

Employment Rate and Graduate School Attendance

Graduate School Attendance

In addition to the percent employed, each year 15-20% of our BS graduates go on to graduate school right after graduating. The majority continue on to the MBA program, Masters in Occupational Therapy or Doctorate in Physical Therapy at Husson, but others move on to other colleges to pursue doctorate degrees in the sciences, humanities or a medical field.

Note: All data are from exit surveys emailed to current graduates and mailed to graduates 6 months (2015 and 2016) or one year (2011-2013) after graduating from Husson University. Response rates vary from around 50% for current graduates and 20% for 6 to 12-month post-graduation data.
