graduated within the last 10 years.

2521
2522 Husson’s advancement and alumni relations department works with university and community
2523 leadership to identify strategic needs that will appeal to the donor base. For example, Husson
2524 recently raised \$588,000 in private philanthropy to support the \$2 million renovation of all the
2525 undergraduate science labs, a critical need as Husson looks to expand the health science
2526 programs and further develop opportunities for those wishing to pursue careers and research in
2527 STEM fields.

2528
2529 The University has also received several grants to add resources to its financial portfolio and
2530 operational undertakings. Two grant awards come from the Maine Department of Education. The
2531 first, for \$200,000, is for career mentoring which develops internship opportunities in the areas
2532 of STEM and seeks to keep students in the State of Maine for long-term employment. The
2533 second grant from the State of Maine is for 1.6 million dollars and provides for the creation of a

2534 3-year accelerated BSN degree completion program. By the third year of the grant, this program
2535 is designed to have recruited an additional 75 students into the Nursing program. Through the
2536 MELMAC Educational Foundation, the University received a \$50,000 grant to advance an Open
2537 Educational Resource initiative to reduce costs and promote inclusivity. The Davis Educational
2538 Foundation awarded Husson a grant for \$207,000, the third grant from this foundation. This
2539 grant allows Husson to deliver ongoing faculty development in the areas of course design,
2540 pedagogy, and assessment. The Davis Foundation had previously supported Husson University
2541 initiatives related to student success and General Education revisions. Husson University has
2542 also received grants from the NIH, FDA, and USDA for research relating to the gut biome, drug
2543 delivery using cell-homing exosomes, and drug transfer into human milk. As noted in previous
2544 standards, the most significant grants have come from the Alford Foundation which provided \$4
2545 million toward the College of Business Building and an additional \$2.2 million to support the
2546 expansion of programming within Husson's School of Technology and Innovation. As part of
2547 this grant agenda, the University has also submitted competitive applications for TRIO, HRSA,
2548 and Title III to provide support for at-risk students and to improve retention. Husson anticipates
2549 continuing to compete for these grants.

2550

2551 **Appraisal**

2552 Data from the past ten years, including the Data First forms for Standard 7 reveal that the
2553 University continues to rely on its conservative financial approach to preserve and enhance
2554 available resources in support of the mission. While the fiscal year 2022 resulted in a decline of
2555 net assets of \$465,664, this is the first year within this NECHE review cycle that the University
2556 experienced an operating deficit. As can be seen per section 7.5 of the Data First forms, the
2557 University has over five months of available cash on hand and a current ratio of 1.68.

2558 Despite the pandemic, the Board and administration have been diligent in investing in operations
2559 of the University that diversify resources, enhance endowment and investment funds, all while
2560 seeking operational efficiencies that strategically and fiscally make sense.

2561 Husson has ensured fiscal stability through careful stewardship of resources and prepared for
2562 what is now before us with the continued pandemic and enrollment challenges. Since 2020,
2563 Husson has purposely expanded online learning opportunities to diversify our revenue, allowing
2564 the University to move beyond its historic recruiting regions. This modality development,
2565 coupled with trending and desired programs in E-Sports technology and various other innovative
2566 programs will continue to differentiate Husson as we seek to attract students to our campus and
2567 programs. Despite all the unforeseen financial circumstances and the fiscal opportunities brought
2568 on by the pandemic, proper planning and management of resources coupled with significant
2569 federal funding have poised the University to endure the population decline in Husson's primary
2570 market.

2571 The results from the 2022 NECHE Financial Screening, seen in Figure 7.1, are highly
 2572 informative yet do not account for the investments Husson has made in its academic programs,
 2573 delivery of services, and substantial growth of financial and capital assets. As of 2022, the metric
 2574 of cash and investments per student remains to be our sole red flag with a new warning
 2575 associated with total resources to operations.

2576 Screening metrics have worked well to support our notes of improvement in our single red flag
 2577 related to the student-to-wealth ratio which our Advancement Team has worked over the last
 2578 decade to improve coupled with frugal operational management. The data for 2020 and 2021
 2579 support the infusion of federal funds and our warning flags support the fact that enrollment
 2580 declines in part largely due to the pandemic persist. All the while cash flow, liquidity, and low
 2581 cash-to-debt ratio remain strong and agile as we adjust resources and operations to seek
 2582 enrollment returns to pre-COVID levels.

2584
 2585 Market revenue and durability remain concerns for Husson. The University sees that the decline
 2586 in available students entering the market has and will continue to press the University for
 2587 additional scholarships and discounting, while inflation will necessitate fee structure increases
 2588 for marginal gains. To expand opportunities for increased and diversified revenue, the
 2589 Hospitality Manager has been working to increase the use of campus space from outside
 2590 resources. These external rentals produced \$92,272 in 2021 and \$222,468 in 2022 YTD. In

2591 addition to this, the University has grown housing and auxiliary revenue over the last decade
 2592 with the investment in residence halls restroom renovations (\$7.5M) and development of the
 2593 Darling Learning Center Suites in 2012 (\$12.1M) and the townhouses in 2018 (\$6.5M) and
 2594 multiple dining venues.

2595 Figure 7.2 depicts the preliminary results of FY22 that were presented to the Board of Trustees
 2596 on 7/17/22, reporting operating revenues of which net tuition and fees constitute 72% of our
 2597 operating revenue. Though this shows our dependency on this revenue source, the University has
 2598 diversified within this sector through the addition of undergraduate, graduate, and online
 2599 programming, which reduces dependency upon a single sector. Additionally, it is important to
 2600 note that while comparatively above the four-year not-for-profit average for tuition and fees,
 2601 Husson trends well with its peers when looking at all revenues and the diversification of such,
 2602 even as the University has contained tuition increases at or below industry averages.

2603 *Figure 7.2 Preliminary FY22 Revenue Report to BOT on 7/17/22*

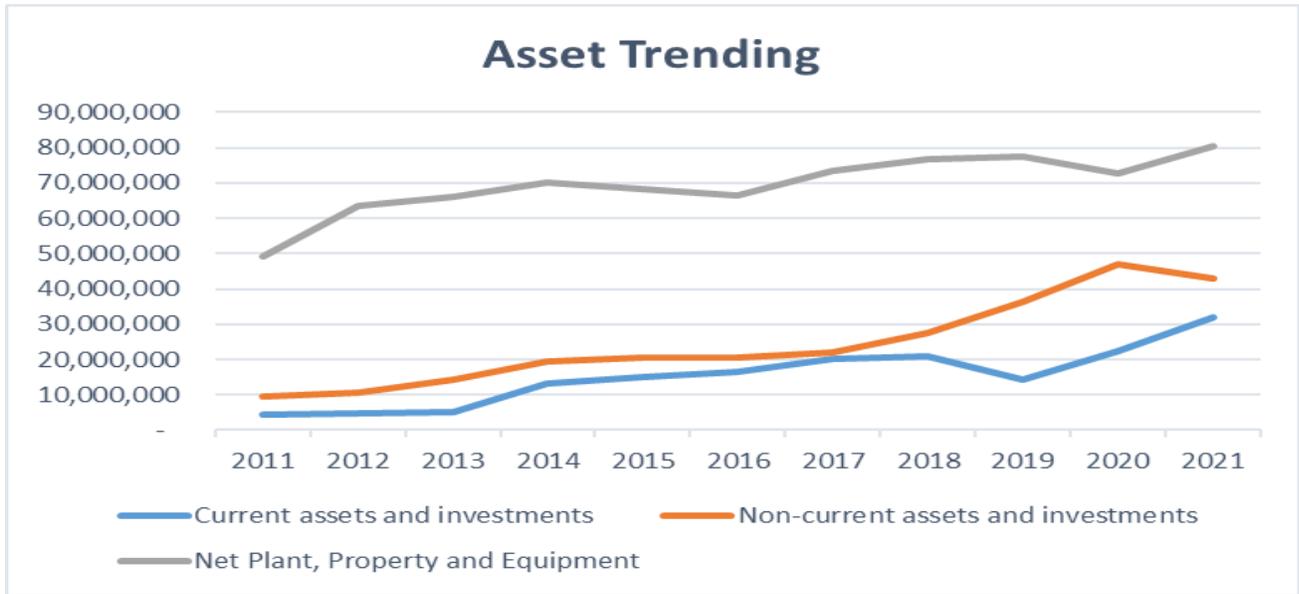

2604
 2605 The University’s major accomplishment over the last decade while not highlighted in the 2021
 2606 NECHE Financial Dashboard is visible within Figure 7.3, which depicts the University’s 10-year
 2607 asset trending/growth. Significant advancements in fundraising, capital asset, and facilities
 2608 investment, as well as significant growth in cash and reserves, are evident in this figure.

2609
 2610

2611

2612 *Figure 7.3 10-Year Asset Trending*

2613

2614 Current assets have seen a positive 604% change; non-current, a positive 353% change; and
2615 Plant, Property, and Equipment, a positive 63% change over the last 10 years. Moreover, the
2616 University has seen growth specifically in diverse areas as seen in Table 7.4:

2617 *Table 7.4 Ten-Year Growth Highlights*

	FY11	FY21
Cash	142,691	25,069,389
Board Designated Investments (Reserves)	2,555,172	7,789,120
Grants	320,720	3,446,759
Pledges	510,151	3,073,536
Long Term Investments	8,289,479	26,774,357

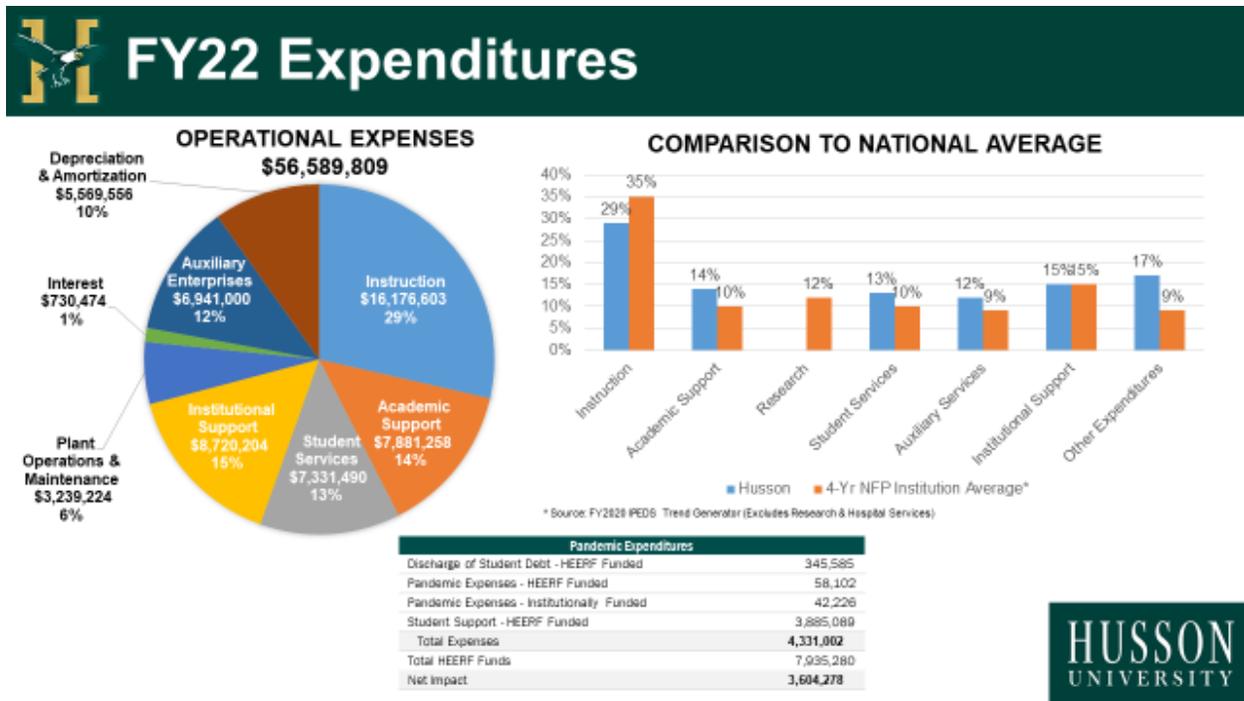

2618

2619 This growth is a direct result of sound financial management over the covered period. Much of
2620 this success will be seen as due in part to Advancement/Fundraising activities since the
2621 development of our Advancement Office in 2011.

2622 In terms of the allocation of resources, Figure 7.5 highlights that 43% of total expenditures in
 2623 FY22 were dedicated directly to academic support (14%) and instruction (29%). Looking again
 2624 at national averages, peer institutions report instruction and academic support of approximately
 2625 45%. Additionally, it is worthwhile to note that Husson's student services constituted 13% while
 2626 the peer national average held only 10%. An important note of Husson operations is that all
 2627 auxiliary operations of housing and dining services remain in-house. Looking at Husson's annual
 2628 spending on students, approximately 68% of annual costs are invested in the academic and
 2629 student life experience of students (Instruction, Academic Support, Student Support, and
 2630 Auxiliary Services), while nationally this is only 64%.

2631
 2632
 2633

Figure 7.5: Planned Expenditures in FY22

2634
 2635
 2636

Internal Financial Metrics for Success

2638 Husson strives annually to reach financial goals and measures its sustainability by three factors:
 2639 accessible cash (it is important to distinguish from cash-on-hand given Husson's use of sweep
 2640 accounts and line of credit); the growth in the endowment fund; and the management of debt.
 2641 Husson conducts an annual budget process with a goal of better than breakeven core income and
 2642 strives to meet 2% of unrestricted revenue as a benchmark. Since the interim NECHE report in
 2643 2018, the University has closed three out of four years with an unrestricted operating income (all

2644 exceeding half a million). Board reserves (largely the Stabilization fund) have grown from
2645 \$7.7M in 2018 to \$10.6 currently (June 2022). Additionally, Husson strives for days of cash on
2646 hand (unrestricted) equal to or greater than 180 days growth in the University’s stabilization fund
2647 (Board Reserves), typically generated from the prior year’s surplus. Compliance with debt
2648 covenants, most notably a debt service coverage ratio that at a minimum exceeds 1.35 with a
2649 goal of 2.5– 3.0.

2650 Other Significant Events

2651 As with the vast majority of higher educational institutions, COVID-19 presented serious
2652 financial challenges for Husson. It resulted in a cumulative actual and opportunity loss in FY20 –
2653 FY21 of more than \$7M in student revenue based on loss of room and board, decreased
2654 enrollment, and increased cost of fulfilling COVID-19 protocols. Without federal aid, the
2655 University would have demonstrated an actual net income loss of less than -\$2M in FY21 and
2656 broken even in FY20. However, in a clear demonstration of its commitment to the Husson
2657 community and as a reflection of its efficient operations, the University maintained all
2658 employees and staff and applied for and received a \$5.9 million Payroll Protection Program
2659 (PPP) loan.

2660 The University sought forgiveness of the PPP loan in 2021 and was initially denied forgiveness
2661 in December of 2021. As of this report (December 2022), the university is still appealing this
2662 decision. In an interim decision issued by the SBA’s Administrative Law Judge (ALJ) in August
2663 2022, the SBA was directed to forgive the University its loan; however, the SBA has petitioned
2664 for this decision’s reversal. In addition to this, the University ended the fiscal year 2022 audit
2665 reporting with a loss of net assets of \$465,665 which primarily resulted from a change in net
2666 assets from operations of \$1.3 million -(unrestricted asset losses). The University has relied upon
2667 revenue from federal funding in the past two years to offset –loss presentation on the financial
2668 statements. Unfortunately, these revenues are no longer available to address our programs’
2669 structural deficit for the fiscal year 2022. While new student enrollments are noted to be over
2670 targets for fall 2023, the University projects that it will operate in a fiscal deficit for FY23 based
2671 on Husson’s existing three-year forecast particularly due to the smaller cohorts enrolled during
2672 the pandemic. While the structural deficit will continue, the forgiveness decision of our PPP loan
2673 of \$5,965,000 would benefit our financial future should the ALJ’s initial decision be upheld.

2674 Conclusion

2675 Despite its strong reliance on tuition dollars, Husson has performed well, growing its assets
2676 substantially over the last decade. Looking forward, as we continue to rebound from the
2677 pandemic, the continued enrollment cliff, inflation, and worker shortages, Husson will for the
2678 next few years struggle to cover necessary increasing costs of operations, without fee increases
2679 or reliance on reserves to balance the budget. Husson continues to have one of the lowest net
2680 tuitions for a private institution in the state of Maine. The structural deficit as noted by the three-
2681 year projection will continue at least into the fiscal year 2024. As we invest in new programs,
2682 and online modalities to respond to the ever-changing demands of higher education, and

2683 enrollments return to pre-COVID-19 levels, current forecasts show us emerging from our
2684 structural deficit in FY25. Looking forward, Husson has sufficient reserves to address the
2685 projected deficits, even as we recognize the realities of cost inflation and labor market wage
2686 demands.

2687 The University's improved budgeting and forecasting since the last interim report and self-study
2688 demonstrate the necessary due diligence to affirm confidence in its ability to sustain its mission
2689 despite existing external circumstances. The engagement of the Board of Trustees; the
2690 President's commitment to transparency in communication to the campus via town halls, letters,
2691 and monthly updates at faculty forums; Husson's reporting to constituencies; and Husson's
2692 multilevel commitment to careful stewardship of resources, give credence to the University's
2693 commitment to its cause. Husson has installed all the tools necessary and amassed financial
2694 resources to properly pull through the many troubles that surround higher education at this time.

2695 Information, Physical, and Technological Resources (7.21-7.26)

2696 IT

2697 Description

2698 As seen in Data First Form 7.7 and alluded to in 7.6, Husson University has invested heavily in
2699 providing access to information through technology. This is seen in the achievement and
2700 maintenance of at least 10GPS on campus and 5GPS off-campus broadband access that has
2701 been achieved and maintained since 2019. The array of technology provided to faculty and
2702 students, and the upgrades to the campus internet infrastructure, will be outlined further in this
2703 section. Data First Form 7.7 clearly shows the consistent commitment Husson has shown to
2704 achieving and maintaining a sound digital footprint.

2705 The Husson University IT Department operates within a scalable departmental structure to
2706 ensure IT human capital resources are staged to scale and support Husson's mission statement
2707 with future University growth. IT service delivery is executed within the ITIL (Information
2708 Technology Infrastructure Library) set of best practices including formal processes for incident,
2709 change, problem, and release management The workroom also provides policies concerning
2710 continuity and disaster recovery ([HERE](#)). Additionally, as noted in Standard 2, in 2017, the IT
2711 department developed a five-year IT Transformation Roadmap, as well as a comprehensive
2712 annual strategic plan with 15 Key Performance Indicators (KPIs) that includes initiatives that
2713 ensure that the University meets its compliance obligations. IT currently manages compliance
2714 obligations in its Compliance Automation Platform. IT played a crucial role in Husson's
2715 COVID-19 response in ensuring all faculty had the necessary software and hardware to deliver
2716 instruction in a temporary online format and by extending Wi-Fi access to Husson parking lots
2717 so students could access the internet from the safety of their cars should they not have sufficient
2718 access to the internet at home.

2719 Husson University has policies and procedures in place to ensure the reliability of technology
2720 systems, the integrity of data, and privacy policies include the Acceptable Use, Email, Social
2721 Media, Risk & Compliance Training, Password, Incident Response, Technology Acquisition,
2722 and Privacy policies, all of which are available to the self-study team in its workroom ([HERE](#)).
2723 Husson has controls in place to monitor for illegal and/or inappropriate use of technology
2724 systems and resources. Controls include automatic blocking of access to inappropriate and/or
2725 malicious websites and assets and blocking the transmission of protected data such as social
2726 security numbers, banking information, and credit card information. Finally, IT utilizes a
2727 ticketing system and a strategic planning platform that allow for the evaluation of current needs
2728 and services and carries that information forward into the strategic and budgetary planning
2729 process.

2730 IT also utilizes consultants to help identify and address current and future needs. This is
2731 evidenced by the 2018 work with CampusWorks which conducted interviews with stakeholder
2732 groups regarding campus readiness for a new ERP/SIS system (Husson utilizes CAMS, an SIS
2733 from Three Rivers Systems) and made recommendations for Enterprise replacement. While
2734 Husson ultimately decided not to retain this consultant in the ERP replacement process, the work
2735 conducted led to many new initiatives to strengthen the IT infrastructure, improve data
2736 governance, and prepare for an eventual ERP replacement. Specifically, due to this consultant
2737 interaction, IT re-implemented CAMS Administrative Group with monthly meetings and
2738 broadened membership to include all relevant stakeholders. Husson engaged another consultant,
2739 3D Tech (CAMS SME) for an initial Optimization Assessment and an Extended Optimization
2740 Assessment. These initiatives yielded 70+ action items to remediate CAMS/ERP environment
2741 and workflows. Items were prioritized and the majority were remediated within 18 months,
2742 including four complex issues needing assistance from 3rd party vendors. IT also successfully
2743 implemented CAMS upgrade/patch cycle and cross-training for IT professionals to provide
2744 better support and functionality.

2745 IT continued to utilize outside guidance for informing data governance. In 2019, Husson retained
2746 Berry Dunn, an accounting/consulting firm, to inform the continued data governance
2747 conversation and advised Husson to maintain a single cohesive group for data governance as
2748 opposed to a dispersed model. Berry Dunn has completed the first phase of its consulting efforts
2749 to examine the market and feasibility of replacing CAMS.

2750 **Appraisal**

2751 In 2021, IT processed its 50,000th help desk ticket with a six-year Customer Satisfaction rating
2752 of greater than 97%. In both 2020 & 2021, its year-end Customer Satisfaction rating was 99%.
2753 Additionally, IT completed 90% of the goals outlined in the FY 17-21 5-Year Transformation
2754 Road Map and met all KPI targets in FY 2021. Each year, IT controls are audited as part of our
2755 annual Financial Audit (Gramm-Leach-Bliley Act Compliance). In compliance with the Gramm-
2756 Leach-Bliley Act, external auditors have positively affirmed the efforts of IT. In 2021, Husson

2757 also implemented a dual authentication system and is currently in the process of revamping its
2758 response to secured information sharing.

2759 With respect to information infrastructure, the University's enterprise student information system
2760 (CAMS by Three Rivers Systems Inc.) has exceeded its operational lifespan and plans are
2761 underway for this system to be replaced. Husson has hired an outside consultant (Berry Dunn) to
2762 provide a recommendation to address the challenge of replacing this aging system. Currently,
2763 Husson is maintaining this system through a variety of upgrades and is managing the risk
2764 accordingly until the University is prepared (both financially and in data structure and
2765 organization) to transition to a new system. The appraisal and projection in Standard 3 reflect the
2766 University's insight about the impact of governance on moving this forward.

2767 **The Library**

2768 **Description**

2769 As seen in Data First Form 7.6 (Information Resources) Husson maintains a physical library with
2770 two dedicated librarians and has prioritized providing access to scholarly material online through
2771 its website. This is in alignment with Husson's mission, as it allows students who may not be
2772 able to access the physical library to have greater access to scholarly material as they become
2773 academically and professionally prepared for their future careers.

2774 The W. Tom and Bonnie Sawyer Library is a supportive discovery and learning environment and
2775 seeks to foster the learning and research endeavors of the Husson community with diverse,
2776 accessible resources as well as responsive and inclusive services and spaces. The library is
2777 located on the second floor of Peabody Hall, and it has approximately 100 seats and areas for
2778 both quiet and collaborative study, including four group study rooms. When classes are in
2779 session, the library is open daily for a total of 90 hours a week, including availability until
2780 midnight Sunday-Thursday. The library staff includes the full-time University Librarian, the full-
2781 time Resource Discovery and Access Librarian, and approximately 25 student assistants during
2782 the academic year (two in the summer). The University Librarian is responsible for library
2783 management and administration, user services, budgeting, and planning, as well as collection
2784 development. The Resource Discovery and Access Librarian is responsible for technical
2785 services, access, and discovery services, and educating in Library services and managing the
2786 student assistants. Student assistants staff the service desk in order to help, direct, and refer
2787 patrons. They also assist with interlibrary loans and other back-office tasks and projects.

2788 In addition to onsite print books, journals, and media collections, the library provides access to
2789 databases, journals, eBooks, and other online resources through its portal ([HERE](#)). Off-campus
2790 access to all online resources for members of the Husson community is facilitated via a proxy
2791 authentication system. Online subject guides provide convenient and customized guidance on
2792 how to search and access library databases, books, journals, and other resources. "How-to"
2793 guides cover such topics as citing sources and accessing interlibrary loans.

2794 Interlibrary loan services provide access to materials not owned or licensed by Husson
2795 University. Physical materials may be searched for and requested through the Minerva catalog as
2796 well as the larger, statewide MaineCat catalog. Through a statewide delivery system, requested
2797 items arrive at the library on Tuesdays and Thursdays every week. For journal articles and
2798 physical materials not available through Minerva/MaineCat, the library is a member of both
2799 DOCLINE and OCLC, two systems that connect libraries for resource sharing throughout the
2800 country and beyond. The typical turnaround time for journal article requests is two to three
2801 business days.

2802 Librarians collaborate with the deans, chairs, and faculty on collection development to help
2803 ensure library resources meet the teaching and learning needs of both online and face-to-face
2804 programs (evidence of this may be seen in the recent Pharmacy Faculty Survey [HERE](#)). Usage
2805 statistics are gathered for existing resources, including online subscription usage, and are used in
2806 collaboration with departmental feedback to make renewal decisions and to inform additional
2807 needs. New resources are considered with decisions made based on factors such as uniqueness,
2808 accreditation requirements, University priorities, and cost.

2809 Librarians provide point-of-need support and assistance with access and research to all members
2810 of the Husson community in person, as well as by phone, email, and Zoom. Librarians play a
2811 role in fostering students' development of information literacy skills through guides and video
2812 tutorials available on the library's website, and by collaborating with faculty to design and
2813 deliver library-related in-class instruction and embed instructional materials in Canvas.

2814 [Appraisal](#)

2815 The Sawyer Library, guided by the Association of College & Research Libraries' Standards for
2816 Libraries in Higher Education ([HERE](#)) and the University's vision, mission, and strategic
2817 initiatives, is continuously evolving to meet the teaching and learning needs of the Husson
2818 community.

2819 The library's central location on campus, in the main academic building, makes it a destination
2820 for students who need individual, quiet study, as well as group study and workspaces. In
2821 response to these various needs, the library has made improvements to the physical facility,
2822 including dedicating a wing of the library to quiet study, adding four small group study rooms,
2823 and investing in a variety of new furnishings. Future plans include the partitioning of a wing to
2824 create a quiet study room to ensure this environment exists on campus for students who need it.
2825 Additionally, consideration is being given to better climate control within the facility.

2826 Through strategic and collaborative collection development efforts, as well as prompt interlibrary
2827 loan services, the library is meeting the basic research needs of students and faculty at Husson
2828 University. Support for the teaching and learning needs of new and expanding programs, as well
2829 as faculty research endeavors, continues to receive the necessary support from the University
2830 with regard to library materials. In anticipation of growth in online programming, the Sawyer

2831 library is considering a number of options to respond to evening and weekend research support
2832 needs. Options range from additional staffing to a 24/7 chat service. Future revenue and
2833 budgetary considerations will help refine the actual response.

2834 Collaborative relationships with faculty are essential to the infusion of information literacy
2835 instruction into the curriculum. Foundational orientations and assignment-specific instruction is
2836 being offered (with new opportunities actively sought), and a series of research skills badges
2837 ([HERE](#)) (which may stand alone or be integrated into courses) were developed and launched in
2838 Fall 2022.

2839 In spring 2022, the library launched an Appreciative Inquiry endeavor to gather ideas from
2840 students and faculty pertaining to this key question: *How can the Sawyer Library optimize its use*
2841 *by, and usefulness for, the Husson University community?* Through this community input
2842 process, strategic directions have been identified and prioritized, which will guide improvement
2843 efforts moving forward.

2844 Physical Facilities

2845 Description

2846 Since the last self-study, Husson has enhanced its physical facilities in a fashion that addresses
2847 deferred maintenance paired with new construction. Over the past ten years, Husson has had
2848 substantial growth in physical facilities. As alluded to in Standard 2, strategic planning has
2849 guided this growth, and all work orders and auxiliary services are monitored very closely
2850 through the means of dash-boarding of Key Performance Indicators (including personnel and
2851 non-personnel costs, timeliness, consumer satisfaction, etc.) aligned to Husson University's
2852 strategic initiatives ([HERE](#)).

2853 *Campus Housing and Dining Upgrades*

2854 Three residence halls received \$7.5 million in bathroom renovations such that individual units
2855 have replaced communal facilities. These individual bathrooms provided much-needed
2856 renovations and served to support gender identification preferences while enhancing student
2857 privacy.

2858 In 2016, Husson University began construction on three townhouse-style residences to expand
2859 the housing options for upper-class students by 72 beds. This construction was completed in
2860 2017 with a total value of \$6.5 million and was necessary to support the growing demands of
2861 alternative-style housing for on-campus students.

2862 In 2012, the dining commons were renovated to allow Husson University to serve more meals
2863 with an increase in hours through the use of multiple food stations. Renovations also allowed for
2864 the addition of "To Go" options. The flexibility of services derived from this renovation helped
2865 foster the student-centered approach of dining services at Husson such that COVID-19
2866 challenges were met with residential hall delivery service efforts.

2867 *Athletic Upgrades*

2868 The Robert & Frances O’Keefe Softball Field added a press box with storage and two additional
2869 bleachers. This increased the capacity to nearly 300 and addressed accessibility. As a result,
2870 Husson has been able to host the NAC Softball Championship Tournament from 2008-14, and
2871 again in 2017 and 2018. The Boucher Field, home to Husson’s men’s & women’s soccer and
2872 lacrosse programs was refitted with FieldTurf artificial surface in 2020 to better support student-
2873 athlete safety. This project represented an investment of nearly \$800,000. The Winkin Sports
2874 Complex, home of the football, baseball, and field hockey teams, added a new press box in 2015
2875 and installed new Field Turf in 2016 with investments to the drainage system, fencing, and
2876 scoreboards. In 2016 Husson opened the new Wight’s Strength and Conditioning Facility in the
2877 Newman Athletic Facility, containing 2, 200 square feet of space for free weights, exercise
2878 machines, and other workout accessories.

2879 *Classroom, Academic Buildings, and Wellness Upgrades*

2880 In 2015, the Wadleigh Academic Center was constructed in the Newman Athletic Facility to
2881 further support student-athletes preparing for academic success. Alumni and community
2882 stakeholders helped fund this project.

2883 The new Wellness Center was constructed in 2019 to both support the healthcare academic
2884 programs such as Nursing and Counseling, and to support the physical and mental wellbeing of
2885 students. This site also provides experiential opportunities for students within healthcare fields.

2886 The opening of the College of Business Harold Alfond Hall in the fall of 2021 ([HERE](#)) also
2887 reflects the resiliency of Husson University in striving toward its mission. President Clark
2888 commented, “This new building has created important new synergies between our College of
2889 Business and the business community in our region. In addition to providing students with best-
2890 in-class business education, Harold Alfond Hall is now the place where community partnerships
2891 are developed that foster economic growth here in Maine.” A press release in the digital
2892 workroom provides more background on Harold Alfond and his relationship with the Husson
2893 community ([HERE](#)). The Harold Alfond Hall makes the College of Business at Husson
2894 University the center of an innovative ecosystem and will bring new businesses and new ideas
2895 together in ways that will lead to job growth in Maine. Husson University’s goal is to create a
2896 supportive community that makes Central Maine an attractive place to start a business, or for
2897 out-of-state organizations to move their business, which is in alignment with the University’s
2898 mission as these partnerships will provide the opportunity to prepare students for current and
2899 future careers. Further evidence of this may be seen in the Distinguished Business Speaker Series
2900 hosted at Husson University ([HERE](#)) which provides educational opportunities for students,
2901 alumni and community members on the challenges facing businesses and related professions,
2902 and inspires those who will become our future business leaders.

2903 **Appraisal**

2904 Whether new or old, facilities are constructed and maintained in accordance with legal
2905 requirements to ensure access, safety, security, and a healthy environment. All of Husson’s
2906 buildings are compliant with building safety codes and NFPA 101 (Life Safety Code). While the
2907 University is grandfathered under ADA for accessibility, Husson has welcomed the opportunity
2908 to upgrade to ADA standards with its renovations. For example, COVID-19 provided the
2909 opportunity for all access doors to be opened via touchless mechanisms. As noted above, the
2910 residential hall bathroom renovations transformed communal space into individualized facilities
2911 with dedicated handicapped units. An initiative is underway to ensure that environmentally
2912 friendly chemicals are used in chemistry labs and by custodial services.

2913 Husson also received the Maine Real Estate and Development Association (MEREDA) 2021
2914 Notable Project award in 2021 for the construction of the Alford Hall. The MEREDA group
2915 indicated “The building was constructed using a holistic approach to sustainable design and the
2916 new building meets or exceeds all International Energy Efficiency Certificate requirements and
2917 exceeds Environmental Protection Agency Energy Star Requirements by 15%” ([HERE](#)) thus
2918 highlighting the quality Husson has been able to construct this new building to accentuate the
2919 speed in which it was constructed.

2920 The University has materially completed the Campus Master Plan of 2016 with only the student
2921 recreation center outstanding at this time. The Board of Trustees, at its Annual Retreat in July
2922 2022, began discussing additional steps and project ideas in preliminary development of its next
2923 master plan. Donor readiness planning is to be considered for a capital campaign to support the
2924 recreational center as the University’s next major project. Further, residence hall renovations, as
2925 well as expansion of the Townhouses, remain items of discussion as Husson continues to see
2926 high resident occupancies.

2927 **Projections**

- 2928 • The University recognizes that employees are its most important assets. Husson strives to
2929 provide a supportive environment and ongoing staffing levels that optimize the
2930 employment and learning environments for the community. It also recognizes that the
2931 strategy of maintaining the cost of human resources, while maintaining affordable tuition
2932 at a highly tuition-dependent institution, requires strategic analysis and planning for long-
2933 term sustainability. Accordingly, in the spring of 2024, the Chief Human Resource
2934 Officer will establish a committee to evaluate the staffing and compensation of identified
2935 peers. The data from CUPA-HR will inform the strategic planning of the University with
2936 the allocation of financial resources for long-term sustainability.
- 2937 • To provide a stronger foundation for long-term sustainability that reduces tuition reliance,
2938 the University will continue to seek broader revenue diversification as potential
2939 opportunities present themselves. The University will continue to carefully monitor
2940 financial 3-year projections to seek to ensure program and process developments meet

2941 goals, expenditure levels remain efficient and effective, and the University returns to
2942 strong profit margins. The opportunities to meet this projection will depend on many
2943 factors external to the University. Ongoing market performance is key, as well as the
2944 ability of the Advancement Office to further foster a culture of giving among alumni and
2945 friends of the University.

- 2946 • To align the library’s appreciative inquiry effort with the strategic undertakings of the
2947 University, in the fall of 2025, the University librarian will assemble a committee of
2948 stakeholders to examine to what extent the goals and objectives of the appreciative
2949 inquiry exercise have been achieved. It will also undertake consideration of the next steps
2950 in aligning the library with the strategic goals and objectives of the University as a whole,
2951 particularly the consideration of academic excellence.
- 2952 • In order to address the institutional risk associated with its current CAMS Student
2953 Information System, during the 2023 spring semester, the University will establish a
2954 committee to develop a request for proposals and review enterprise system products to
2955 formulate recommendations for replacing the current CAMS system. This will be done in
2956 conjunction with establishing a new governance structure for technology resources at the
2957 University as noted in Standard 3 and is part of the strategic planning seen in Standard 2.

These data are those reported annually in the IPEDS Spring Collection Human Resources Survey. This data has not yet been reported to IPEDS for the current year as the data collection period occurs in the spring. The current year data is as of 2022/FA (11/30/22). The "as of 2022/FA" data only contains adjunct instructors that taught in 2022/SS and/or 2022/FA. Previous year values for part-time instructional staff include adjunct instructors that may not have taught for up to 1.5 years as they are not terminated out of our Human Resource Information System for that length of time.

2961 Standard 8 – Educational Effectiveness

2962 Description (8.1-8.10)

2963 Husson University has deliberately fostered a culture of assessment to help ensure the
2964 achievement of academic success outcomes, drive strategic planning and programmatic
2965 improvement, inform public statements, and guide resource allocation. This culture is most
2966 pronounced within academic programs that are subject to specialized accreditation, particularly
2967 in the health care fields, and is also evident in programs without specialized accreditation, e.g.,
2968 the revised General Education curriculum and the ongoing program of assessment for all
2969 academic units to guide programmatic enhancement.

2970 Evidence of the shift in culture towards assessment may be seen in many ways as outlined
2971 below. In 2013, Husson University established the Office of Assessment to help programs with
2972 the increasing demands of accreditation and to support programs and faculty in programmatic
2973 assessment and assessment of student learning. This office has grown to three FTE, which
2974 supports the unique needs of academic units related to the assessment of student learning,
2975 accreditation, and program evaluation. A full listing of services offered by the Office of
2976 Assessment is found on its website ([HERE](#)). The Office of Assessment, along with the Office of
2977 Institutional Research, provides wrap-around support addressing both macro and micro aspects
2978 of program effectiveness.

2979 In 2018, the Deans Council approved a change to the University syllabi template that called for
2980 the inclusion of student learning outcomes (SLOs) and called for detailed information on how
2981 each SLO would be measured ([HERE](#)). In 2021, the Deans Council approved the use of the
2982 electronic syllabus template to further solidify the expectation of alignment between SLOs and
2983 assessment, but also alignment between SLOs, instruction, materials, and assessments ([HERE](#)).
2984 Training for the use of the syllabi template has been provided in multiple formats, but most
2985 noticeably as part of the Faculty Development days in 2021 and through the digital training
2986 library ([HERE](#)).

2987
2988 Between 2015 and 2022, all academic units completed or updated curricular mapping. Links to
2989 each program's curricular map may be found on the Office of Assessment's mapping page
2990 ([HERE](#)) or as a link in the E-Series form ([HERE](#)). This mapping serves as a guide for all
2991 academic assessment activities (both qualitative and quantitative) and indicates the scope,
2992 sequence, and cognitive level or complexity of the intended learning, so faculty more fully
2993 understand where prerequisite skills and knowledge are addressed. This mapping also provides
2994 consistent alignment with the University's mission of preparing students for current and future
2995 careers by ensuring that necessary skills and knowledge are instructed to and rehearsed, ensuring
2996 that alumni are prepared for entry-level success.

2997

2998 To further support faculty in developing courses and instruction that would meet the intended
2999 learning outcomes, Husson provided multiple professional development opportunities. As
3000 discussed in Standard 6, in the fall of 2018, Husson received a grant from the Council of
3001 Independent Colleges (CIC) allowing 49 faculty members to engage in the Association of
3002 College and University Educators (ACUE) program ([HERE](#)). Husson University also
3003 supplemented this program by having a member of the Office of Assessment co-facilitate the
3004 learning sessions and provide group and individual support to all of the participants. The second
3005 ACUE cohort with 34 participants was offered in the spring of 2020. This program focused on
3006 providing opportunities for instructors to apply researched instructional methods in multiple
3007 modalities with aligned materials and assessments in their courses.

3008

3009 Between 2018 and 2021, Quality Matters training was offered to 48 faculty on the Husson
3010 University campus. While Quality Matters is intended for review of online courses, the core
3011 principles of alignment between outcomes, instruction, materials, and assessments are sound
3012 practice in all modalities. Husson University currently has two certified Quality Matters
3013 reviewers who support Husson faculty in the alignment of their courses.

3014

3015 The Office of Online and Distance Learning and the Office of Assessment provided
3016 supplemental professional development opportunities designed to further support faculty
3017 construction of courses with alignment between instruction, materials, outcomes, and
3018 assessments. A four-class series of course design and instruction supported a total of 110 faculty
3019 between 2018 and 2021. These training modules were also refined and delivered as part of the
3020 COVID-19 response to support faculty in maintaining quality courses during the temporary shift
3021 to the online modality.

3022 Examples of the application of this work being used for programmatic improvement and
3023 resource allocation are seen in many locations such as:

- 3024
- 3025 • Specialty accreditation reports for previously accredited programs ([HERE](#))
 - 3026 • The addition of new academic programs such as the 2020 initial approval for American
3027 Board of Physical Therapy Residency & Fellowship Education accreditation of the
3028 Husson Physical Therapy Residency program ([HERE](#))
 - 3029 • The annual reports found for the College of Science and Humanities where faculty of
3030 programs without specialized accreditation report out on their mapping, alignment to the
3031 University mission and assessments of intended student learning ([HERE](#))
 - 3031 • The E-Series form ([HERE](#))

3032 The E-series provides many examples of “closing the loop” between assessment and program
3033 improvement. One example may be seen in the School of Pharmacy. The faculty within the
3034 School of Pharmacy have organized into content areas (Pods) and are using student assessment

3035 data at the categorical level, as well as external assessment data such as the PCOA and NAPLEX
3036 to inform programmatic change. This analysis, along with faculty input, has led to many
3037 programmatic changes including the development of new courses to “overlay” all the APPE
3038 experiences reinforcing intended clinical learning and facilitating NAPLEX preparations with a
3039 specific focus on calculations and obtaining and interpreting patient information.

3040 Another clear example may be seen in the Chemistry program as categorical information was
3041 gathered for all sections of Chemistry I and compared to student performances on the nationally
3042 normed ACS exam. This data was used to inform a shared instructional template and shared
3043 assessment blueprints.

3044 A final example may be seen in the English program. The faculty developed a shared rubric for
3045 EH123 and EH 124 and held multiple workshops with the collaboration of the Office of
3046 Assessment to establish inter-rater reliability. Faculty utilized the rubrics for multiple terms, the
3047 data was collected and analyzed to identify trends in student learning and to modify
3048 programmatic approaches.

3049 This work is also seen in the collaboration between the Division of Online and Distance
3050 Education and each academic unit as the Instructional Designers work with the appropriate
3051 academic programs to ensure that all learning outcomes within the mapping are addressed in the
3052 online section of each course, thus laying the groundwork for equitable outcomes in skill and
3053 knowledge development regardless of modality. This work is seen in the programmatic outcomes
3054 found in the course catalog ([HERE](#)) as well as the course level outcomes of student learning
3055 which may be found in the Office of Assessment mapping site ([HERE](#)).

3056 As discussed in standard 5, Husson University enrolls multiple student bodies in all programs,
3057 modalities, and degree levels, and supports each population through the use of Student Support
3058 Services, Career Guidance, Counseling Services, Tutoring, and Advising. Husson University has
3059 a rich blend of diversity within the student body, including religious, cultural, socioeconomic,
3060 sexual, gender, and geographic diversity. Online students may also receive additional supports to
3061 address any issues of equitable access, such as 24-hour online tutoring ([HERE](#)), remote
3062 counseling services ([HERE](#)), and the use of a professional advising model. Additional diversity
3063 initiatives are supported by the Husson Diversity, Equity, and Inclusion Office. As indicated in
3064 Data First form 8.1, the largest subgroupings that Husson University regularly tracks are first-
3065 generation students and students of lower socioeconomic standing as measured by Pell Grant
3066 eligibility. As seen in the data first forms, Pell-eligible and first-generation students perform
3067 below the Husson average in terms of first to second-year retention (79% for all students in the
3068 most recent year as compared to 73% for Pell recipients and 76% for first-generation students)
3069 and graduation within six years (59% for all students in the most recent year as compared to 52%
3070 for Pell recipients and 52% for first-generation students).

3071 An analysis of progress toward graduation was advanced through a 2018 partnership with the
3072 Gardner Institute where Husson examined gateway courses to guide curricular redevelopment.
3073 The overall rates of DFWX (Dismissed, Failed, Withdrew, X-grade) for entering first-time full-
3074 time students in their first fall term have fluctuated within a range between 9% and 16%, but
3075 Pell-eligible students continue to have higher rates of scores within the DFWX category (22% in
3076 2021/FA compared to the overall rate of 14%). First Generation students performed similarly to
3077 the total population, sharing the same rate of 14% of grades being in the DFWX category in
3078 2021/FA. This data informing the different performance in the Pell-eligible and first-generation
3079 populations has informed the development of competitive TRIO Student Support Services,
3080 HRSA-SDS, and Title III-SIP grants, and informs current retention strategies.

3081 Appraisal

3082 Husson's faculty have ensured alignment between professional standards, the Husson Mission,
3083 program expectations, and student learning outcomes. This is evidenced as being effective given
3084 the success in the licensure rates for the professional programs seen in the Data First 8.3
3085 document, the self-reported job placement in the Alumni survey (of the 2021 alumni, 97% of
3086 responding students who indicated they were sought further education or employment one year
3087 after graduation were successful), and the clear evidence of Husson alumni are contributing to
3088 the Maine workforce as seen from the Maine Department of Labor ([HERE](#)).

3089 All academic programs participate in a continual evaluation to monitor ongoing quality.
3090 Accredited programs submit their accreditation documentation to their respective deans. All
3091 programs without specialized accreditation have been participating in various levels of
3092 evaluation as evidenced by documents from the College of Business and the College of Science
3093 and Humanities ([HERE](#)) and by the E-Series form ([HERE](#)). In the fall of 2022, a comprehensive
3094 plan for assessment was implemented for all programs that include an annual update (template
3095 [HERE](#)) and a cyclical evaluation that would occur generally every five years (template [HERE](#)).

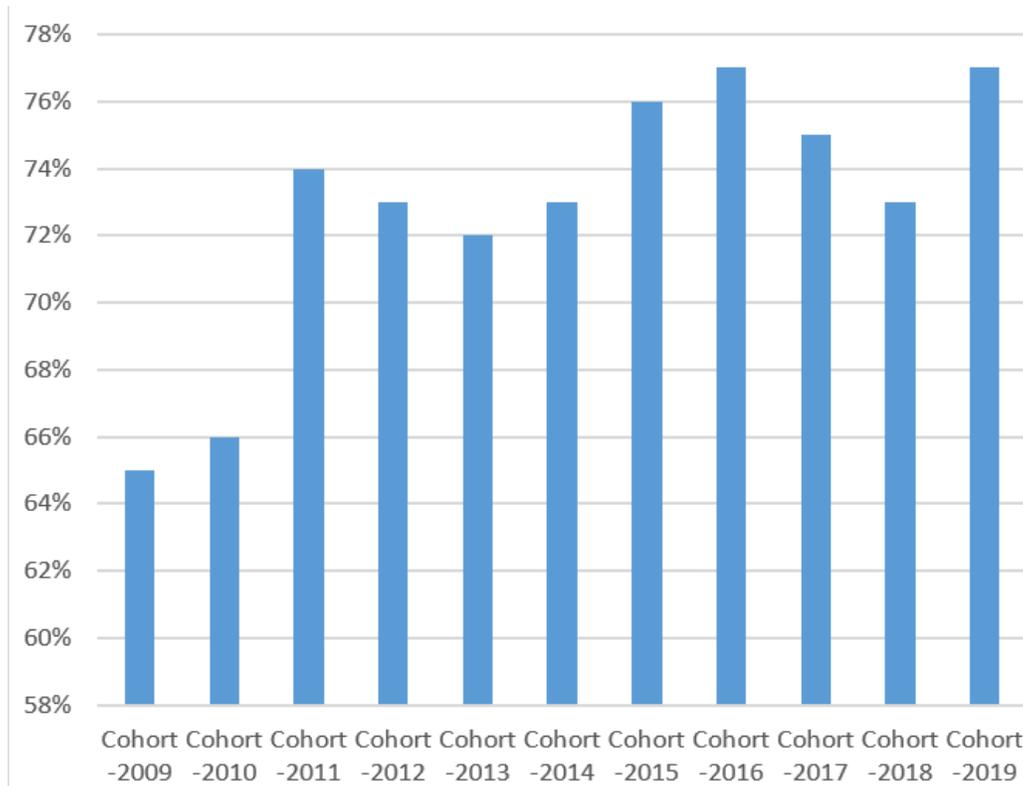

3096 Many professional licensure programs have extremely strong first-attempt passage rates. For
3097 example, the Physical Therapy program has a three-year, first-attempt licensure exam passage
3098 rate of 94%; the combined Nurse Practitioner tracks have a three-year average of 93% first-
3099 attempt passage, and 100% of Clinical Mental Health alumni have passed the certification on the
3100 first attempt for three years in a row. While students are very successful in total passing licensure
3101 rates in all licensure tracks as indicated on Data First form 8.3, some professional programs have
3102 lower first-attempt passage rates. A great deal of effort has been invested by the faculty of these
3103 programs in conjunction with the Office of Assessment, to develop both short-term interventions
3104 and long-term curricular solutions to benefit students. Given the changes to both student-level
3105 factors, curricular factors, and licensure tests themselves, this is ongoing work.

3106 An example of this ongoing work is seen in the Nursing program in their “NCLEX Stability
3107 Project.” To address the lower-than-desired NCLEX first-attempt passage rate within the 2021
3108 cohort, the Undergraduate Nursing program analyzed the available data, including individual
3109 NCLEX performance, Assessment Technologies Institute (ATI) data Mastery Series
3110 assessments, and the ATI predictor examination data. This analysis revealed the students who
3111 were unsuccessful in the first-attempt passage had weaknesses in all NCLEX areas, meaning
3112 there was no one content area to remediate. However, 73% of content area scores for students
3113 who did not pass on the first attempt were at the “Near” or “Above” levels of proficiency,
3114 meaning the attempting students were close to or above in the majority of areas. The results
3115 indicate that students were largely prepared but assistance in raising the level of performance in
3116 each area would be needed. To support these students, the Nursing programs utilized the ATI
3117 Predictor Assessment to identify students who may be at risk of first-attempt failure. This
3118 permitted the faculty and administration to guide targeted remediation for the 2022 cohort. In
3119 addition, Husson allocated resources to contract a live review with ATI for the 2022 cohort.

3120
3121 As a more clearly defined data set becomes available, a detailed analysis of online and face-to-
3122 face student learning outcome attainment will be needed. All online courses developed by the
3123 Division of Online and Distance Education are aligned to the same learning outcomes as the
3124 face-to-face students, and each has a data-gathering mechanism through Canvas or ExamSoft
3125 that will allow for this future analysis.

3126
3127 As indicated in Standard 5, Husson has made significant gains in student retention, which is
3128 notable given the higher rate of Pell awards received by Maine students. Husson’s first-time
3129 degree-seeking population is comprised of 70% Maine students. In Maine, 12.9% of the
3130 population lives below the poverty rate, with 25% of Maine counties having populations of 17%
3131 or higher living below the poverty rate ([HERE](#)). Maine is also ranked 44th of 50 in terms of
3132 economic outlook ([HERE](#)). Forty-five percent of first-time full-time degree-seeking students are
3133 Pell recipients, and 98% receive some form of student financial aid. However, as seen in Figure
3134 8.1, between 2009 and 2019 Husson increased the retention rates of full-time first-time students
3135 from 65% to 77%. This increase is also seen in the population of students who receive Pell
3136 grants. In the past three years, the retention of degree-seeking first-time, full-time students from
3137 the first to second fall term has increased from 71% to 73%.

3138 *Figure 8.1, Husson University Retention of full-time first-time students (IPEDS)*

3139

3140 Retention for first-time, first-year students increases to 89% between second to third fall and
 3141 increases again to 92% between third and fourth fall semesters. Students are more likely to be
 3142 retained toward graduation the longer they persist at the University.

3143 Entry-first-year students and entry-transfer freshmen perform similarly in terms of first-year
 3144 GPA (both share a four-year average of first-year GPA of 2.8) but entry-first-year students have
 3145 a slightly higher average rate of first to second-year retention over the past four years with a 75%
 3146 average as compared to 72% for entry-transfer freshmen. This higher first to second-year
 3147 retention leads to a higher graduation rate (58% average graduation rate over the past four years
 3148 for the entry-first-year students as compared to 52% for the entry-transfer freshmen).

3149 Student-athletes represent a significant portion of the Husson population, and this population has
 3150 a higher first-year GPA (the four-year average of first-year full-time GPA for athletes is 2.9
 3151 compared with 2.7 for non-athletes), higher first to second-year retention (84% four-year average
 3152 compared with 73% for non-athletes), and higher graduation rates within 150% of the time (68%
 3153 four-year average compared with 53% for non-athletes).

3154 Projections

- 3155 • Husson will increase first-time passage for all licensure tests to a minimum of 80% for
 3156 each cohort through the continued examination of licensure exam blueprints, curricular
 3157 mapping, individual course offerings, and programmatic support. This work is already

3158 ongoing for Pharmacy, Occupational Therapy, and Nursing and will continue through the
3159 2022-2023 academic year.

- 3160 • In the summer of 2024, the Office of Institutional Research will perform a comprehensive
3161 analysis of the attainment of intended learning outcomes, retention, and graduation rates
3162 between face-to-face and online programming.

3163

Definition and Methodology Explanations

1	Times to degree are based on 150% of time to graduate.
2	Retention and Graduation rates are based on entering cohorts that include both full and part time students
3	Distance Education Course Completion Rates are percentages of non-failing grades (D- or above) for all courses taught during the academic year.
4	FY2022/23 data is not complete as the semester has not yet ended.
5	Distance Education courses are not generally taken by first-time, degree-seeking students, and therefore retention and graduation rates cannot be reliably calculated.
6	Husson University has phased out course offerings at locations outside of Bangor. Students who had attended outside locations in the past are now taking their courses online.
*	Current year data is not available for this cohort at this time.

3164 Standard 9 – Integrity, Transparency, and Public 3165 Disclosure

3166

3167 Integrity (9.1-9.10)

3168

3169 Description

3170 The Husson community has embraced the preparation for the NECHE visit, including the
3171 utilization of a transparent process of reflection by all stakeholders, distilled into the self-study
3172 and capturing the achievements of the last decade and projecting into the future. One of the
3173 reoccurring themes related to mission and vision is that the stakeholders perceive Husson as a
3174 school dedicated to preparing students through didactic and experiential learning for the
3175 workplace, including emphasis on “soft skills.” These soft skills, including professionalism,
3176 humble service, respectful communication, initiative, and, especially demonstrated during and in
3177 the aftermath of COVID-19, adaptability, are modeled by faculty and staff and practiced by
3178 students. While the 21st century workplace may hold unknowns, Husson’s students will enter the
3179 workforce and society prepared to leverage the skills that embody the Husson character.

3180 The community’s response to COVID-19 shows that the nature of character and humility, along
3181 with a sense of community, is infused throughout the University and provides a foundational
3182 framework for integrity. The University relied upon CDC guidance and science to shape its
3183 response to COVID-19 and consistently strived to communicate fluctuating guidance and
3184 expectations to all stakeholders. The Marketing/Communication office worked to inform the
3185 Husson community with as much transparency as possible, given the rapid changes with the
3186 University's COVID-19 response. This was accomplished through regular email communication,
3187 social media updates, EagleSafe app notices, and updates to the Protect Husson web pages
3188 including COVID-19 FAQ and COVID-19 Dashboard pages.

3189 The University committed to addressing the challenges of COVID-19. Working diligently during
3190 the spring of 2020 and throughout the summer, the University adjusted the academic calendar for
3191 the fall of 2020, allowing for remote examinations and adjustments to events now held remotely.
3192 During this time, there was only one week, immediately before Thanksgiving break, where the
3193 University required students to attend remotely because of COVID-19. Other than that, because
3194 of careful coordination and the dedication of Student Life and Wellness staff, students received a
3195 largely uninterrupted education. The Office of the Provost informed faculty members of students
3196 in isolation and quarantine for purposes of assuring that absences were appropriate for the
3197 circumstances and that students could be accommodated with regard to those absences. It is in
3198 these coordinated and broad-based community collaborations that the University was able to

3199 respond to COVID-19, clearly demonstrating its character while also maintaining the integrity of
3200 its academic programming.

3201 The Office of Safety and Security demonstrates the underpinnings of character and humility that
3202 results in integrity. At the time of the last self-study, the Office of Safety and Security was
3203 functioning as a unit of enforcement. Interactions with students reflected an authoritative
3204 approach, which had a chilling effect on relations with the student body. Given that members of
3205 the department were not sworn officers, instances of enforcement created ethical and perceptual
3206 challenges for officers and, at times, created role confusion in working with the local police
3207 department. In 2015, the department transitioned from an enforcement model to a community
3208 service approach and focused on building community relations and social capital. Enforcement
3209 became development opportunities for conversation and correction which is inline with the
3210 Student Code of Conduct. This community-based model remains at Husson and reflects the
3211 integrity Husson attempts to foster at all levels.

3212 The University approaches regulatory compliance within its community-based, transparent,
3213 supportive setting. For example, in February of 2020, the Bangor Daily News hosted an event at
3214 Husson University's Gracie Theatre with local attorneys posing the questions, "Title IX, Are We
3215 Doing it Right?" The heightened expectations of live hearings with cross-examinations in Title
3216 IX and the applicability of Title IX to employees, as well as the passage of the Maine Statute
3217 relating to interpersonal violence on college campuses in Maine, created a need for ongoing
3218 development of policies to act within the spirit of an environment that fosters support for its
3219 students.

3220 Husson University is committed to the free pursuit and dissemination of knowledge, and
3221 language supporting this may be found in the Faculty Handbook ([HERE](#)). Husson University is
3222 properly authorized to award degrees and carry out all of the functionality of an institution of
3223 higher education ([HERE](#)). As noted in Standard 7, Husson conducts an annual audit of its
3224 financial position and financial aid award efforts. All annual audits are available on the Federal
3225 Audit Clearing House ([HERE](#)) and within the digital workroom ([HERE](#)). Husson has also
3226 properly carried out its fiduciary obligations with respect to investments and management of
3227 grant funding as evidenced in the Data First forms 7.2 – 7.5, and within the audited Grants
3228 compliance report ([HERE](#)). Husson has non-discrimination policies that reflect Husson's mission
3229 and efforts at inclusivity ([HERE](#)). In addition, the grievance policy for students is found on the
3230 University's website ([HERE](#)).

3231 The University has also maintained integrity in its relationship with the Commission and in
3232 relation to all of the expectations as put forward in the NECHE Standards. This is specifically
3233 evidenced in the documentation for all required communications with NECHE and supported by
3234 the ongoing review and documentation of communications with all specialty accreditations,
3235 including the Maine State Department of Education, CCNE, ACPE, ACOTE, CAPTE,
3236 CACREP, IACBE, and ABPTRFE. As noted throughout the self-study, the University positions

3237 itself to meet the challenges and aspirations of its accreditors within the context of its mission of
3238 inspiring and preparing students for careers and lifelong learning. The University has
3239 consistently maintained good standing with all of its accreditors.

3240 Eagle Safe is the official safety app integrated with Husson University's safety and security
3241 systems. The app allows the University to notify the community of emergencies and allows
3242 the community to make requests for support. In the future, Eagle Safe will be adapted to be
3243 utilized for selected groups (such as students who live in individual residence halls) or the
3244 campus at large to improve targeted messaging and to prioritize safety for the Husson
3245 University community.

3246 To help bring about an integrated response to bias-related incidences, the University recently
3247 established a Discrimination and Harassment Incident Response Team and corresponding
3248 complaint module and resolution process to evaluate reports of harassment or discrimination and
3249 ensure Husson University maintains an intellectually productive campus climate for all. This will
3250 provide a better opportunity to entertain reports of harassment and bias-related incidents and to
3251 formulate responses either at the departmental level or at the institutional level. Additionally, the
3252 University is also pursuing restorative practices for building skills to resolve matters informally.

3253 **Transparency (9.11-9.16)**

3254 **Description**

3255 The shift from the Online Program Manager, The Learning House, to developing online
3256 instruction in-house caused Husson to engage in a renovation of its website. The renovation
3257 involved working with an outside consultant and examining the pattern of “clicks” on the
3258 University’s website. The group established a committee and sought feedback from stakeholders
3259 throughout the University.

3260 The University’s website is predominantly structured for marketing purposes to attract and
3261 inform prospective students. With this transition, the University also restructured its intranet to
3262 serve faculty, administration, students, and staff already participating in the University
3263 community.

3264 The University’s renovated website provides readily accessible information to inform
3265 prospective students in making informed decisions with respect to their education. As noted in
3266 the data first forms, the website also provides information regarding the [mission](#), [expected](#)
3267 [educational outcomes](#), [status as an independent not-for-profit university](#), [requirements and](#)
3268 [procedures and policies related to admissions](#), the [transfer of credit](#); [articulation agreements](#);
3269 [student fees, charges](#) and [refund policies](#). Additionally, the website provides information on
3270 [student conduct](#) and procedures for student [appeals and complaints](#). Finally, the website provides
3271 information about the requirements for degrees and academic policies in the Husson [catalog](#).

3272 The Division of Online and Distance Education has its own site that is a direct extension of the
3273 Husson University site. Information that is pertinent to the exclusively online population, such as
3274 online tutoring, is presented on this site for Online and Distance Education while other pages,
3275 such as the registrar's office, are shared.

3276 Through its website, the University also complies with consumer protection regulations as found
3277 in 34 CFR 668. The recently revised regulatory structure relating to distance education and
3278 licensure in other states also demonstrates the nature and cycle of updates to the website. As a
3279 result of the revised regulations, the Office of the Provost worked with the Director of Graduate
3280 Nursing to examine what was required, and communicated with the Director of Digital
3281 Communication to post the necessary information on the website. It is this type of iterative
3282 process that results in updates and maintenance of the University's website.

3283 As part of the iterative process, the Registrar has worked with the Director of Digital
3284 Communications to establish links from the website to the catalog. This type of electronic
3285 linkage helps assure the consistency and availability of information.

3286 The website page "Husson by the Numbers" ([HERE](#)) provides data regarding enrollment,
3287 retention, graduation, and alumni employment within the state of Maine. This data helps inform
3288 program excellence, learning outcomes attainment, and alumni success.

3289 Information on access for people with disabilities is readily available for current and prospective
3290 students, and the campus community. Husson's main website, the EagleConnect intranet, and the
3291 CANVAS learning platform all include modalities to allow students to access information on
3292 applying for accommodations and accessibility information. Accessibility Services, a subset of
3293 the Center for Student Success, was established in 2018, is committed to fostering a culture of
3294 inclusivity for students with disabilities. Through a variety of services, this office establishes and
3295 coordinates accommodations for students with disabilities and supports faculty in their efforts to
3296 practice accessibility within in-person and online spaces. This office also works with residence
3297 life and other campus partners to promote accessibility and coordinate specific accommodations
3298 for students with disabilities throughout campus life, from the time of application through
3299 graduation.

3300

3301 **Appraisal**

3302 The iterative review process keeps the website relevant, vibrant, and highly functional. The
3303 University has achieved an effective measure through its website to support long-term
3304 sustainability. The University could achieve even greater effectiveness if its review of the
3305 website was systematic. Currently, dead links are found by internal users and corrected on an
3306 ongoing basis.

3307 In 2018, Husson University hired a Director of Accessibility Services, a shift from a shared role
3308 model of Disability Services in years past, which has strengthened student accommodations

3309 delivery and broadened student accessibility efforts. The number of registered students receiving
3310 support from these services has more than doubled in the past five years, specifically with
3311 tremendous growth in students seeking test-taking accommodations. In response, the University
3312 developed an accessible space that offers reduced-distraction testing, and adjustable-height tables
3313 among other testing-specific accommodations.

3314 In 2022, the University also added a Success Coach for Accessibility Services, expanding the
3315 support services offered to students. The Success Coach for Accessibility works specifically with
3316 students with disabilities in accordance with its mission of supporting student success. Through
3317 the husson.edu website, students can request accommodations, review documentation guidelines,
3318 and access supportive resources. Residence Life and Accessibility Services work together to
3319 accommodate the growing population of students with residential accommodation needs. The
3320 website provides a clear and informative path for prospective, new, and current students to learn
3321 about accessibility services at Husson (academic and residential) and understand student rights
3322 and responsibilities.

3323 Husson is also seeking to increase transparency while also expanding its brand recognition. To
3324 that end, Creative Communication Associates (CCA) has been contracted to provide an analysis
3325 of Husson's current branding and to provide updated branding for marketing strategies and
3326 website revision. Between March 30 and April 11, 2022, CCA surveyed 1000 internal
3327 constituents and nearly 300 external prospects to gauge Husson's current branding and to
3328 develop updated advertising to more fully capture what Husson represents. Major findings of this
3329 work included that respondents who previously knew of Husson had a favorable view of the
3330 University, and that Husson's strongest features included: experienced faculty in their field of
3331 expertise, Husson's dedication to experiential learning, and the positive relationships from
3332 faculty and mentors. CCA has applied these finding to a new series of marketing materials found
3333 [HERE](#).

3334 Public Disclosure (9.17-9.25)

3335

3336 Description

3337 The University's catalog and website demonstrate the operational excellence and the attributes of
3338 character and humility in a fashion that supports the mission of inspiring and preparing students
3339 for careers within an education informed by the sciences and humanities. They also support the
3340 vision that Husson is: "A university of choice for premier professional programs where students
3341 succeed, experiential learning is championed and global engagement is emphasized." Combined,
3342 the catalog and website along with other university publications, uphold the expectations
3343 enumerated in this section.

3344 The University's catalog ([HERE](#)) begins with general statements including the University's anti-
3345 discrimination policy and lists agencies of accreditation and the status of those programs in

3346 relation to accreditation. The catalog also provides policies relating to academics, admission,
3347 finances, and financial aid. The academic programs are then covered more in-depth along with
3348 the learning outcomes for each of the programs. The catalog also includes a list of courses and
3349 the faculty and showing departmental or program affiliation, as well as listing degrees held and
3350 the institutions granting them. The names and positions of administrative officers, and the names
3351 and principal affiliations of members of the governing board are also noted in the catalog. The
3352 catalog is subject to annual review. Courses that are not current are removed from the catalog.

3353 In addition to the catalog, the Executive Director of Communications coordinates the flow of
3354 information to ensure that the community and stakeholders are aware of new information
3355 regarding Husson. Major press releases from the Executive Director of Communications may be
3356 found [HERE](#).

3357 COVID-19 brought additional forms of public disclosure. Husson University utilized the website
3358 to both inform the faculty and students of protocols (such as what to do if they were not feeling
3359 well or had received a positive COVID-19 test, what the current masking requirements were, and
3360 what was required for vaccinations) and to disclose the current status of infection on campus
3361 through a COVID-19 dashboard. This dashboard was updated regularly at the peak of the crisis
3362 with the number of tests and the number of positive results for the campus population. As the
3363 pandemic waned, reporting moved to a weekly format and was eventually removed after
3364 vaccination requirements were established.

3365 Through ongoing changes to the brand and website, Husson continues to provide information
3366 relating to the student profiles. This information is easily accessed in the Husson by the numbers
3367 site, and additional data for programmatic improvement is found on the intranet site for
3368 Department Activity Reports ([HERE](#)).

3369 The University maintains clear lines of authority for signature and contractual purposes. In this
3370 regard, the University protects its interests as well as those of its vendors.

3371 **Appraisal**

3372

3373 The website and catalog along with all of the other University publications fairly communicate
3374 the essence of the University's mission and purpose and provide a fair representation for
3375 prospective and existing students of the opportunities and expectations to graduate and begin
3376 their careers.

3377 The catalog provides the information and structure necessary to consistently house academic
3378 policies, course availability, and programmatic outcomes. A systematic review of web material
3379 would help ensure that all policies found on individual web pages are in alignment with the
3380 current catalog, which is reviewed by the registrar and all academic deans before the annual
3381 publication.

3382 Projections

3383

3384 • In the Fall of 2023, Marketing will work with individual stakeholders to establish a
3385 cyclical review of web content to ensure the presented information is both complete and
3386 accessible to the community.

3387 • To further ensure all students are being supported in terms of digital and online
3388 accessibility, in the fall of 2024 the Director of Accessibility services, in collaboration
3389 with the academic Deans and Assistant Provost of Online and Distance Education, will
3390 perform an audit of Canvas shells to identify the types of issues that may be present and
3391 provide faculty support and development to address them.

3392

Standard 9: Integrity, Transparency, and Public Disclosure (Public Disclosure)

Information	Website location
Institutional catalog	Husson Catalog
Obligations and responsibilities of students and the institution	Student Conduct Code
Information on admission and attendance	Admissions and Aid
Institutional mission and objectives	Vision & Mission
Expected educational outcomes	Course Catalog
Status as public or independent institution; status as not-for-profit or for-profit; religious affiliation	About: Fast Facts
Requirements, procedures and policies re: admissions	Admissions
Requirements, procedures and policies re: transfer credit	Transfer Admissions
A list of institutions with which the institution has an articulation agreement	Transfer Credits and Agreements
Student fees, charges and refund policies	Tuition and Costs
Rules and regulations for student conduct	Student Conduct Code
Procedures for student appeals and complaints	Student Complaint Policy
Other information re: attending or withdrawing from the institution	Academic Policies
Academic programs	Catalog General Informaiton
Courses currently offered	Catalog Course Descriptions
Other available educational opportunities	Digital Badges
Other academic policies and procedures	Academic Policies
Requirements for degrees and other forms of academic recognition	Curriculum Sheets
List of continuing faculty, indicating department or program affiliation, degrees held, and institutions granting them	Husson Directory
Names and positions of administrative officers	Husson Administration
Names, principal affiliations of governing board members	Board of Trustees
Locations and programs available at branch campuses, other instructional locations, and overseas operations at which students can enroll for a degree, along with a description of programs and services available at each location	N/A
Programs, courses, services, and personnel not available in any given academic year.	N/A
Size and characteristics of the student body	Husson by the Numbers
Description of the campus setting	Visit Husson
Availability of academic and other support services	Campus Life
Range of co-curricular and non-academic opportunities available to students	Campus Life
Institutional learning and physical resources from which a student can reasonably be expected to benefit	Center for Student Success
Institutional goals for students' education	Strategic Plan
Success of students in achieving institutional goals including rates of retention and graduation and other measure of student success appropriate to institutional mission. Passage rates for licensure exams, as appropriate	Strategic Initiative Indcators Report
Total cost of education and net price, including availability of financial aid and typical length of study	Financial Aid
Expected amount of student debt upon graduation and loan payment rates	Strategic Initiative Indcators Report Student Financials
Statement about accreditation	Accreditation

The Husson Directory includes a list of continuing faculty & department or program affiliation. However, degrees held & institutions granting them are listed at the discretion of the faculty member when providing their biography.

3393 **CLOSING**

3394 Husson University appreciates the opportunity to reflect on ten years of growth, the high quality
3395 of its faculty, academic offerings, administrative and fiscal decision-making, as well as its place
3396 in the local community and the community of higher education. Over the last ten years, Husson
3397 University has utilized consistent leadership and a global outlook to withstand the challenges of
3398 rapid societal change, a pandemic, and a declining in-state demographic while staying true to its
3399 mission to inspire and prepare students for professional careers in current and emerging fields.
3400 The transparent process and efforts of the stakeholders to represent the University in relationship
3401 the the NECHE standards and Husson’s own guiding principles, reflect the University’s desire to
3402 continue to meet the projections stated herein, to continue to assess, reflect, make adjustments to
3403 policy and process as necessary, and, as always, to put students at the forefront of every decision.

**AFFIRMATION OF COMPLIANCE WITH
 FEDERAL REGULATIONS RELATING TO TITLE IV**

Periodically, member institutions are asked to affirm their compliance with federal requirements relating to Title IV program participation, including relevant requirements of the Higher Education Opportunity Act.

1. **Credit Transfer Policies.** The institution’s policy on transfer of credit is publicly disclosed through its website and other relevant publications. The institution includes a statement of its criteria for transfer of credit earned at another institution of higher education along with a list of institutions with which it has articulation agreements. (NECHE Policy 95. See also *Standards for Accreditation* 4.29-4.32 and 9.18.)

URL	
Print Publications	
Self-study/Fifth-year Report Page Reference	

2. **Student Complaints.** “Policies on student rights and responsibilities, including grievance procedures, are clearly stated, well publicized and readily available, and fairly and consistently administered.” (*Standards for Accreditation* 5.18, 9.8, and 9.18.)

URL	
Print Publications	
Self-study/Fifth-year Report Page Reference	

3. **Distance and Correspondence Education: Verification of Student Identity:** If the institution offers distance education or correspondence education, it has processes in place to establish that the student who registers in a distance education or correspondence education course or program is the same student who participates in and completes the program and receives the academic credit. . . . The institution protects student privacy and notifies students at the time of registration or enrollment of any projected additional student charges associated with the verification of student identity. (NECHE Policy 95. See also *Standards for Accreditation* 4.48.)

Method(s) used for verification	
Self-study/Fifth-year Report Page Reference	

4. **FOR COMPREHENSIVE EVALUATIONS ONLY: Public Notification of an Evaluation Visit and Opportunity for Public Comment:** The institution has made an appropriate and timely effort to notify the public of an upcoming comprehensive evaluation and to solicit comments. (NECHE Policy 77.)
